Pi Supply

Screenly Software SD Cards - Pro and OSE

Screenly is a software package that runs on the tiny Raspberry Pi credit card sized computer for an unbelievable price. You can now purchase both the Pro and Open Source Editions of the Screenly software on a neat little micro SD card all on its own! From such a small package, Screenly delivers amazing performance. It'll play flawless full 1080p HD video, render web content and more. With Screenly, you can turn any modern TV or monitor into a vibrant digital sign. Screenly can be used for anything from displaying advertisement to live dashboards with system status and in-store infomercials. If you want to whole kits, you can pick up the Screenly Pro and Screenly OSE packages from us as well!
