## Programmable Terminals NT11/NT21

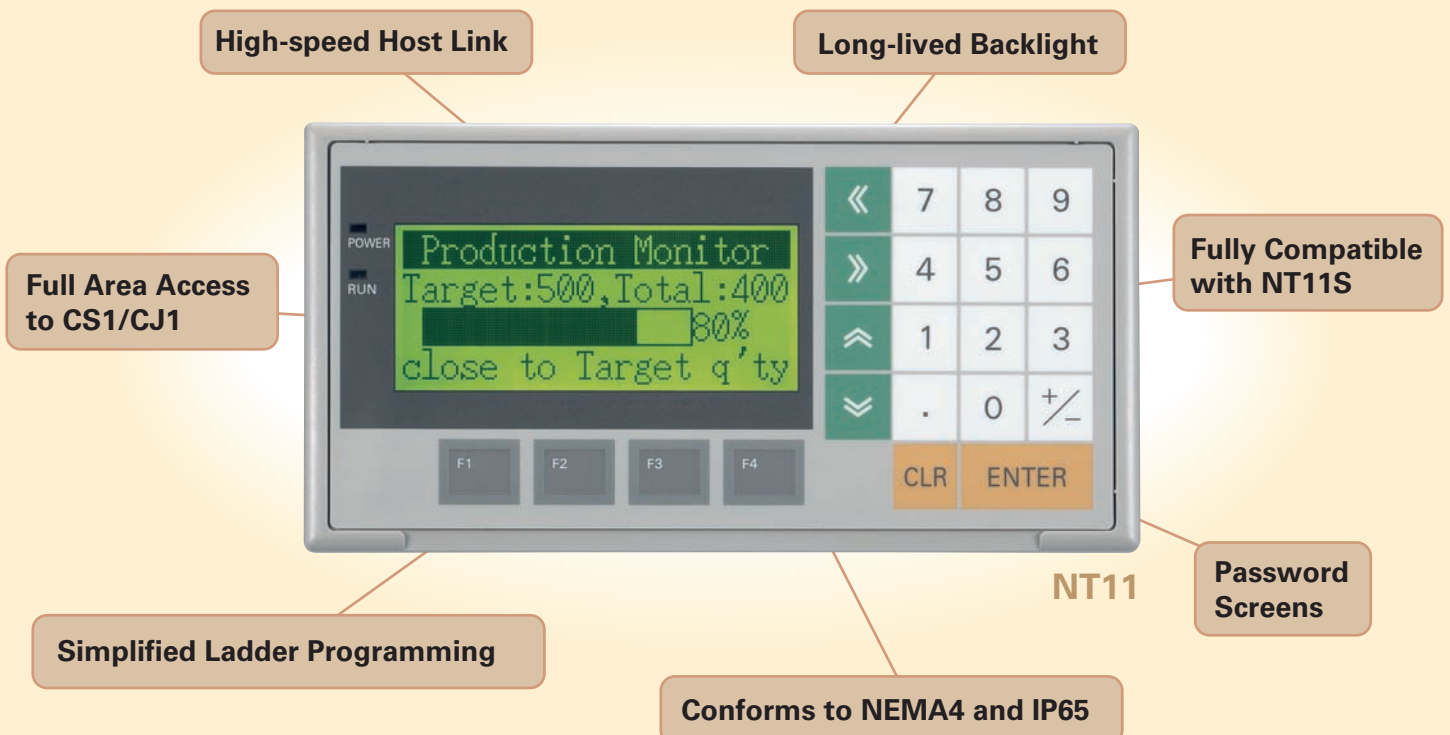

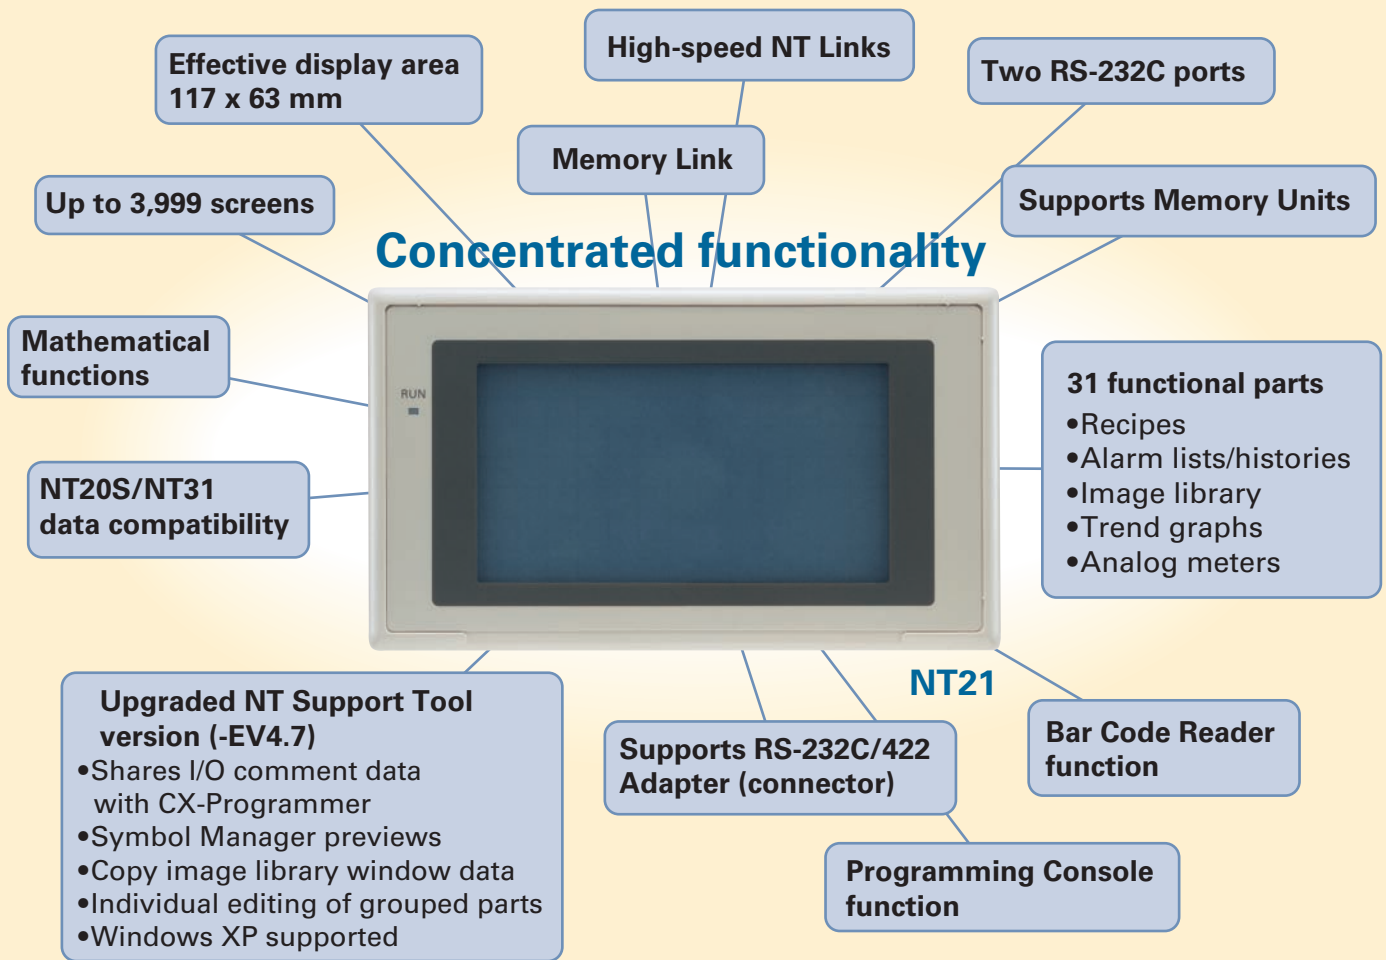

# Small and Smart

Small and Smart

# Compact Size, High Performance

Superb functionality with a compact screen size

Note: Orders for NT11 units will be accepted until the end of March 2018.

## Printout of Production Status

Data such as the production status and production results can be printed out, leaving a record on paper which can be used as a daily report. (The NT11S has a printer port. One screen only is printed.)

Screen	Plan	Prod.
Line 1	200	200
Line 2	150	140
Line 3	350	350

## Integral Numeric Key Pad

The display, numeric keys, and function keys are all integrated into the front panel, which is convenient for designers. The key layout is ergonomically designed for ease of use.

## High-speed Host Link

Up to 115,200 bps supported between CS1/CJ1 PLCs.

