

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

\*5 m 16.4041 ft cable length type: Certified (for sales in China only)

# Multi-voltage photoelectric sensor usable worldwide

#### Multi-voltage

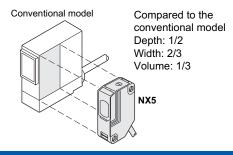

The **NX5** series can operate at 24 to 240 V AC or 12 to 240 V DC, which is suitable for supply voltages around the world.

No need to arrange a DC power supply.

#### **Compact size**

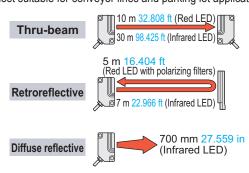

Despite of being multi-voltage, it has a depth of just 35 mm 1.378 in. (W18  $\times$  H62  $\times$  D35 mm W0.709  $\times$  H2.441  $\times$  D1.378 in)

#### **BASIC PERFORMANCE**

#### Long sensing range

It is most suitable for conveyor lines and parking lot applications.

#### High reliability

It has an IP66 protection. Moderate dust or water splashes will not affect the sensor.

The hermetically sealed output relay significantly increases its reliability.

#### **FUNCTIONS / MOUNTING**

#### Easy alignment

The 10 m 32.808 ft thru-beam type sensor and the 5 m 16.404 ft retroreflective type sensor incorporate a red LED beam source. Beam alignment can be attained by checking the emitted beam visually.

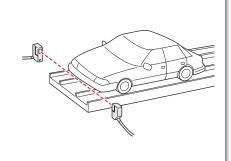

#### Interference prevention

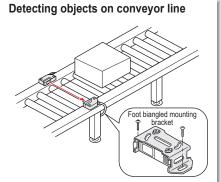

Two sensors can operate normally even if mounted close together.

(Excluding the 30 m 98.425 ft thru-beam type sensor)

#### **APPLICATIONS**

#### Detecting car position at parking garage

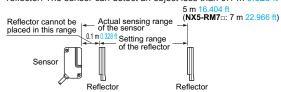

#### ORDER GUIDE

Туре		9	Appearance	Sensing range	Model No. (Note 2, 3)	Emitting element	Output
Thru-beam		Light- ON		10 m 32.808 ft	NX5-M10RA	DadleD	Relay contact 1c
	Long sensing range	Dark- ON		10 III 32.000 It	NX5-M10RB	Red LED	
		Light- ON		30 m 98.425 ft	NX5-M30A	Infrared LED	
		Dark- ON			NX5-M30B	IIIIIaieu LED	
	sensing With pol filters	Light- ON		0.1 to 5 m 0.328 to 16.404 ft (Note 1)	NX5-PRVM5A	Red LED	
Retroreflective		Dark- ON			NX5-PRVM5B	Red LED	
Retrore		Light- ON		0.1 to 7 m 0.328 to 22.966 ft (Note 1)	NX5-RM7A	Infrared LED	
		Dark- ON			NX5-RM7B	IIIIIaieu LED	
Diffuse	Diffuse reflective	Light- ON		700 mm 27.559 in	NX5-D700A	Infrared LED	
	Diffu	Dark- ON		700 mm 27.339 m	NX5-D700B		

NOTE: Mounting bracket is not supplied with the sensor. Please select from the range of optional sensor mounting brackets (three types).

Notes: 1) The sensing range of the retroreflective type sensor is specified for the RF-230 reflector. Further, the sensing range is the possible setting range for the reflector. The sensor can detect an object less than 0.1 m 0.328 ft away.

- 2) The model No. with "P" shown on the label affixed to the thru-beam type sensor is the emitter, "D" shown on the label is the receiver.
- 3) Light-ON type sensor (model No. with suffix "A") and Dark-ON type sensor (model No. with suffix "B") are available in the NX5 series. For the following models, in case of power off, the output relay condition is the same as when an object is detected. (In case of power supply line disconnection, the output operation is the same as when an object is detected.) Refer to "I/O CIRCUIT DIAGRAM AND OUTPUT OPERATION (p.405)" for the output operation of each model.

