OSHA 29 CFR § 1910.145

Traditional OSHA-style signs and labels are the most widely recognized design format in industry. They use upper case lettering, and the message is generally centered underneath the header. This standardized sign format continues today to be the choice for selecting messages in safety signs.

ANSI Z535

Newer ANSI-style signs and labels are gaining in popularity and are recognized by OSHA as an acceptable safety notification device. Signs often include a visual alert symbol (triangle with an exclamation point!), a large symbol, and left-justified upper and lower case message lettering. These signs are clearly visible and provide concise safety alert messages.

Choose the Right Stock Material

Your facility signs are used indoors and outdoors, in ordinary conditions or extreme. We offer materials to match your needs. Select a material based upon your application requirements to ensure your message is conveyed clearly and effectively.

Every sign we make is American-made and skillfully crafted with quality in mind. Our stock signs are available in a variety of materials and printed with technologically advanced inks. With many materials featuring no-hassle extended guarantees, your printed sign will continue to notify and alert employees for years. For additional information, please give us a call.

What is my sign printed on and will it last?

Along with looking great, your sign should last as long as it's needed. The material depends on where your sign is going to be displayed.
