

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

FEATURES

- UL60950 recognition pending for 250Vrms basic insulation
- ANSI/AAMI ES60601-1, 1 MOPPs recognition pending
- RoHS compliant
- SMD compatible
- +6V, -6V unregulated and +5V regulated
- TTL signal isolator
- 2 outgoing 2 incoming data lines
- 25Mbps data rate
- Industrial temperature range -40°C to +95°C
- Tested at 1500Vac RMS 'Hi Pot Test'

PRODUCT OVERVIEW

The NMTTLD6S5MC is a low power electrically isolated TTL data transmission device. No external components are needed as a single 5V supply powers all functions either side of the isolation boundary. NMTTLD6S5MC also provides a regulated 5V, unregulated 6V and -6V isolated supply's for system use.

SELECTION GUIDE

Order Code¹

NMTTLD6S5MC

MODULE CHARACTERISTICS

SWITCHING CHARACTERISTICS

Parameter	Test conditions	Min.	Typ.	Max.	Units	Symbol
Pulse width	Within PDW limit	40			ns	PW
Date rate	Within PDW limit			25	Mbps	
Propagation delay	50% input to 50% output		25	33	ns	t _{PHL} , t _{PLH}
Pulse width distortion	t _{PLH} - t _{PHL}			3	ns	PWD
Change vs. Temperature			3		ps/°C	
Propagation delay skew	Between any two units			17	ns	t _{PSK}
Codirectional, Channel matching				5	ns	t _{PSKCD}
Opposing direction, Channel matching				7	ns	t _{PSKOD}
Jitter			2		ns	

ELECTRICAL CHARACTERISTICS

Parameter	Test conditions	Min.	Typ.	Max.	Units	Symbol
Supply voltage		4.5	5.0	5.5	V	V _{in}
Logic high (Input)	= 3.5 For secondary	0.7V _{in}			V	V _{IH}
Logic low (Input)	= 1.5 for secondary			0.3V _{in}	V	V _{IL}
Logic high (Output)	I _{Ox} = -20µA, V _{Ix} = V _{IxH} = 4.9 for secondary	V _{in} - 0.1	5.0		V	V _{OxH}
	I _{Ox} = -4mA, V _{Ix} = V _{IxH} = 4.6 for secondary	V _{in} - 0.4	4.8		V	V _{OxH}

1. Components are supplied in tape and reel packaging, please refer to package specification section. Orderable part numbers are NMTTLD6S5MC-R7 (80 pieces per reel), or NMTTLD6S5MC-R13 (350 pieces per reel).

All specifications typical at TA=25°C, nominal input voltage and rated output current unless otherwise specified.

ELECTRICAL CHARACTERISTICS (Continued)						
Parameter	Test conditions	Min.	Typ.	Max.	Units	Symbol
Logic low (Output)	$I_{Ox} = 20\mu A, V_{Ix} = V_{IxH} = 4.9$ for secondary		0.0	0.1	V	V_{OL}
	$I_{Ox} = 4mA, V_{Ix} = V_{IxH} = 4.6$ for secondary		0.2	0.4	V	V_{OL}
Input current per channel	$0V \leq V_{Ix} \leq 5V, 0V \leq V_{CTRLx} \leq 5V$	-10	+0.01	+10	μA	I_i
Quiescent Supply Current						
Regulator input side			0.5	0.6	mA	$I_{DDL} (Q)$
I/O Input			0.027	0.05	mA	$I_{DDL} (Q)$
Regulator output side			1.26	1.7	mA	$I_{DDO} (Q)$
I/O Output			0.031	0.1	mA	$I_{DDOL} (Q)$
Dynamic Supply Current						
Regulator input side			0.07		mA/Mbps	$I_{DDL} (D)$
I/O Input			0.9		$\mu A/Mbps$	$I_{DDL} (D)$
Regulator output side			0.01		mA/Mbps	$I_{DDO} (D)$
I/O Output			0.02		mA/Mbps	$I_{DDOL} (D)$
AC Specifications						
Output rise/Fall time	10% to 90%		2.5		ns	
Common-mode transient immunity	$V_{Ix} = V_{DDL}, V_{CM} = 1000V$, transient magnitude = 800V	25	35		kV/ μs	CM
Refresh period			1.66		μs	t_r

