

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Night Light Soldering Kit /PPKIT4005

This fun little soldering kit contains all of the parts required to make a dark activated night light.

Using an LDR (Light dependent resistor) and an NPN transistor, the 5 white LEDs included in the kit will fade up and down depending on how dark the environment is.

We wanted to see if a box made from soldered together PCBs would be strong and work well, so we thought that a nice little USB powered night light would make a great project. We drew a nice geometric cube design to see how well our PCB manufacturer could route complex patterns and we were very impressed with the results. For the top of the lamp we decided on a different design and drew an angular spiral.

This kit is an intermediate kit, the hardest part is creating the box with the PCBs. You should be able to assemble this in 10 - 30 minutes with basic soldering skills.

Once assembled the lamp is powered using a micro USB cable (not included).

**Included:**

- 1 x Top PCB
- 1 x Base PCB
- 4 x Side PCBs
- 5 x White 5mm LEDs
- 5 x 270 Ohm resistors
- 1 x 39K Ohm resistor
- 1 x LDR
- 1 x USB power connector
- 1 x NPN - 2N3904 transistor

**Required:**

- Soldering Iron
- Solder
- Cutters
- An elastic band
- Micro USB cable
