

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Features

- Formerly **FulTec** brand
- Extremely high speed performance
- Blocks high voltages and currents
- Two TBU™ protectors in one small package
- Simple, superior circuit protection
- Minimal PCB area
- RoHS compliant*, UL Recognized

Applications

- POTS linecards
- VoIP equipment
- Voice and data combo linecards
- ONU, ONT
- Gateways
- Cable and DSL modems

TBU™ P500-G and P850-G Protectors

Transient Blocking Units - TBU™ Devices

Bourns® Model P500-G and P850-G TBU™ products are high speed, surge protection components designed to protect Subscriber Line Interface Circuits (SLICs) against transients caused by AC power cross, induction and lightning surges.

The TBU™ device blocks surges and provides an effective barrier behind which sensitive electronics are not exposed to large voltages or currents during surge events.

Agency Approval

UL recognized component File # E315805.

Industry Standards

Description			Model
Telcordia	GR-1089	Port Type 2, 4	P500-G
		Port Type 3, 5	P850-G
ITU-T	K.20, K.20E, K.21, K.21E, K.45		P850-G

Absolute Maximum Ratings (T_{amb} = 25 °C)

Symbol	Parameter	Value	Unit	
V _{imp}	Maximum protection voltage for impulse faults with rise time ≥ 1 μsec	P500-Gxxx-WH P850-Gxxx-WH	500 850	V
V _{rms}	Maximum protection voltage for continuous V _{rms} faults	P500-Gxxx-WH P850-Gxxx-WH	300 425	V
T _{op}	Operating temperature range		-40 to +85	°C
T _{stg}	Storage temperature range		-65 to +150	°C

Electrical Characteristics (T_{amb} = 25 °C)

Symbol	Parameter	Min.	Typ.	Max.	Unit
I _{op}	Maximum current through the device that will not cause current blocking			100 200 100 200	mA
I _{trigger}	Typical current for the device to go from normal operating state to protected state		150 275 150 275		mA
I _{out}	Maximum current through the device			200 400 200 400	mA
R _{TBU}	Series resistance of the TBU™ device		50	55	Ω
R _{bal}	Line-to-line series resistance difference between two TBU™ devices			2	Ω
t _{block}	Maximum time for the device to go from normal operating state to protected state			1	μs
I _{quiescent}	Current through the triggered TBU™ device with 50 Vdc circuit voltage		0.7		mA
V _{reset}	Voltage below which the triggered TBU™ device will transition to normal operating state		22		V

The P-G series TBU™ devices are bidirectional; specifications are valid in both directions.

*RoHS Directive 2002/95/EC Jan 27 2003 including Annex.
Specifications are subject to change without notice.
Customers should verify actual device performance in their specific applications

3A	Tip Out	6A	Ring In

NC = Solder to PCB; do not make electrical connection, do not connect to ground.

Block Diagram

P500-Gxxx

P850-Gxxx

TBU™ devices have matte-tin termination finish. Suggested layout should use non-solder mask define (NSMD). Recommended stencil thickness is 0.10-0.12 mm (.004-.005 in.) with stencil opening size 0.025 mm (.0010 in.) less than the device pad size. As when heat sinking any power device, it is recommended that, wherever possible, extra PCB copper area is allowed. For minimum parasitic capacitance, do not allow any signal, ground or power signals beneath any of the pads of the device.
