# mail

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# CHIP NOISE FILTER NFZ32SW HN10L REFERENCE SPECIFICATION

# 1.Scope

This reference specification applies to NFZ32SW\_HN10L, Chip Noise Filter.

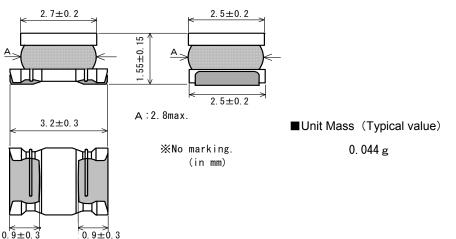

# 2.Part Numbering

	(ex)	NF	Z	32	SW	301	<u> </u>	N	1 0	L
		Product ID	Structure	Dimension	Characteristic	cs Typical	Performance	Category	Numbers Oth	er Packaging
				$(L \times W)$		Impedance			of	L:Taping
						at 100MH	z		Circuit	
3.R	ating									
	•C	perating Te	emperatur	e Range.						
		(Ambient t	emperatu	re; Self-tem	perature rise	e is not inclu	uded) -4	40 to +85°0	2	
		(Product te	emperatur	e: Self- tem	perature rise	e is include	d) -4	40 to +125	°C	
	•S	torage Tem	•		40 to +125°C		,			
		istomer rt Number	MUR/ Part N	ATA Number	Imped at 1M		Impedance at 100MHz,	DC Resi	stance	Rated Current (mA)
					(Ω)	Tolerance	(Ω Тур.)	(Ω)	Tolerance	
	NFZ32S		SW301HN10	)L 3.2	±30%	300	0.030	±20%	2550	
			NFZ328	SW901HN10	DL 6.8		900	0.045	070	2050

# 4. Testing Conditions

《Unless otherwise specified》 Temperature : Ordinary Temperature (15 to 35°C) Humidity : Ordinary Humidity (25 to 85 %(RH)) 《In case of doubt》 Temperature : 20 ± 2°C Humidity : 60 to 70 %(RH) Atmospheric Pressure : 86 to 106 kPa

# **5.Appearance and Dimensions**

# **6.Electrical Performance**

No.	Item	Specification	Test Method		
6.1	Impedance	Impedance shall meet item 3.	Measuring Equipment : Agilent 4192A or equivalent		
			Measuring Frequency: 1MHz		
6.2	DC Resistance	DC Resistance shall meet item 3.	Measuring Equipment: Digital multi meter		

