OV9715 720p HD video image sensor product brief

available in a lead-free package

High Definition (HD) Video Image Sensor

The OV9715 offers best-in-class 720p HD video performance at 30 frames per second (fps).

Enabled by OmniVision's proprietary OmniPixel3-HS™ high sensitivity pixel technology with 3 x 3 μm pixel and low-light sensitivity of 3.3 V/lux-sec, the OV9715 provides vivid imaging in virtually every lighting condition from bright daylight to nearly complete darkness. As a result, it is ideally suited for use in security and surveillance cameras.

The 1/4-inch OV9715 sensor provides full-frame, sub-sampled or windowed 8-bit/10-bit images in raw RGB format via the digital video port and with complete

user control over image quality, formatting and output data transfer. The OV9715 offers a chief ray angle (CRA) of 0°.

The OV9715 incorporates advanced image processing functions, including exposure control, gain control, white balance, lens correction and defective pixel correction, programmable through the serial camera control bus (SCCB) interface. For storage purposes, it includes one-time programmable (OTP) memory.

The OV9715 is available in a CSP2 package and is capable of operating within a temperature range of -30°C to +85°C.
