Screenly Pro Hardware Bundle

This starter kit, in association with Screenly, offers Full HD video and images on your TV screens, powered by a single Raspberry Pi and the revolutionary Screenly software stack.

Screenly Pro is software that runs on the tiny Raspberry Pi credit card sized computer for an unbelievable price. From such a small package, Screenly delivers amazing performance. It'll play flawless full 1080p HD video, render web content and more. With Screenly and £60 worth of hardware, you can turn any modern TV or monitor into a vibrant digital sign. Screenly can be used for anything from displaying advertisement to live dashboards with system status and in-store infomercials. There is also a Screenly OSE (open source edition) version of this kit.

Description

Small cast. Big show. Screenly is Digital Signage made easy.

This starter kit, in association with Screenly, offers Full HD video and images on your TV screens, powered by a single Raspberry Pi and the revolutionary Screenly software stack.

Screenly is software that runs on the tiny Raspberry Pi credit card sized computer for an unbelievable price. From such a small package, Screenly delivers amazing performance. It'll play flawless full 1080p HD video, render web content and more. With Screenly and £60 worth of hardware, you can turn any modern TV or monitor into a vibrant digital sign. Screenly can be used for anything from displaying advertisement to live dashboards with system status and in-store infomercials.

With Screenly Pro you can manage all your screens from a feature-rich web administrator. You can create playlists for a single screen or for many, group screens into easy to handle units, or locate screens in need of servicing at a glance. Installation is as easy as it gets: plug in a few cables for each new node and you'll be up and running in minutes. You won't even need to bring a keyboard to the location of your screen.

For the first time, Pi Supply is working with Screenly as their preferred hardware distributor to provide the ideal kit that will come pre-loaded with Screenly's revolutionary software to bring its digital signage capabilities to your screens.

Each kit will come pre-assembled for your extra convenience, and will include...

- Raspberry Pi 3 Model B
- Shortcrust Plus Case
- HDMI Cable
- Power Supply of your choice (UK/EU/USA/AUS)
- 8GB Class 10 Samsung microSD Card preinstalled with Screenly Digital Signage Software Stack

Please Note: for large orders, please feel free to contact us directly for a bespoke quote and to discuss value added services such as case and packaging customisation.

For frequently asked questions about Screenly Pro, please visit the FAQ. These kits will typically ship one working day after your order (due to the need for SD card imaging) and for shipping time estimations please see our delivery information page.

Setting up Screenly

We have a selection of video tutorials to help you get started with Screenly Pro.

- How to install Screenly on your Raspberry Pi
- How to add assets to Screenly Pro
- How to create a screen group in Screenly Pro
- How to create a playlist in Screenly Pro
- How to open the Short Crust case
