

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

AC Fan Speed Control Unit

Input Voltage:	120/220 VAC±15%
Input Protection:	2A Circuit Breaker
Output Protection:	2A Circuit Breaker (Each Channel)
4 Preset Settings:	Off, Low, Medium, & High
Speed Adjustment: (User accessible)	External 4 Detent Rotary Switch (Off, Low, Medium, High) Internal Potentiometers for each speed
Input Connector:	IEC C14
Output Connectors:	IEC C13
COMMENTS	
Contact Manufacturer for alternate circuit breaker configurations and higher current options by special orders.	

The Dual Channel Phase Control Unit allows the user to control fan speed for single or multiple fan assemblies. Effectively this allows the application engineer to specify and control fan noise, speed and air delivery very precisely according to specific application requirements. Four factory presets (user adjustable) allows for maximum flexibility with minimum setup time. This unit has been specially designed with fan trays and equipment racks in mind where noise vs airflow needs to be controlled according to immediate needs.
