**Product Description**

Pericom Semiconductor's PI74SSTVF32852A logic circuit is produced using the Company's advanced sub-micron CMOS technology, achieving industry leading speed.

All inputs are compatible with the JEDEC standard for SSTL\_2, except the LVCMOS reset ( $\overline{\text{RESET}}$ ) input. All outputs are SSTL\_2, Class II compatible.

The device operates from a differential clock (CK and  $\overline{\text{CK}}$ ). Data registered at the crossing of CK going HIGH, and  $\overline{\text{CK}}$  going LOW.

The PI74SSTVF32852A supports low-power standby operation. When  $\overline{\text{RESET}}$  is LOW, the differential input receivers are disabled, and undriven (floating) data, clock and reference voltage ( $V_{\text{REF}}$ ) inputs are allowed. In addition, when  $\overline{\text{RESET}}$  is LOW, all registers are reset, and all outputs are forced LOW. The LVCMOS  $\overline{\text{RESET}}$  input must always be held at a valid logic HIGH or LOW level.

To ensure defined outputs from the register before a stable clock has been supplied,  $\overline{\text{RESET}}$  must be held in the LOW state during power up.

In the DDR DIMM application,  $\overline{\text{RESET}}$  is specified to be completely asynchronous with respect to CK and  $\overline{\text{CK}}$ . Therefore, no timing relationship can be guaranteed between the two. When entering  $\overline{\text{RESET}}$ , the register will be cleared and the outputs will be driven LOW quickly, relative to the time to disable the differential input receivers, thus ensuring no glitches on the output. However, when coming out of  $\overline{\text{RESET}}$ , the register will become active quickly, relative to the time to enable the differential input receivers. When the data inputs are LOW, and the clock is stable, during the time from the LOW-to-HIGH transition of  $\overline{\text{RESET}}$  until the input receivers are fully enabled, the design must ensure that the outputs will remain LOW.

Pericom's PI74SSTVF32852A is characterized for operation from 0° to 70°C.
