Pi Supply

## Raspberry USB Nintendo NES Gamepad Controller for Raspberry Pi

Features Great for playing retro games on emulators,etc. Plug and play, no extra drivers needed. Play your old school games...

### Features

- Great for playing retro games on emulators,etc.
- Plug and play, no extra drivers needed.
- Play your old school games with authentic retro feel.
- Super sensitive buttons for precision control

## More Information

- The Kit is for computer Games Player. These Controllers are NOT compatible with the New Release NES Classic Edition
- Compatible with Win98/ME/2000/2003/XP/7/8/8.1/10, Also compatible with all Mac OS X and beyond.
- Generic USB controller, this uses a standard USB port, if your program or application accepts USB controller input, it can be used natively without drivers or patches, just plug and play. It works with any emulator you wish to download and use. Google SNES emulator and then the same for Roms.
- Third party controller, not original SNES / NES controller. But it works phenomenal with the Raspberry Pi game emulation and so on.
- Cale is approx 66.9 inch Long. Super sensitive buttons for precision control