Thru-beam type	Retroreflective type	Diffuse reflective type
NX5-M10RA and NX5-M30A (Light-ON)	NX5-PRVM5A and NX5-RM7A (Light-ON)	NX5-D700B (Dark-ON)

#### 5 m 16.404 ft cable length type

5 m 16.404 ft cable length type (standard: 2 m 6.562 ft) is also available. When ordering this type, suffix "-C5" to the model No.

(e.g.) 5 m 16.404 ft cable length type of NX5-M10RA is "NX5-M10RA-C5".

Automatic interference prevention function    Description   Description							

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) The sensing range and the sensing object of the retroreflective type sensor is specified for the RF-230 reflector. Further, the sensing range is the possible setting range for the reflector.

The sensor can detect an object less than 0.1 m 0.328 ft away.

- 3) The sensing range and the hysteresis of the diffuse reflective type sensor are specified for white non-glossy paper (200 × 200 mm 7.874 × 7.874 in) as the object.
- 4) If slit masks (optional) are fitted, an object as small as  $3 \times 6$  mm  $0.118 \times 0.236$  in can be detected.
- 5) Make sure to confirm detection with an actual sensor before use.
- 6) In case the sensor is to be used at an ambient temperature of –15 °C +5 °F, or less, please contact our office.

#### Sensing field

#### Correlation between sensing object size and sensing range

As the sensing object size becomes smaller than the standard size (white non-glossy paper  $200 \times 200 \text{ mm } 7.874 \times 7.874 \text{ in}$ ), the sensing range shortens, as shown in the left graph.

For plotting the left graph, the sensitivity has been set such that a 200 × 200 mm 7.874 × 7.874 in white non-glossy paper is just detectable at a distance of 700 mm 27.559 in.

#### PRECAUTIONS FOR PROPER USE

Refer to p.1458~ for general precautions.

 Never use this product as a sensing device for personnel protection.

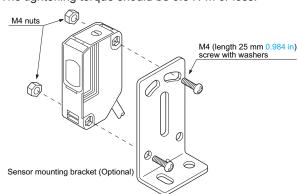

· In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

#### **Others**

- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- · Although the protection degree is specified for the sensor including the cable, the cable end is not waterproof, and is not covered by the protection specified. Hence, make sure that water does not seep in from the cable end.

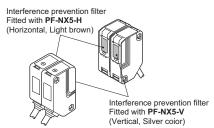

#### **Mounting**

• The tightening torque should be 0.8 N·m or less.

#### Interference prevention filter (Exclusively for NX5-M10R<sub>□</sub>)

- Use the interference prevention filters (optional) when two units of thru-beam type sensors are mounted close together. However, take note that the sensing range will become short.
- There are 2 types of interference prevention filters. Install PF-NX5-H (Horizontal, Light brown) for 1 set, and install PF-NX5-V (Vertical, Silver color) for the other set.

Note: The filters cannot be used for NX5-M30A or NX5-M30B.

#### PRECAUTIONS FOR PROPER USE

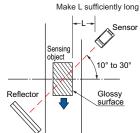

Refer to p.1458~ for general precautions.

#### Retroreflective type sensor (NX5-RM7<sub>□</sub>)

- · Please take care of the following points when detecting materials having a gloss.
- ① Make L, shown in the diagram, sufficiently long.
- 2 Install at an angle of 10 to 30 degrees to the sensing object.

\* NX5-PRVM5

does not need the above adjustment.

#### Retroreflective type sensor with polarizing filters (NX5-PRVM5<sub>□</sub>)

• If a shiny object is covered or wrapped with a transparent film, such as those described below, the retroreflective type sensor with polarizing filters may not be able to detect it.

In that case, follow the steps given below.

#### Example of sensing objects

- · Can wrapped by clear film
- Aluminum sheet covered by plastic film
- · Gold or silver color (specular) label or wrapping paper

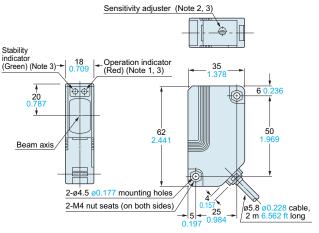

#### Steps

- Tilt the sensor with respect to the sensing object while fitting.
- · Reduce the sensitivity.
- Increase the distance between the sensor and the sensing object.

The CAD data in the dimensions can be downloaded from our website.
