

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Pi Supply

BattBorg - Pi Battery Power Board (Unsoldered Kit)

The BattBorg is a plug and play power converter for your Raspberry Pi which allows you to power the Raspberry Pi with batteries! It's great for robot projects, or where you need to leave your Pi unmanned for extended periods without a wired power source (outside sensor projects etc.)

Description

The BattBorg uses a highly efficient (~90%) OKI78SR DCDC converter which has a maximum 1.5A output and, due to its efficiency, requires no heatsink. It will work with most batteries/battery packs that are between 7-36V so it's great for 12V car batteries, 8xAA battery packs, and so on.

BattBorg comes in several different kits. This purchase is for the Full Unsoldered Kit, which includes an unassembled BattBorg, one 8 x AA battery holder, and the cables to hook it all up. The BattBorg in this kit requires soldering (but you can do so in your own configuration!), then all you need is a Raspberry Pi, and batteries, and you're ready to roll!

BattBorg Features:

- Unsoldered Kit Includes:
 - Unassembled & Unsoldered BattBorg PCB
 - 8 x AA Battery Pack
 - 3 Pin Cable M/F Cable
 - PP3 Connector Cable
 - Mounting Pillar & Screw
- 5V 1.5A Max Output
- ~90% Efficient
- Compatible with battery packs (or batteries) between 7V - 36V
- Plugs into GPIO Pins 2, 4 & 6
- Up to 14 Hours Run-Time @ 15% Load (8 x AA Batteries)
- Compatible with Model A, B, A+, B+, 2, 3, Zero, ZeroW
