

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

**PI3WVR31310A**

**DP/HDMI 1:3 De-mux/Mux Switches**

**Features**

- ➔ DP 1:3 De-Mux or 3:1 Mux switch with 4 high speed differential, AUX/DDC, HPD and CAB\_DET channels
- ➔ Pin selection for 1:3 DEMUX or 3:1 MUX
- ➔ HDMI 3:1 Mux switch with 4 high speed differential, DDC and HPD channels
- ➔ HDMI-mode only supports HDMI-sink application, not support HDMI-source application.
- ➔ Pin selection for DP mode or HDMI mode
- ➔ All ports support up to DP1.2 at 5.4Gb/s or HDMI 2.0 at 6Gb/s
- ➔ Supports manual switching or HPD auto priority selection in 1:3 DEMUX, in DP mode
- ➔ Low current consumption
- ➔ 3.3V power supply
- ➔ ESD protection on all I/O pins for 2kV HBM
- ➔ Package:  
60 pin TQFN (5x9mm)

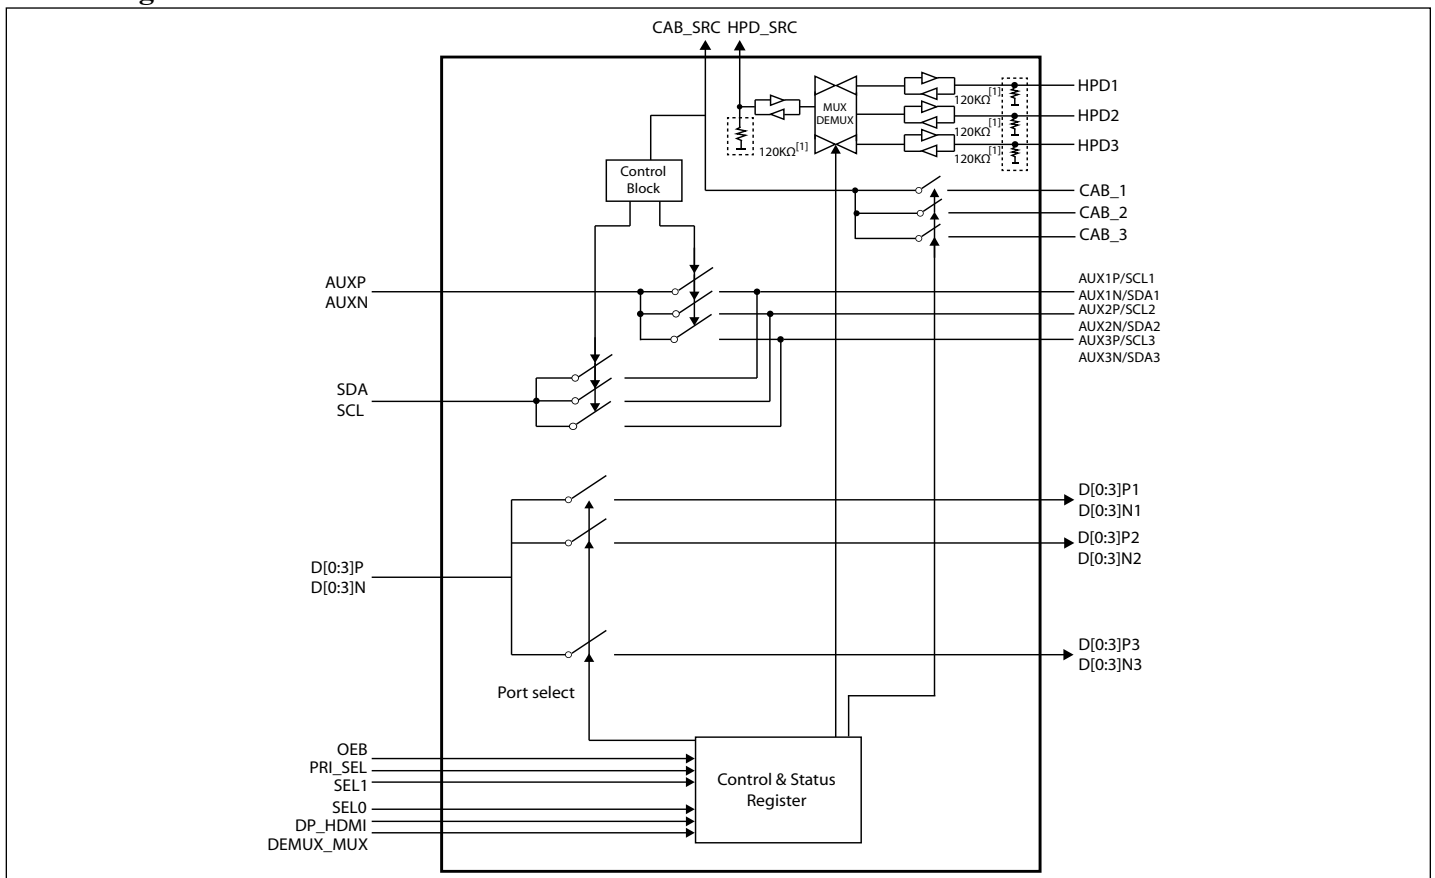

**Description**

The PI3WVR31310A is a 3:1 Mux or 1:3 Demux high speed passive switch supporting DP 1.2, HDMI 1.4, HDMI 2.0. At DEMUX mode, all three output ports support auto port priority selection by detecting HPD1/2/3 input or manual selection. At MUX mode, HPD1/2/3 will change from input to output, there is no auto port priority selection.

