

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

OV7739 VGA (640x480) product brief

available in a lead-free package

Ultra-Thin High-Performance Video Sensor

The ultra-thin (3 mm) high-performance OV7739 video sensor provides the ideal image solution for a variety of applications including mobile, notebook PCs, netbooks, and gaming applications. In addition to its small footprint and high-performance features, the OV7739 is capable of producing various output formats over a parallel DVP or serial MIPI port, providing a versatile platform for use in single and multi-camera applications.

Developed specifically to address the low-light sensitivity demands of the fast-growing mobile market, the OV7739 delivers best-in-class low light performance at 3300 mV/lux-sec, enabling high quality video conferencing and recording in virtually any lighting condition.

Based on OmniPixel3-HS™ architecture, the 1/7.5-inch OV7739 is capable of operating at 30 frames per second (fps) in VGA resolution and 60 fps in QVGA resolution with complete user control over image quality, formatting and output data transfer. The OV7739 provides full-frame, sub-sampled, windowed or scaled 8-bit/10-bit images in RAW RGB and YUV formats.

All required image processing functions, including exposure control, white balance, and defective pixel canceling, are programmable through the SCCB interface. The OV7739 eliminates image contamination issues such as fixed pattern noise, smearing and blooming to produce a clean, stable and vivid color image.

Find out more at www.ovt.com.

Applications

- Mobile Phones
- Netbook
- Notebook PC
- Games

Product Features

- ultra-thin (3 mm) module z-height
- excellent low light performance 3300 mV/lux-sec
- support for multiple interfaces including parallel and MIPI serial output
 support for binning
- automatic image control functions:
- automatic exposure control (AEC) automatic gain control (AGC) automatic white balance (AWB)
- automatic band filter (ABF)
- automatic 50/60 Hz luminance detection
- automatic black level calibration (ABLC)
- programmable controls for frame rate, mirror and flip, scaling, cropping, and windowing
- image quality controls: color saturation, hue, gamma, sharpness (edge enhancement), lens correction, defective pixel canceling, and noise
- support for output formats: 8/10-bit RAW RGB, CCIR656 and YUV422

- support for horizontal and vertical sub-sampling
- support for images sizes: VGA and any arbitrary size scaling down from VGA
- support for external frame synchronization
- standard serial SCCB interface
- embedded one-time programmable (OTP) memory for part identification,
- on-chip phase lock loop (PLL)
- programmable I/O drive capability
- built-in 1.5V regulator for core

OV7739

- 0V07739-A34A (color, lead-free, 34-pin CSP3)
- 0V07739-A34T (color, lead-free, 34-pin CSP3 high
- 0V07739-G04A (color, chip probing, 200 µm backgrinding, reconstructed wafer)

Product Specifications

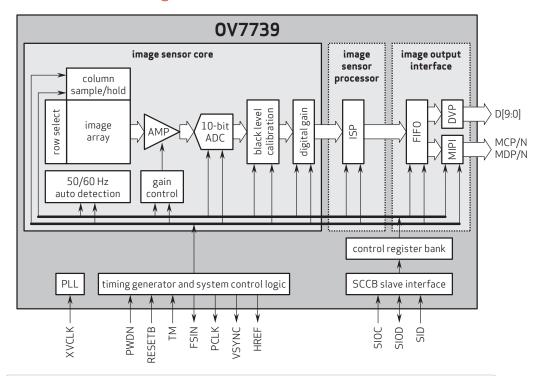

- active array size: 640 x 480
- power supply: core: 1.5 VDC ±5% (internal
- regulator)
 analog: 2.6 3.0 V (2.8 V typical)
 I/O: 1.7 3.0 V

- temperature range:operating: -30° C to 70° C junction temperature
- stable image: 0° C to 50° C junction
- output formats: 8/10-bit RAW RGB,
- lens size: 1/7.5"
- lens chief ray angle: 27.5°
- input clock frequency: 6 27 MHz
- S/N ratio: 38 dB

- dynamic range: 68 dB @ 8x gain

- maximum image transfer rate:
 VGA (640 x 480): 30 fps
 QVGA (320 x 240): 60 fps
 QQVGA (160 x 120): 120 fps
- sensitivity: 3300 mV/lux-sec
- maximum exposure interval: 508 x t_{ROW}
- dark current: 10 mV/s @ 60°C junction temperature
- pixel size: 3 µm x 3 µm
- image area: 2016 µm x 1488 µm
- package/die dimensions: CSP3: 3985 µm x 3385 µm
 - RW: 4000 µm x 3400 µm