DC-DC CHARACTERISTICS

INPUT CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
Voltage range	Continuous operation	4.5	5	5.5	V	
Input Current	5V input		280		mA	
Input reflected ripple current	5V input		6		mA p-p	

OUTPUT CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
Line regulation	Low line to high line		1.1	1.3	%%	
Load Regulation	All output types		5	10	%	
Ripple and noise			25	50	mV p-p	
Power	5V Regulated			0.4	W	
	Total available power across all outputs			0.8		

TEMPERATURE CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
Operation	See derating curve	-40		95	°C	
Storage		-50		125		
Product temperature rise above ambient	Measured in the isolation barrier		20			

ISOLATION CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
Isolation capacitance			5		pF	
Isolation test voltage	Production tested for 1 second	1500			VAC rms	
	Qualification tested for 1 minute	1500			VAC rms	
Resistance	Viso = 1kVDC	5			G Ω	

GENERAL CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
MTTF - nominal input voltage at full load	MIL-HDBK-217 FN2		4000		kHrs	
	Telcordia SR-332		20000		kHrs	
Switching frequency			90		kHz	

ABSOLUTE MAXIMUM RATINGS						
Parameter	Conditions	Value				
Input voltage		6V				
Logic terminal voltages		-0.5V to $V_{in} + 0.5V$				

TECHNICAL NOTES

ISOLATION VOLTAGE

'Hi Pot Test', 'Flash Tested', 'Withstand Voltage', 'Proof Voltage', 'Dielectric Withstand Voltage' & 'Isolation Test Voltage' are all terms that relate to the same thing, a test voltage, applied for a specified time, across a component designed to provide electrical isolation, to verify the integrity of that isolation.

Murata Power Solutions NMTTLD6S5MC data isolator is 100% production tested at 1.5kVAC rms for 1 second and have been qualification tested at 1.5kVAC rms for 1 minute.

The NMTTLD6S5MC is pending recognition by Underwriters Laboratory to 250 Vrms basic Insulation.

REPEATED HIGH-VOLTAGE ISOLATION TESTING

It is well known that repeated high-voltage isolation testing of a barrier component can actually degrade isolation capability, to a lesser or greater degree depending on materials, construction and environment. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage.

SAFETY APPROVAL

ANSI/AAMI ES60601-1

The NMTTLD6S5MC is pending recognition ANSI/AAMI ES60601-1 and provides 1 MOPP (Means Of Patient Protection) and 1 MOOP (Means Of Operator Protection) based upon a working voltage of 250 Vrms max, between Primary and Secondary.

UL 60950

The NMTTLD6S5MC is pending recognition by Underwriters Laboratory (UL) to UL 60950 for basic insulation to a working voltage of 250Vrms.

FUSING

The NMTTLD6S5MC is not internally fused so to meet the requirements of UL an anti-surge input line fuse should always be used with ratings as defined below.

NMTTL - 1A

All fuses should be UL recognized and rated to at least the maximum allowable DC input voltage.

RoHS COMPLIANCE, MSL AND PSL INFORMATION

The NMTTLD6S5MC is compatible with Pb-Free soldering systems and is also backward compatible with Sn/Pb soldering systems. The NMTTLD6S5MC has a process, moisture, and reflow sensitivity classification of MSL2 PSL R7F as defined in J-STD-020 and J-STD-075. This translates to: MSL2 = 1 year floor life, PSL R7F = Peak reflow temperature 245°C with a limitation on the time above liquidus (217°C) which for this series is 90sec max. The pin termination finish on this product series is Gold with Nickel Pre-plate.

APPLICATION NOTES

Short Circuit Performance

The NMTTLD6S5MC offers short circuit protection at low ambient temperatures from -40°C to the temperatures shown in the below graph, when the output power lines are shorted together or to zero volts out.

Short circuit of data lines are undefined, all data lines should be properly used or terminated via a high impedance to their respective ground

Capacitive Loading & Start Up

Typical start up times for this series, with a typical input voltage rise time of 2.2µs and output capacitance of 10µF, are shown in the table below. The product series will start into a capacitance of 47µF with an increased start time of 4.6ms.