## Key Titles can be Marked on the Function Key Sheet

Key titles can be marked on the function key sheet in accordance with the applications of the keys: the sheet can be taken out from the side face of the terminal. The front panel of the terminal has a water-withstanding construction.

Example key titles:

## Bar Graphs can be Displayed

Bar graph displays allow the progress of processes to be checked at a glance. (The bars are oriented horizontally.)

## Advantages From the Standpoint of Maintenance,

## Password Screens for Security

Password screens cannot be accessed unless the correct password is entered. This means that the operations that can be performed can be restricted according to the operator.

## Long-lived Backlight

Since LEDs are used for the backlight, it is very long-lived and rarely needs to be changed.

## Display History Record Helps in Analysis of Machine Faults

When the display history record function is set as a screen attribute, the time, the screen number, and a comment are recorded in the terminal's memory every time the relevant screen is displayed. This display history can be printed by issuing a print instruction from the host, and is useful for machine fault analysis.

Example printout

No.	Time	Screen No	Screen Comment
1	11/01-10:00	1	LINE ERROR
2	11/07-15:33	15	MOTOR ERROR
3	11/11-13:56	19	COMPRESSER ERROR
4	11/14-09:12	5	MOTOR ERROR

## Versatile I/O and Large-capacity Screen Memory in a Space-saving Size

### Small Size, Large Screen

The LCD screen is larger than the OMRON NT20S (increased from 256 x 128 dots to 260 x 140 dots), but the external dimensions and panel cut-out size are the same.

### Two RS-232C Ports

Two RS-232C ports in the NT21 (compared with one in the NT20S) enable simultaneous connection of a PLC, Bar Code Reader, and NT Support Tool (connectable to serial port A only).

### Plenty of Capacity for Saving Graphic Screens

With 512 Kbytes of memory capacity, there is more than ample space for storing screen data.

### Versatile Communications

In addition to the Host Link and 1:1 NT Link communications, the NT21 supports high-speed 1:N NT Links and Memory Link communications.

## Highly Reliable Hardware

### Long, Maintenance-Free Life (50,000 h)

### Conforms to International Standards

The NT21 conforms to the EC Directives, as well as UL, cULus (Class 1 Div2), and C-Tick. The front panel has an enclosure rating equivalent to IP65F.

### System and screen data can be stored in NT21 Flash Memory.

## Function Support Equivalent to That of a Mid-size Operator Interface

### Recipe Function

Parts tables on the PT screen can be used to set multiple word data in records, which can then be written to the PLC by a simple PT touch panel operation. For example, the setting parameters for separate models can be edited on the PT, then written to or read from the PLC.

4	Carrot	800	150	10	
5	Apple	500	300	5

### Alarm List/History(\*)

An alarm message can be displayed in response to PLC bit status, and the content and time of the message can be stored as an alarm history.

Alarm History		Menu
order of occurrence		Reset
Cur. Time 01/09/17 17:24:06

Feed Error	01/09/12 10:05	▼
Pump Error	01/09/11 11:48	▼

\*C500-BAT08 Battery (sold separately) required.

### Programming Console Function

The NT21 is equipped with many of the same functions as the PLC Programming Console.

### Mathematical Functions

Up to 256 math equations can be stored in the PT processing table to allow automatic PT processing, and the results can be written to the numeral memory table or other destinations. This makes it possible to perform scaling and other mathematical operations automatically in the PT.

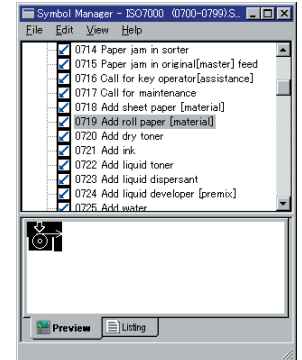

## Upgraded NT Support Tool Version (-EV4.7)

### Enhanced Editing Functions

- I/O comments in the I/O tables of the CX-Programmer can be used directly.

- Symbol Manager previews are supported. This function makes it possible to preview symbols (parts created from graphics data).
  - Parts can be copied by drag & drop operations of image, library, or mark data.
  - The properties of grouped parts can be edited without having to ungroup them.
  - Because NT20S and NT31 screen data is compatible with the NT21, existing software assets can be utilized to greatly reduce the number of design steps.
- Note:** Some data revisions may be required due to size differences.
- Windows XP supported.