# MURATA MFG.CO., LTD

7.Mechanical Performance

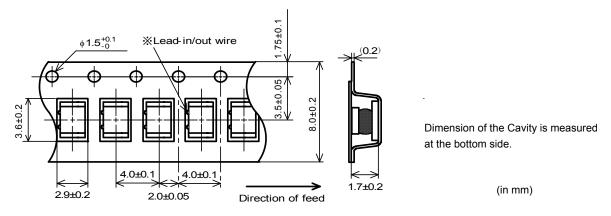

No.	Item	Specification	Test Method
7.1	Shear Test	Chip Noise Filter shall not be	Substrate: Glass-epoxy substrate
		damaged.	Force: 10N Chip Coil
			Hold Duration: 5±1s
			Substrate
7.2	Bending Test		Substrate: Glass-epoxy substrate
			(100 × 40 × 1.0mm)
			Speed of Applying Force: 0.5mm / s
			Deflection: 3mm
			Hold Duration: 5seconds.
			V Pressure jig
			R230 F
			Deflection
			$\nabla \Box \nabla \nabla \uparrow$
			45 45 Product (in mm)
7.3	Vibration		Oscillation Frequency : 10 to 2000 to 10Hz for 20 minutes
1.0	VIBICION		Total amplitude : 1.5 mm or Acceleration amplitude
			98 m/s <sup>2</sup> whichever is smaller.
			Testing Time: A period of 2 hours in each of
			3 mutually perpendicular directions.
			(Total 6 hours)
7.4	Solderability	The wetting area of the electrode	Flux: Ethanol solution of rosin,25(wt)%
		shall be at least 90% covered	(Immersed for 5s to 10s)
		with new solder coating.	Solder : Sn-3.0Ag-0.5Cu
			Pre-Heating: $150 \pm 10^{\circ}$ C / 60 to 90seconds
			Solder Temperature: 240±5°C
7.5	Resistance to	Appoaranco: No domogo	Immersion Time: 3±1 s Flux: Ethanol solution of rosin,25(wt)%
1.5	Soldering Heat	Appearance: No damage Impedance Change: within ±30%	(Immersed for 5s to 10s)
	Colucting Heat	mpedance onange. within ±50 /0	Solder : Sn-3.0Ag-0.5Cu
			Pre-Heating: 150±10°C / 60 to 90seconds
			Solder Temperature: 270±5°C
			Immersion Time: 10±1 s
			Then measured after exposure in the room condition for
			24±2 hours.

# 8.Environmental Performance (It shall be soldered on the substrate.)

No.	Item	Specification	Test Method
8.1	Heat Resistance	Appearance: No damage	Temperature: 85±2°C
		Impedance Change: within ± 30%	Time: $1000 \pm \frac{48}{0}$ hours
		DC Resistance Change:within ± 10%	Then measured after exposure in the room
			condition for 24±2 hours.
8.2	Cold Resistance		Temperature: -40±2°C
			Time: 1000± <sup>48</sup> <sub>0</sub> hours
			Then measured after exposure in the room condition for 24±2 hours.
8.3	Humidity		Temperature: 40±2°C
	,		Humidity: 90~95%(RH)
			Time: $1000 \pm 0^{48}$ hours
			Then measured after exposure in the room
			condition for 24±2 hours.
8.4	Temperature		1 cycle:
	Cycle		1 step: -40±2°C / 30±3 minutes
			2 step: Ordinary temp. / 10 to 15 minutes
			3 step: +85±2°C / 30±3 min.
			4 step: Ordinary temp. / 10 to 15 minutes
			Total of 10 cycles
			Then measured after exposure in the room
			condition for 24±2 hours.

# 9. Specification of Packaging

# 9.1 Appearance and Dimensions of plastic tape

# 9.2 Specification of Taping

(1) Packing quantity (standard quantity)

- 2,000 pcs / reel
- (2) Packing Method

Products shall be packed in the each embossed cavity of plastic tape and sealed by cover tape.

(3) Sprocket hole

The sprocket holes are to the right as the tape is pulled toward the user.

(4) Spliced point

Plastic tape and Cover tape has no spliced point.

(5) Missing components number

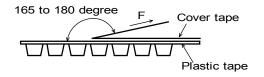

Missing components number within 0.1 % of the number per reel or 1 pc., whichever is greater, and are not continuous. The specified quantity per reel is kept.

### 9.3 Pull Strength

Embossed carrier tape	10N min.
Cover tape	5N min.

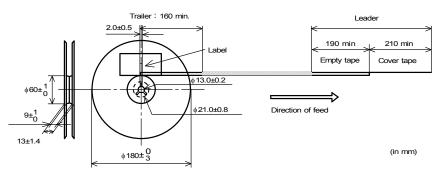

#### 9.4 Peeling off force of cover tape

Speed of Peeling off	300mm/min		
Dealing off force	0.2 to 0.7N		
Peeling off force	(minimum value is typical)		

# 9.5 Dimensions of Leader-tape, Trailer and Reel

There shall be leader-tape (cover tape) and trailer-tape (empty tape) as follows.