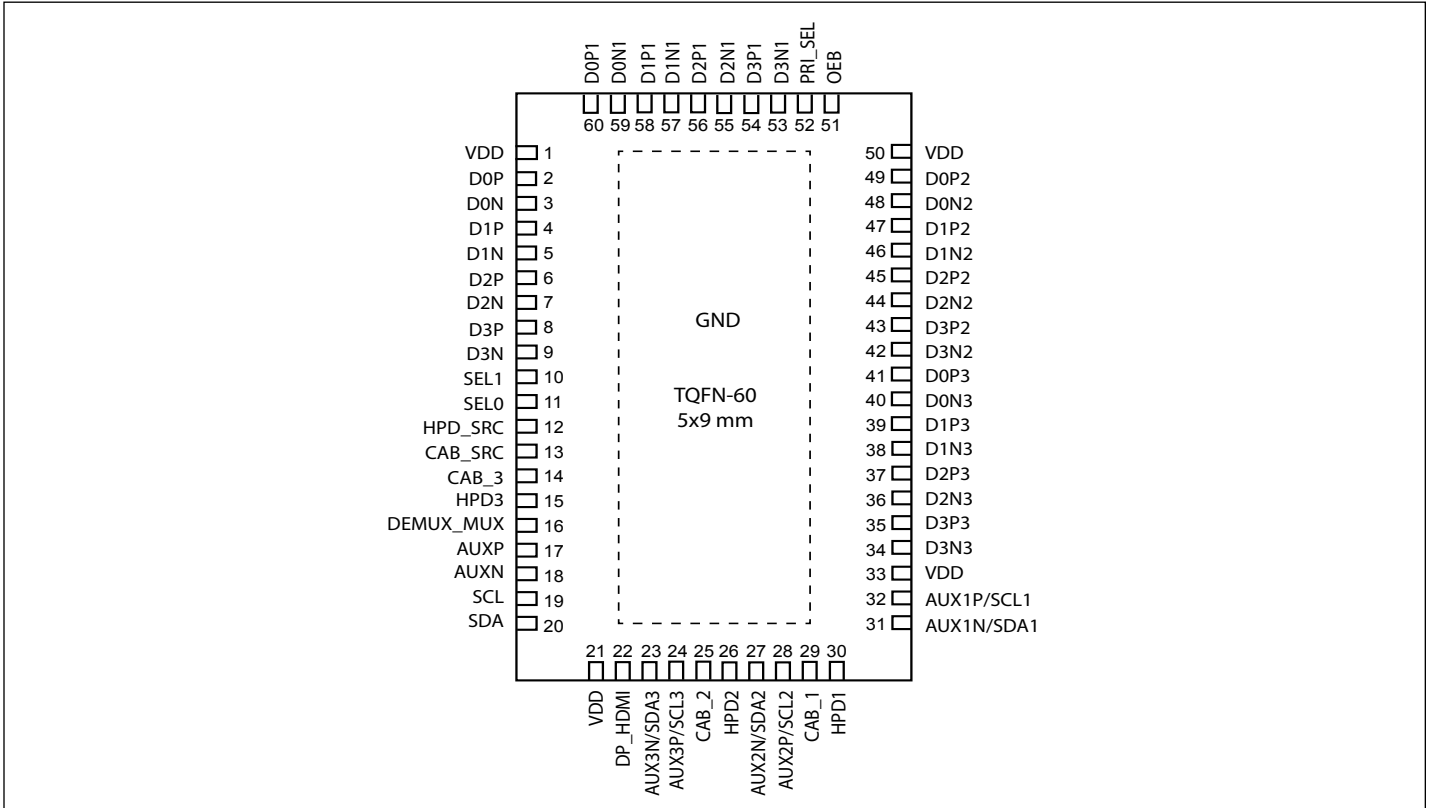

**Application**

- ➔ Notebook, Monitor, Switch box or TV sink application

**Block Diagram**

**Pin Configuration: TQFN-60**

**Note:** 1. The 120kΩ pull down resistor is not always on.

**Pin Description**

pin#	pin Name	Signal Type	Description
2, 4, 6, 8, 3, 5, 7, 9	D0P, D1P, D2P, D3P, D0N, D1N, D2N, D3N	IO	4 differential pair I/O (DP or HDMI)
60, 58, 56, 54, 59, 57, 55, 53	D0P1, D1P1, D2P1, D3P1, D0N1, D1N1, D2N1, D3N1	IO	4 differential pair I/O (DP or HDMI) for port 1
49, 47, 45, 43, 48, 46, 44, 42	D0P2, D1P2, D2P2, D3P2, D0N2, D1N2, D2N2, D3N2	IO	4 differential pair I/O (DP or HDMI) for port 2
41, 39, 37, 35, 40, 38, 36, 34	D0P3, D1P3, D2P3, D3P3, D0N3, D1N3, D2N3, D3N3	IO	4 differential pair I/O (DP or HDMI) for port 3

pin#	pin Name	Signal Type	Description
31, 27, 23, 32, 28, 24	AUX1N/SDA1, AUX2N/SDA2, AUX3N/SDA3, AUX1P/SCL1, AUX2P/SCL2, AUX3P/SCL3	IO	AUX (DP) or DDC (HDMI) input from three ports
18, 17	AUXN, AUXP	IO	AUX output
20, 19	SDA, SCL	IO	DDC output
30, 26, 15, 12	HPD1, HPD2, HPD3, HPD_SRC	IO	When DEMUX_MUX = low (1:3 DEMUX mode), HPD1_2_3 are inputs, HPD_SRC is output; When DEMUX_MUX = high (3:1 MUX mode), HPD1_2_3 are outputs, HPD_SRC is input
29, 25, 14, 13	CAB_1, CAB_2, CAB_3, CAB_SRC	IO	CAB_1, CAB_2, CAB_3, CAB_SRC
51	OEB	I	OEB=0, device active; OEB=1, device shut down
