# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## DC Power Relays Capable of Interrupting High-voltage, High-current Loads

- A compact relay (73 x 36 x 67.2 mm (L x W x H)) capable of switching 400-V 60-A DC loads. (Capable of interrupting 600 A at 300 VDC max.)
- The switching section and driving section are gas-injected and hermetically sealed, allowing these compact relays to interrupt high-capacity loads. The sealed construction also requires no arc space, saves space, and helps ensure safe applications.
- Downsizing and optimum design allow no restrictions on the mounting direction.
- Terminal Cover and DIN Track Adapters are also available for industrial
- applications.UL/CSA standard UL508 approved.

#### **RoHS Compliant**

Refer to "DC Power Relays Common Precautions".

## ■Model Number Legend

| conduction models<br>High-current conduction<br>models | Lead wires      | Screw terminals   | SPST-NO      | 24 VDC<br>48 VDC<br>60 VDC | G9EA-1      |
|  | Screw terminals |                   |              |                            | G9EA-1-B-CA |
|  | Lead wires      |                   |              | 100 VDC                    | G9EA-1-CA   |

Note 1. Two M5 screws are provided for the contact terminal connection.

Note 2. Two M3.5 screws are provided for the coil terminal connection.

## Ratings

#### Coil

| Rated voltage | Item | Rated current<br>(mA) | Coil resistance<br>(Ω) | Must-operate voltage<br>(V) | Must-release voltage<br>(V) | Maximum voltage<br>(V)                                  | Power consumption<br>(W) |
|---------------|------|-----------------------|------------------------|-----------------------------|-----------------------------|---|--------------------------|
| 12 VDC        |      | 417                   | 28.8                   |                             |                             |   |                          |
| 24 VDC        |      | 208                   | 115.2                  | _                           | 8% min. of rated voltage    | 130% of rated<br>voltage (at 23°C<br>within 10 minutes) | Approx. 5 W              |
| 48 VDC        |      | 102                   | 469.3                  | 75% max. of rated           |                             |   |                          |
| 60 VDC        |      | 86.2                  | 695.7                  | vonage                      |                             |   | Approx. 5.2 W            |
| 100 VDC       |      | 53.6                  | 1864                   |                             |                             |   | Approx. 5.4 W            |

Note 1. The figures for the rated current and coil resistance are for a coil temperature of 23°C and have a tolerance of ±10%.

Note 2. The figures for the operating characteristics are for a coil temperature of 23°C.

Note 3. The figure for the maximum voltage is the maximum voltage that can be applied to the relay coil.

| Weight (including accessories)  |                                       | Approx. 310 g  |   |  |  |  |

1

\*2.

Note. The above values are initial values at an ambient temperature of 23°C unless otherwise specified. \*1. The contact resistance was measured with 1A at 5VDC using the voltage drop method.

The insulation resistance was measured with a 500-VDC megohmmeter.

The impulse withstand voltage was measured with a JEC-212 (1981) standard impulse voltage waveform ( $1.2 \times 50 \ \mu$ s).

\*3. \*4. The mechanical endurance was measured at a switching frequency of 3,600 operations/hr.

\*5. The electrical endurance was measured at a switching frequency of 60 operations/hr.

### Carry Current vs Energizing Time

#### All G9EA-1 Models Must-operate Voltage and **Must-release Voltage** Distributions

30 50 100

#### Vibration Resistance

Characteristics were measured after applying vibration at a frequency of 10 to 55 Hz (single amplitude of 0.75 mm) to the test piece (not energized) for 2 hours each in 3 directions. The percentage rate of change is the average value for all of the samples

### Time Characteristic Distributions

100

#### Shock Malfunction

The value at which malfunction occurred was measured after applying shock to the test piece 3 times each in 6 directions along 3 axes.

#### Vibration Malfunction

#### Shock Resistance

Characteristics were measured after applying a shock of 490 m²/s to the test piece 3 times each in 6 directions along 3 axes. The percentage rate of change is the average value for all of the samples.

Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
