DVI-D to VGA Active Adapter Converter Cable, 1920x1200, 6 in.

MODEL NUMBER: P120-06N-ACT

Convert a DVI digital signal to VGA analog to provide compatibility between a VGA monitor and a computer with DVI-D output.

Features

Active Adapter Makes a DVI Video Source Compatible with Your VGA Monitor

This active DVI-D to VGA converter cable makes it possible to send a DVI-D digital signal from your computer or other source device to a VGA analog monitor. Connect the built-in 6-inch cable with DVI-D single-link male connector to the DVI port on your video source device. Then, connect a VGA cable, such as a Tripp Lite P502-series VGA cable, from your monitor to the converter. The converter supports VGA cables up to 100 feet, providing flexibility in device placement.

Save Money without Sacrificing Image Quality

This DVI-D to VGA active adapter helps you save money by making your current VGA monitor compatible with a computer or other source device equipped with a DVI output. It supports computer video resolutions up to 1920 x 1200 and HD resolutions up to 1920 x 1080 (1080p). Active digital-to-analog circuitry and quality manufacturing ensure a clean, consistent video signal.

Simplify Installation with a Plug-and-Play Solution

Completely plug and play, this DVI-D to VGA active adapter does not require software or drivers. The DVI-D cable is built-in, so the only cable you need to supply is your device's VGA cable. If your application requires power, use the included USB Micro-B cable to connect the converter to a USB port on your monitor or a USB wall outlet.

3-Year Warranty

The P120-06N-ACT is backed by a 3-year warranty, ensuring reliability and performance.

Highlights

- Converts a DVI-D digital signal to a VGA analog signal for greater device compatibility
- Supports computer resolutions up to 1920 x 1200 and HD up to 1080p for high-quality images
- Features plug-and-play installation; does not require software or drivers
- Works with VGA cables up to 100 ft. for flexibility in monitor placement
- Includes a USB Micro-B cable if power is needed

Applications

- Use your current VGA monitor with your newer DVI computer to eliminate the need for a new display
- Use a VGA projector with your DVI computer to give a presentation

System Requirements

- A computer with DVI-D output
- A monitor or projector with VGA input

Package Includes

- DVI-D to VGA Active Adapter Converter Cable, 6 in.
- USB to USB Micro-B Cable, 3 ft.
- Quick Start Guide
