Raspberry Pi Zero Camera Cable

PRT-14272

Description: The Raspberry Pi Zero and Zero W are both equipped with a smaller CSI (Camera Serial Interface) port than on a full-sized Raspberry Pi board — luckily, that's where this cable can help! The Raspberry Pi Zero Camera Cable replaces the pre-existing camera module cable, allowing your Zero or Zero W light and imaging capabilities.

This cable measures 15cm from end to end and can easily be swapped in and out.

Note: This product only includes the CSI cable and does **NOT** include a Raspberry Pi Camera Module. The module will need to be purchased separately.