#### 9.6 Marking for reel

Customer part number, MURATA part number, Inspection number(\*1), RoHS marking(\*2), Quantity etc ····

*1) « Expression of Inspection	on No. »	$\frac{\Box}{(1)}$	$\frac{0000}{(2)}$	$\frac{\times\times\times}{(3)}$		
(1) Factory Code		(1)	(4)	(0)		
(2) Date	First digit			digit of year		
	Second digit Third, Fourth d			. to Sep. $\rightarrow$ 1 to	9, Oct. to Dec. $\rightarrow$ O, N, D	
(3) Serial No.	rinia, roarare	iigit . D	ay			
*2) « Expression of RoHS m	harking »	ROHS	$S = Y(\triangle)$			

 $(\overline{1})(\overline{2})$ 

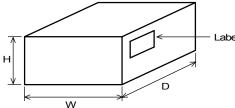

« Expression of RoHS marking » R

- (1) RoHS regulation conformity parts.
- (2) MURATA classification number

## 9.7 Marking for Outside package (corrugated paper box)

Customer name, Purchasing order number, Customer part number, MURATA part number, RoHS marking (\*2) ,Quantity, etc  $\cdots$ 

### 9.8. Specification of Outer Case

el	Outer C	ase Dime (mm)	nsions	Standard Reel Quantity in Outer Case (Reel)
	W D H			
	186	186	93	5

\* Above Outer Case size is typical. It depends on a quantity of an order.

# 10. \land Caution

# **Limitation of Applications**

Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

- (1) Aircraft equipment (7) Traffic signal equipment
- (2) Aerospace equipment (8) Disaster prevention / crime prevention equipment
- (3) Undersea equipment
  - nt (9) Data-processing equipment
- (4) Power plant control equipment
  - (10) Applications of similar complexity and /or reliability requirements to the applications listed in the above
- (5) Medical equipment
- (6) Transportation equipment (vehicles, trains, ships, etc.)

# MURATA MFG.CO., LTD

SpecNo.JENF243J-0005A-01

# Reference Only

### 11. Notice

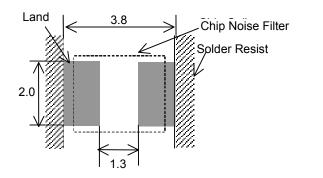

This product is designed for solder mounting. (Reflow soldering only) Please consult us in advance for applying other mounting method such as conductive adhesive.

### 11.1 Land pattern designing (Reflow Soldering)

Recommended land pattern for reflow soldering is as follows:

It has been designed for Electric characteristics and solderability.

Please follow the recommended patterns. Otherwise, their performance which includes electrical performance or solderability may be affected, or result to "position shift" in soldering process.

### 11.2 Flux, Solder

Flux	<ul> <li>Use rosin-based flux.</li> <li>Don't use highly acidic flux with halide content exceeding 0.2(wt)% (chlorine conversion value).</li> <li>Don't use water-soluble flux.</li> </ul>
Solder	• Use Sn-3.0Ag-0.5Cu solder • Standard thickness of solder paste : 100 $\mu$ m to 150 $\mu$ m

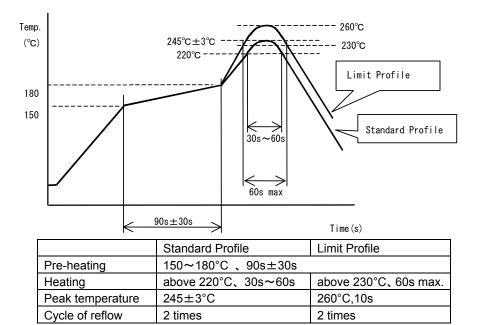

Other flux (except above) Please contact us for details, then use.

# 11.3 soldering conditions (Reflow)

• Pre-heating should be in such a way that the temperature difference between solder and product surface is limited to 100°C max. Cooling into solvent after soldering also should be in such a way that the temperature difference is limited to 100°C max.

Insufficient pre-heating may cause cracks on the product, resulting in the deterioration of product quality.Standard soldering profile and the limit soldering profile is as follows.

