

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

PUSB3F99

ESD protection for ultra high-speed interfaces

Rev. 1 — 15 December 2017

Product data sheet

1 Product profile

1.1 General description

The device is designed to protect high-speed interfaces such as SuperSpeed USB, High-Definition Multimedia Interface (HDMI), DisplayPort, external Serial Advanced Technology Attachment (eSATA) and Low Voltage Differential Signaling (LVDS) interfaces against ElectroStatic Discharge (ESD).

The device includes four high-level ESD protection diode structures for ultra high-speed signal lines and is encapsulated in a leadless small DFN2510A-10 (SOT1176-1) plastic package.

All signal lines are protected by a special diode configuration offering ultra low line capacitance of only 0.5 pF. These diodes utilize a unique snap-back structure in order to provide protection to downstream components from ESD voltages up to ± 10 kV contact exceeding IEC 61000-4-2, level 4.

1.2 Features and benefits

- System ESD protection for USB 2.0 and SuperSpeed USB 3.1, HDMI 2.0, DisplayPort, eSATA and LVDS
- All signal lines with integrated rail-to-rail clamping diodes for downstream ESD protection of ± 10 kV exceeding IEC 61000-4-2, level 4
- Matched 0.5 mm trace spacing
- Signal lines with ≤ 0.05 pF matching capacitance between signal pairs
- Line capacitance of only 0.5 pF for each channel
- Design-friendly 'pass-through' signal routing

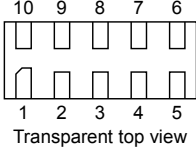

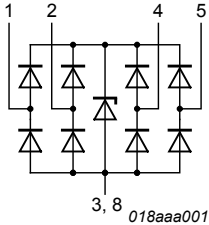

1.3 Applications

The device is designed for high-speed receiver and transmitter port protection:

- TVs and monitors
- DVD recorders and players
- Notebooks, main board graphic cards and ports
- Set-top boxes and game consoles

2 Pinning information

Table 1. Pinning

Pin	Symbol	Description	Simplified outline	Graphic symbol
1	CH1	channel 1 ESD protection		
2	CH2	channel 2 ESD protection		
3	GND	ground		
4	CH3	channel 3 ESD protection		
5	CH4	channel 4 ESD protection		
6	n.c.	not connected		
7	n.c.	not connected		
8	GND	ground		
9	n.c.	not connected		
10	n.c.	not connected		

3 Ordering information

Table 2. Ordering information

Type number	Package		Version
	Name	Description	
PUSB3F99	DFN2510A-10	plastic extremely thin small outline package; no leads; 10 terminals; body 1 × 2.5 × 0.5 mm	SOT1176-1

4 Marking

Table 3. Marking codes

Type number	Marking code
PUSB3F99	96

5 Limiting values

Table 4. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

Symbol	Parameter	Conditions	Min	Max	Unit	
V_I	input voltage		-0.5	+3.3	V	
V_{ESD}	electrostatic discharge voltage	IEC 61000-4-2, level 4	[1]			
		• contact discharge		-10	+10	kV
		• air discharge		-15	+15	kV
T_{amb}	ambient temperature		-40	+85	°C	
T_{stg}	storage temperature		-55	+125	°C	

[1] All pins to ground.

6 Characteristics

Table 5. Characteristics

$T_{amb} = 25\text{ °C}$ unless otherwise specified.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
V_{BR}	breakdown voltage	$I_I = 1\text{ mA}$	6	-	-	V
I_{LR}	reverse leakage current	per channel; $V_I = 3\text{ V}$	-	-	1	μA
V_F	forward voltage	$I_I = 1\text{ mA}$	-	0.7	-	V
C_{line}	line capacitance	$f = 1\text{ MHz}$; $V_I = 3.3\text{ V}$	[1]	0.5	0.6	pF
ΔC_{line}	line capacitance difference	$f = 1\text{ MHz}$; $V_I = 3.3\text{ V}$	[1]	0.05	-	pF
r_{dyn}	dynamic resistance	surge	[2]			
		• positive transient		0.41	-	Ω
		• negative transient		0.26	-	Ω
		TLP	[3]			
		• positive transient		0.43	-	Ω
• negative transient		0.28	-	Ω		
V_{CL}	clamping voltage	$I_{PP} = 5.2\text{ A}$	[2]			
		• positive transient		4.6	-	V
		$I_{PP} = -4.4\text{ A}$	[2]			
• negative transient		-	-2.2	-	V	

[1] This parameter is guaranteed by design.

[2] According to IEC 61000-4-5 (8/20 μs current waveform).

[3] 100 ns Transmission Line Pulse (TLP); 50 Ω ; pulser at 80 ns.

IEC 61000-4-5; $t_p = 8/20 \mu s$; negative pulse

Figure 12. Dynamic resistance with negative clamping; typical values

$t_p = 100 \text{ ns}$; Transmission Line Pulse (TLP)

Figure 13. Dynamic resistance with positive clamping; typical values

$t_p = 100 \text{ ns}$; Transmission Line Pulse (TLP)

Figure 14. Dynamic resistance with negative clamping; typical values

The device uses an advanced clamping structure showing a negative dynamic resistance. This snap-back behavior strongly reduces the clamping voltage to the system behind the ESD protection during an ESD event. Do not connect unlimited DC current sources to the data lines to avoid keeping the ESD protection device in snap-back state after exceeding breakdown voltage (due to an ESD pulse for instance).

7 Application information

The device is designed to provide high-level ESD protection for high-speed serial data buses such as HDMI, DisplayPort, eSATA and LVDS data lines.

When designing the Printed-Circuit Board (PCB), give careful consideration to impedance matching and signal coupling. Do not connect the signal lines to unlimited current sources like, for example, a battery.
