Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Wide Gap Slotted Optical Switch

### OPB800 (L and W Series)

### Features:

- 0.375" (9.525 mm) wide gap
- Choice of aperture size
- Choice of minimum photocurrent
- Choice of opaque or IR transmissive shells
- Available for PCBoard mounting or with 24" 26 AWG wires

#### **Description:**

The OPB800L series, PCBoard mounting, of wide gap switch provides the flexibility of a custom device from a standard product line, while the OPB800W series, remote mounted, switch offers 24" (610 mm) 26 AWG wire interconnect.

Building from a standard housing that utilizes a 0.375" (9.5 mm) wide slot, a user can specify the electrical output parameters, discrete shell material and the aperture width.

Housings are made from an opaque grade of injection-molded plastic that minimizes the assembly's sensitivity to visible and near-infrared ambient radiation. Discrete shells, which are exposed on parallel faces inside the device throat, are made of IR transmissive plastic (for applications where aperture contamination may occur) or of opaque plastic with aperture openings (for maximum protection against ambient light).

### **Applications:**

- Non-contact interruptive object sensing
- Assembly line automation
- Machine automation
- Equipment security
- Machine safety

General Note

TT Electronics reserves the right to make changes in product specification without notice or liability. All information is subject to TT Electronics' own data and is considered accurate at time of going to print.

### **Electrical Specifications**

### Absolute Maximum Ratings (T<sub>A</sub>=25°C unless otherwise noted)

Storage and Operating Temperature L Series W Series	-40° C to +85° C -40° C to +80° C	
Lead Soldering Temperature [1/16 inch (1.6mm) from the case for 5 sec. with soldering iron] <sup>(2)</sup>	260° C	
Input Diode		
Forward DC Current	50 mA	
Peak Forward Current (1 μs pulse width, 300 pps)	3 A	
Reverse DC Voltage	2 V	
Power Dissipation <sup>(1)</sup>	100 mW	
Output Phototransistor		
Collector-Emitter Voltage	30 V	
Emitter-Collector Voltage	5 V	
Collector DC Current	30 mA	
Power Dissipation <sup>(1)</sup>	100 mW	

DIMENSIONS ARE IN INCHES AND [MILLIMETERS].

Notes:

(1) Derate linearly 1.67 mW/° C above 25° C.

Parameter B

Parameter C

(2) RMA flux is recommended. Duration can be extended to 10 seconds maximum when flow soldering.

(OPB801,OPB811)

(OPB802,OPB812)

(3) All parameters tested using pulse technique.

(4) Methanol or isopropanol are recommended as cleaning agents. Plastic housing is soluble in chlorinated hydrocarbons and ketones.

1.25

2.25

(5) The W Series includes wire terminations of 24" (610 mm) 7-strand, 26 AWG UL insulated wire on each terminal. Each device incorporates a wire strain relief at the housing surface. The insulation functions and colors are: anode (red), cathode (black), phototransistor collector (white) and phototransistor emitter (green).