The excessive limit soldering conditions may cause leaching of the electrode and / or resulting in the deterioration of product quality.

(in mm)

### 11.4 Reworking with soldering iron.

The following conditions must be strictly followed when using a soldering iron.

Pre-heating	150°C,1 min		
Tip temperature	350°C max.		
Soldering iron output	80W max.		
Tip diameter	$\phi$ 3mm max.		
Soldering time	3 (+1,-0)s		
Times	2 times		

Note :Do not directly touch the products with the tip of the soldering iron in order to prevent the crack on the products due to the thermal shock.

#### 11.5 Solder Volume

- · Solder shall be used not to be exceeded the upper limits as shown below.
- Accordingly increasing the solder volume, the mechanical stress to Chip is also increased. Exceeding solder volume may cause the failure of mechanical or electrical performance.

 $1/3T \le t \le T$ (T: Lower flange thickness)

# 11.6 Product's location

The following shall be considered when designing and laying out P.C.B.'s.

(1) P.C.B. shall be designed so that products are not subject to the mechanical stress due to warping the board.

Products shall be located in the sideways direction (Length:a<b) to the mechanical stress.

so that products are not subject to the mechanical stress due to warping the board. Because they may be subjected the mechanical stress in order of  $A>C>B \cong D$ .

Seam B C oooo oooo b A J D Slit Length:a<b

### 11.7 Cleaning Conditions

Products shall be cleaned on the following conditions.

- (1) Cleaning temperature shall be limited to 60°C max.(40°C max for IPA.)
- (2) Ultrasonic cleaning shall comply with the following conditions with avoiding the resonance phenomenon at the mounted products and P.C.B.
- Power : 20 W / I max. Frequency : 28kHz to 40kHz Time : 5 minutes max. (3) Cleaner
  - 1. Alternative cleaner
    - Isopropyl alcohol (IPA)
  - 2. Aqueous agent
    - PINE ALPHA ST-100S
- (4) There shall be no residual flux and residual cleaner after cleaning.
  - In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.
- (5) Other cleaning
  - Please contact us.

### SpecNo.JENF243J-0005A-01

# Reference Only

#### 11.8 Resin coating

The impedance value may change due to high cure-stress of resin to be used for coating/molding products. An open circuit issue may occur by mechanical stress caused by the resin, amount/cured shape of resin, or operating condition etc. Some resin contains some impurities or chloride possible to generate chlorine by hydrolysis under some operating condition may cause corrosion of wire of coil, leading to open circuit. So, please pay your careful attention when you select resin in case of coating/molding the products with the resin.Prior to use the coating resin, please make sure no reliability issue is observed by evaluating products mounted on your board.

#### 11.9 Caution for use

- Sharp material such as a pair of tweezers or other material such as bristles of cleaning brush, shall not be touched to the winding portion to prevent the breaking of wire.
- Mechanical shock should not be applied to the products mounted on the board to prevent the breaking of the core.

#### 11.10 Handling of a substrate

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.

Excessive mechanical stress may cause cracking in the product.

#### Bending

#### 11.11 Storage and Handling Requirements

(1) Storage period

Use the products within 12 months after delivered. Solderability should be checked if this period is exceeded.

- (2) Storage conditions
  - Products should be stored in the warehouse on the following conditions.
    - Temperature : -10 ~ 40°C
    - Humidity : 15 to 85% relative humidity No rapid change on temperature and humidity
  - The electrode of the products is coated with solder. Don't keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
  - Products should not be stored on bulk packaging condition to prevent the chipping of the core and the breaking of winding wire caused by the collision between the products.
  - Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
  - Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.

### (3) Handling Condition

Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

# 12. 🗥 Note

(1)Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.

(2)You are requested not to use our product deviating from the reference specifications.

(3)The contents of this reference specification are subject to change without advance notice. Please approve our product specifications or transact the approval sheet for product specifications before ordering.