	Start-up time
	ms
NMTTLD6S5MC	1.6

Typical Start-Up Wave Form

Minimum load

The minimum load to meet datasheet specification is 10% of the full rated load across the specified input voltage range. Lower than 10% minimum loading will result in an increase in output voltage, which may rise to typically double the specified output voltage if the output load falls to less than 5%.

TEMPERATURE DERATING GRAPH

EFFICIENCY GRAPH

TOLERANCE ENVELOPE

The voltage tolerance envelope show typical load regulation characteristics for the NMTTLD6S5MC. The tolerance envelope is the maximum output voltage variation due to changes in output loading and set point accuracy.

EMC FILTERING AND SPECTRA

FILTERING

The following filter circuit and table shows the input capacitor and input inductor typically required to meet EN55022 Curve A and B, Quasi-Peak EMC limit, as shown in the following plot. The following plot shows positive and negative quasi peak and CISPR22 Average Limit A (pink line) and CISPR22 Average Limit B (blue line) adherence limits.

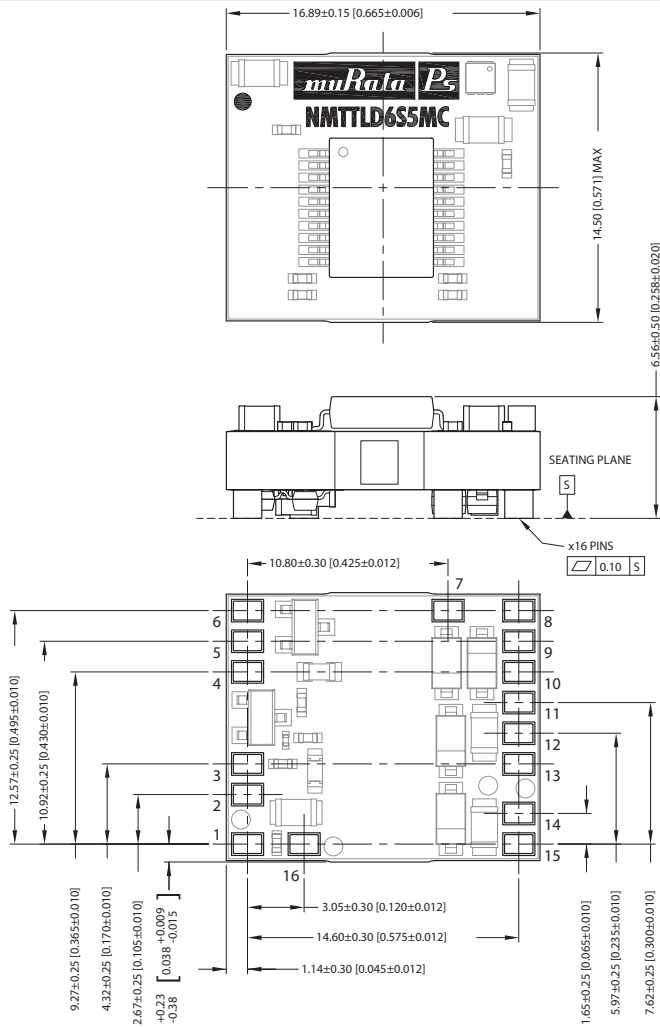

C1 63V Polycarbonate capacitor

15	+6V
16	5V IN

RECOMMENDED FOOTPRINT DETAILS

TAPE & REEL SPECIFICATIONS

REEL OUTLINE DIMENSIONS

Tape & Reel specifications shall conform with current EIA-481 standard
 Unless otherwise stated all dimensions in mm(inches)
 Controlling dimension is mm
 # Measured at hub
 ## Six equi-spaced slots on 180mm/7" reel

REEL PACKAGING DETAILS

Carrier tape pockets shown are illustrative only - Refer to carrier tape diagram for actual pocket details.

Reel Quantity: 7" - 80 or 13" - 350

TAPE OUTLINE DIMENSIONS

Tape & Reel specifications shall conform with current EIA-481 standard
 Unless otherwise stated all dimensions in mm(inches) ±0.1mm (±0.004 Inches)
 Controlling dimension is mm
 Components shall be orientated within the carrier tape as indicated
 # Measured on a plane 0.3mm above the bottom pocket
