

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

0V6930 400 x 400 product brief

available in a lead-free package

Industry's Smallest 400 x 400 Image Sensor

With a packaged footprint of only $1.8~\text{mm} \times 1.8~\text{mm}$, the OV6930 is the ideal solution for camera applications that require less than a 2.6~mm outside diameter, such as medical endoscopes. The OV6930's unique architecture combines ultra-low power consumption with OmniVision's best-in-class pixel technology, OmniPixel3-HS $^{\text{TM}}$, enabling low-light performance of 3300 mV/lux-sec.

In addition to its small footprint and extraordinary performance, the OV6930 offers raw serial output, allowing cabling up to 14 feet with two wires.

The low-voltage OV6930 provides either full-frame or cropped analog images in RAW RGB format via serial camera control bus (SCCB) interface control.

The device offers an image array capable of operating up to 30 frames per second (fps) in 400 x 400 or 60 fps in 400 x 200 resolution, with simplified exposure control programmable through the SCCB interface. OmniVision's image sensors leverage proprietary technology to improve image quality by reducing or eliminating common lighting/electrical sources of image contamination, such as fixed pattern noise and smearing, to produce a clean, fully stable, color image.

No other image sensor on the market offers high performance and sensitivity in such a small form factor.

Find out more at www.ovt.com.

Applications

- Medical Devices
- Security and Surveillance
- Entertainment Multimedia, Games and Toys

OV6930

Product Features ■ OmniPixel3-HS architecture with

- leading low-light sensitivity (3300 mV/lux-sec)
- optical size of 1/10.6"
- analog output
- automatic/manual control of AEC and AGC
- on-chip phase lock loop (PLL)
- low power consumption
- single 3.3V power supply
- SCCB interface

■ 0V06930-A08A (color, analog, 8-pin CSP3)

Product Specifications

- active array size: 400 x 400
- power supply: analog: 3.3V ±5% I/O: 2.3 ~ 3.5V
- power requirements: 48 mW (typical)
- temperature range:
 operating: -20°C to +70°C junction temperature
- stable image: 0°C to +50°C junction temperature
- output formats: analog signal output
- optical size: 1/10.6"
- maximum exposure: 876 x T_{line}
- scan mode: progressive

- maximum image transfer rate:400x400: 30 fps400x200: 60 fps

- max S/N ratio: 38 dB
- dynamic range: 68 dB @ 8x gain
- sensitivity: 3.0 V/lux-sec
- color mosaic: RGB Bayer pattern
- pixel size: 3.0 µm x 3.0 µm
- dark current: 10 mV/s @ 60°C junction temperature
- \blacksquare image area: 1224 µm x 1212 µm
- package dimensions: 1815 µm x 1815 µm
