Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

DC-DC CONVERTERS POLA Non-isolated

- 6 A output current
- 3.3 V input voltage
- Wide-output voltage adjust (0.8 Vdc to 2.5 Vdc)
- Auto-track[™] sequencing^{*}
- Pre-bias start-up capability
- Efficiencies up to 94%
- Output ON/OFF inhibit
- Output voltage sense
- Point-of-Load-Alliance (POLA) compatible
- Available RoHS compliant

The PTH03050 is a next generation series of non-isolated dc-dc converters offering some of the most advanced POL features available in the industry. The primary new feature provides for sequencing between multiple modules, a function, which is becoming a necessity for powering advanced silicon including DSP's, FPGA's and ASIC's requiring controlled power-up and power-down. Other industry leading features include pre-bias start-up capability and efficiencies up to 94%. The PTH03050 has an input voltage of 2.95 Vdc to 3.65 Vdc and offers a wide 0.8 Vdc to 2.5 Vdc output voltage range with up to 6 A output current, which allows for maximum design flexibility and a pathway for future upgrades.

All specifications are typical at nominal input, full load at 25 °C unless otherwise stated C_{in} = 100 μ F, C_{out} = 0 μ F

Notes

- Remote ON/OFF. Positive Logic 1
- ON: Pin 3 open; or V > Vin - 0.5 V
- Pin 3 GND; or V < 0.8 V (min 0.2 V). OFE
- See Figure 1 for safe operating curve.
- A 100 µF electrolytic input capacitor is required for proper operation. The 3 capacitor must be rated for a minimum of 300 mA rms of ripple current.
- 4 An external output capacitor is not required for basic operation. Adding 100 μ F of distributed capacitance at the load will improve the transient response.
- 1 A/µs load step, 50 to 100% I_{omax} , $C_{out} = 100 \,\mu\text{F}$. If utilized Vout will track applied voltage by ±0.3 V (up to Vo set point). 6 The pre-bias start-up feature is not compatible with Auto-Track[™]. This is because when the module is under Auto-Track[™] control, it is fully active and will sink current if the output voltage is below that of a back-feeding source. Therefore to ensure a pre-bias hold-off, one of the following two techniques must be followed when input power is first applied to the module. The Auto-Track[™] function must either be disabled, or the module's output held off using the Inhibit pin. Refer to Application Note 153 for more details.
- Tape and reel packaging only available on the surface-mount versions.
- To order Pb-free (RoHS compatible) surface-mount parts replace the mounting option 'S' with 'Z', e.g. PTH03050WAZ. To order Pb-free (RoHS compatible) through-hole parts replace the mounting option 'H' with 'D', e.g. PTH03050WAD.
- 10 NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at http://www.artesyn.com/powergroup/products.htm to find a suitable alternative.