52	PRI_SEL	I	PRI_SEL is for priority selection as in priority-selection-table, but only for 1:3 DEMUX mode. PRI_SEL has internal 100K divider between VDD and GND for middle-state with VDD/2.
16	DEMUX_MUX	I	DEMUX_MUX is for HPD direction selection, see truth table
22	DP_HDMI	I	DP port or HDMI port, see truth table
11	SEL0	I	Port selection pins, see truth table
10	SEL1	I	Port selection pins, see truth table
1, 21, 33, 50	VDD	Power	3.3V VDD
Center Pad	GND	Ground	Bottom GND EPAD

### Pin mapping for dual mode DP source DEMUX to DP output

### Function Description

Default input format is DP. DP\_HDMI can select between DP or HDMI input.

In Demux mode, there are 120K pull down in HPD1/HPD2/HPD3 pins. In Mux mode, there is 120K pull down in HPD\_SRC pin.

Output port can be selected by manual or automatically in DEMUX mode.

Automatic port selection is done by detection of HPD presence from the output ports. If multiple HPD are detected, port selection depends on a priority scheme defined by PRI\_SEL pin. There can be 3 priority schemes. When PRI\_SEL=low, the port priority order is port1/port2/port3; when PRI\_SEL=high, the port priority order is port2/port3/port1; when PRI\_SEL=M (open), the port priority order is port3/port1/port2.

When port 1 or port 2 or port 3 is selected in DP application, and CAB=LOW, AUX/DDC input pins are now AUX channel. AUXP will have 100Kohm resistor to GND while AUXN will have 100Kohm resistor to VDD in external port side. Max. AUX data rate can be 720Mb/s. DDC switch inside is off.

