SIP PIN **SP-1A**

SP-1A-R1000 1000 PIECE ROLL

Now available in rolls of 1000 pieces these are the same SIP Pins used on our breadboard and adaptor products. When placed on boards of .031 in. thickness spring tension holds the pin in position for soldering. The entire pin and board pads are then fluxed and soldered by wave or dip method. For wave soldering fixtures may be needed to hold the assemblies in the proper position. After soldering the header is removed by shearing with lead shears or other suitable methods.
