## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## DESCRIPTION

The PS9305L and PS9305L2 are optically coupled isolators containing a GaAIAs LED on the input side and a photo diode, a signal processing circuit and a power output transistor on the output side on one chip.

The PS9305L and PS9305L2 are designed specifically for high common mode transient immunity (CMR), high output current and high switching speed.

The PS9305L and PS9305L2 are suitable for driving IGBTs and MOS FETs.

## FEATURES

- Long creepage distance (8 mm MIN.)
- Large peak output current (2.5 A MAX., 2.0 A MIN.)
- High speed switching (tplh, tphl $=0.25 \mu \mathrm{~s}$ MAX.)
- UVLO (Under Voltage Lock Out) protection with hysteresis
- High common mode transient immunity (CMн, CML $= \pm 25 \mathrm{kV} / \mu \mathrm{s}$ MIN.)
- Embossed tape product: PS9305L-E3, PS9305L2-E3: 2000 pcs/reel
- Pb-Free product
- Safety standards
- UL approved: No. E72422
- CSA approved: No. CA 101391 (CA5A, CAN/CSA-C22. 2 60065, 60950)
- SEMKO approved: No. 1115598
- DIN EN60747-5-2 (VDE0884 Part2) approved: No. 40024069 (Option)

## APPLICATIONS

- IGBT, Power MOS FET Gate Driver
- Industrial inverter
- IH (Induction Heating)

PACKAGE DIMENSIONS (UNIT: mm)
Lead Bending Type (Gull-wing) for Surface Mount

Lead Bending Type (Gull-wing) for Long Clearance Distance (Surface Mount)

## PHOTOCOUPLER CONSTRUCTION

| Parameter | PS9305L | PS9305L2 |
| :--- | :---: | :---: |
| Air Distance (MIN.) | 7 mm | 8 mm |
| Outer Creepage Distance (MIN.) | 8 mm | 8 mm |
| Isolation Distance (MIN.) | 0.4 mm | 0.4 mm |

## NOTES ON HANDLING

## 1. Recommended soldering conditions

## (1) Infrared reflow soldering

- Peak reflow temperature
- Time of peak reflow temperature
- Time of temperature higher than $220^{\circ} \mathrm{C}$
$260^{\circ} \mathrm{C}$ or below (package surface temperature)
- Time to preheat temperature from 120 to $180^{\circ} \mathrm{C}$
- Number of reflows
- Flux

10 seconds or less
60 seconds or less
$120 \pm 30 \mathrm{~s}$
Three
Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)

Recommended Temperature Profile of Infrared Reflow

## (2) Wave soldering

- Temperature
$260^{\circ} \mathrm{C}$ or below (molten solder temperature)
- Time

10 seconds or less

- Preheating conditions
$120^{\circ} \mathrm{C}$ or below (package surface temperature)
- Number of times
- Flux

One (Allowed to be dipped in solder including plastic mold portion.)
Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)

## (3) Soldering by Soldering Iron

- Peak Temperature (lead part temperature) $350^{\circ} \mathrm{C}$ or below
- Time (each pins) 3 seconds or less
- Flux Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)
(a) Soldering of leads should be made at the point 1.5 to 2.0 mm from the root of the lead

## (4) Cautions

- Fluxes

Avoid removing the residual flux with freon-based and chlorine-based cleaning solvent.

## 2. Cautions regarding noise

Be aware that when voltage is applied suddenly between the photocoupler's input and output at startup, the output transistor may enter the on state, even if the voltage is within the absolute maximum ratings.

## USAGE CAUTIONS

1. This product is weak for static electricity by designed with high-speed integrated circuit so protect against static electricity when handling.
2. Board designing
(1) By-pass capacitor of more than $0.1 \mu \mathrm{~F}$ is used between Vcc and GND near device. Also, ensure that the distance between the leads of the photocoupler and capacitor is no more than 10 mm .
(2) When designing the printed wiring board, ensure that the pattern of the IGBT collectors/emitters is not too close to the input block pattern of the photocoupler.
If the pattern is too close to the input block and coupling occurs, a sudden fluctuation in the voltage on the IGBT output side might affect the photocoupler's LED input, leading to malfunction or degradation of characteristics. (If the pattern needs to be close to the input block, to prevent the LED from lighting during the off state due to the abovementioned coupling, design the input-side circuit so that the bias of the LED is reversed, within the range of the recommended operating conditions, and be sure to thoroughly evaluate operation.)
(3) Pin 4 (which is an $N C^{* 1}$ pin) can either be connected directly to the GND pin on the LED side or left open.

Unconnected pins should not be used as a bypass for signals or for any other similar purpose because this may degrade the internal noise environment of the device.
*1 NC: Non-Connection (No Connection)
3. Make sure the rise/fall time of the forward current is $0.5 \mu$ s or less.
4. In order to avoid malfunctions, make sure the rise/fall slope of the supply voltage is $3 \mathrm{~V} / \mu \mathrm{s}$ or less.
5. Avoid storage at a high temperature and high humidity.

## Notice

4. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
5. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
6. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
7. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
8. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
9. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
10. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
"Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
"Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
11. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
12. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer sofftware alone is very difificult, please evaluate the safety of the final products or system manufactured by you.
13. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
14. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
15. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries, (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.
(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