When port 1 or port 2 or port 3 is active in dual mode DP or HDMI application, and CAB=HIGH, AUX/DDC input pins are now DDC channel. AUX switch inside is off, DDC switch is on. The DDC switch can support 5V input, and output Vpass is less than 3.3V limit.

HPD is CMOS buffer, and support 5v inputs. When used as DEMUX, There're 120kΩ pull-down resistors inside connected to HPD1, HPD2, HPD3 as input, and when used as MUX, 120k resistor connected to HPD\_SRC as input.

### Truth Table

DEMUX\_MUX

DEMUX_MUX	HPD_SRC	HPD1/2/3
0 (DEMUX)	output	input
1 (MUX)	input	output

M	1	x	0	D0P1	D1P1	D2P1	D3P1	D0N1	D1N1	D2N1	D3N1
M	0	1	0	D0P2	D1P2	D2P2	D3P2	D0N2	D1N2	D2N2	D3N2
M	x	x	1	D0P3	D1P3	D2P3	D3P3	D0N3	D1N3	D2N3	D3P3
1	0	0	0	Hi-Z	Hi-Z	Hi-Z	Hi-Z	Hi-Z	Hi-Z	Hi-Z	Hi-Z
1	1	0	0	D0P1	D1P1	D2P1	D3P1	D0N1	D1N1	D2N1	D3N1
1	x	1	x	D0P2	D1P2	D2P2	D3P2	D0N2	D1N2	D2N2	D3N2
1	x	0	1	D0P3	D1P3	D2P3	D3P3	D0N3	D1N3	D2N3	D3P3

Note: M= VDD/2 or open (with internal VDD/2)

Note: For priority selection control, when PRI\_SEL = 0, the order is port1/port2/port3; when PRI\_SEL = 1, the order is port2/port3/port1; when PRI\_SEL = M, the order is port3/port1/port2.

## Maximum Ratings

(Above which useful life may be impaired. For user guidelines not tested.)

Storage Temperature .....	-65°C to +150°C	<b>Note:</b> Stresses greater than those listed under MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
Supply Voltage to Ground Potential .....	-0.5V to +4.6V	
High Speed Channel Input Voltage (DP Mode).....	-0.5V to 2V	
High Speed Channel Input Voltage (HDMI Mode) .....	2.4V to 3.6V	
DDC and HPD channels Input Voltage .....	-0.5V to 6V	
DC Output Current .....	40mA	
Power Dissipation .....	0.2W	

## Electrical Characteristics

### Recommended Operation Conditions

$V_{DD} = 3.3V \pm 10\%$ , Min and Max apply for  $T_A$  between  $-40^\circ C$  to  $85^\circ C$  Typical values are referenced to  $T_A = 25^\circ C$

Parameter	Description	Test Conditions	Min.	Typ.	Max.	Unit
$V_{DD}$	Operating Voltage		3.0	3.3	3.6	V
$I_{DD}$	VDD supply current	$V_{DD}=3.3V$		1		mA
Istd	Supply current when OEB disable HDMI Mode	$V_{DD}=3.6V$ , OEB=high DP_HDMI=1		0.7		mA
	Supply current when OEB disable DP Mode	$V_{DD}=3.6V$ , OEB=high DP_HDMI=0		10		uA

#### IMPORTANT NOTICE

DIODES INCORPORATED MAKES NO WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, WITH REGARDS TO THIS DOCUMENT, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION).

Diodes Incorporated and its subsidiaries reserve the right to make modifications, enhancements, improvements, corrections or other changes without further notice to this document and any product described herein. Diodes Incorporated does not assume any liability arising out of the application or use of this document or any product described herein; neither does Diodes Incorporated convey any license under its patent or trademark rights, nor the rights of others. Any Customer or user of this document or products described herein in such applications shall assume all risks of such use and will agree to hold Diodes Incorporated and all the companies whose products are represented on Diodes Incorporated website, harmless against all damages.

Diodes Incorporated does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel.

Should Customers purchase or use Diodes Incorporated products for any unintended or unauthorized application, Customers shall indemnify and hold Diodes Incorporated and its representatives harmless against all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized application.

Products described herein may be covered by one or more United States, international or foreign patents pending. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks.

This document is written in English but may be translated into multiple languages for reference. Only the English version of this document is the final and definitive format released by Diodes Incorporated.

#### LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or

2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
