

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Rectangular, High-Pin-Count Rack/Panel **Insulation Displacement Connectors (IDC)**

QR/P18 Series

Overview

The QR/P18 Series of miniature rack/panel connectors is designed for the complete segmentation of the structure of the external holder/terminal units of the well-received QR/P Series of plug-in rectangular rack/ panel connectors; furthermore, the subsequent insertion of the harnessed terminal unit affords a more efficient harness mounting task. These connectors are configured with 12, 18, or 24 pos.(IDC) in the signal line, and 4 pos.(crimp) in the power line.

■Features

1. Completely separated structure of the external holder/terminal unit

In order to improve the harness procedures, the connectors are designed for the complete segmentation of the external holder and the signal/ power supply unit, and inserting the harnessed contacts aims to improve the workability of the power supply/signal line harness as well as the mounting to the set.

2. Signal unit

The signal unit uses the highly reliable insulation displacement connection method. (The wire is AWG #26 and the insulation outter diameter is 0.88 mm.) The insulation displacement procedure can now be used by attaching a special applicator to a commercially available automatic insulation displacement machine, or a manual press tool can also be selected.

3. Power supply

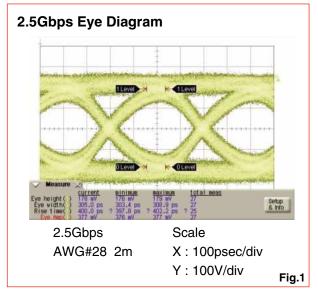

The power supply terminals permit the use of a crimp harness using wire of AWG#16 to 18 (and insulation outside diameter of 2.1 to 2.2 mm), and can accommodate a maximum of 12 A.

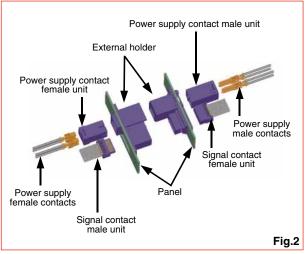

4. Sequential mating structure

Two sequential contacts in the signal male unit and one sequential contact in the power supply female unit are provided for safety operation.

5. Panel installation

Installation to a panel uses a single-action method on the anchored side and a floating screw structure on the floating side which permits smooth insertion and disconnection without forcing.

■Product Specifications

| Ratings | Voltage rating | 125V AC (Signal contacts) 300V AC (Power contacts) | Operating temperature range | -40°C to +105°C |
|----------|----------------|---|-----------------------------|-----------------|
| natiliys | Current rating | 1A (Signal contacts) 12A (Power contacts) | Operating temperature range | (Note 1) |

| Item | Specification | Conditions |
|------------------------------------|--|--|
| 1. Contact resistance | 50 m Ω max. (Signal contacts) (Note 2) 10 m Ω max. (Power contacts) (Note 2) | 100mA MAX (DC or 1000Hz) |
| 2. Insulation resistance | 1000M Ω min. (Signal contacts) 5000M Ω min. (Power contacts) | 500V DC |
| 3. Withstanding Voltage | No flashover or insulation breakdown. | 500V AC / one minute |
| 4. Durability (mating / un-mating) | Contact resistance: $70m\Omega$ max. (Signal contacts) $20m\Omega$ max. (Power contacts) | 3000 cycles |
| 5. Vibration | No electrical discontinuity of 10μ s or more. | Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 axis. |
| 6. Shock | No damage, cracks or parts dislocation. | Acceleration of 490 m/s ² , 11 ms duration, sine half- wave waveform, 3 cycles in each of the 3 axis |
| 7. Temperature cycle | Contact resistance: $70m\Omega$ max. (Signal contacts) $20m\Omega$ max. (Power contacts) No damage, cracks or parts dislocation. | Temperature: $-55^{\circ}\text{C} \rightarrow +5 \text{ to } +35^{\circ}\text{C} \rightarrow +105^{\circ}\text{C} \rightarrow +5^{\circ}\text{C to } +35^{\circ}\text{C}$ Time: $30 \rightarrow 5 \rightarrow 30 \rightarrow 5$ (Minutes) 5 cycles |
| 8. Humidity (Steady state) | Insulation resistance: $100M\Omega$ min. (Signal contacts, state) $3000M\Omega$ min. (Power contacts, state) No damage, cracks or parts dislocation. | 96 hours at 40°C and RH 90% to 95% |
| 9. Salt mist | No HEAVY corrosions. | 5% salt water solution for 48 hours |

Note1: Includes temperature rise caused by current flow.

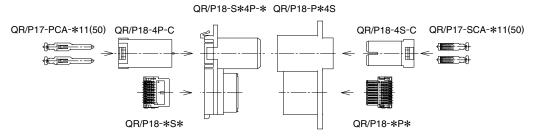

Note2: Excludes wire conductor resistance.

■Materials

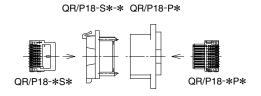

| Product | Components | Material | Finish | Remarks | |
|-----------------------|-----------------|-----------------|---------------------------------|-------------|--|
| External holder | Insulator | PBT | | - UL94V-0 | |
| | Insulator | PA | | | |
| Signal contact unit | Female contacts | Phosphor bronze | Gold plated | | |
| | Male contacts | Phosphor bronze | Gold plated | | |
| Power contact unit | Insulator | PBT | | UL94V-0 | |
| Dower cumby contacts | Female contacts | Copper alloy | Cold plated Tip copper plated | | |
| Power supply contacts | Male contacts | Copper alloy | Gold plated + Tin copper plated | | |

◆Inspection After Cable Wiring

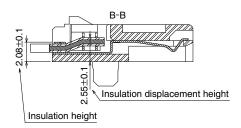

Signal contact unit

QR/P18-[]P[] Cable 0~0.5 Cable end position

Signal contact unit (male)

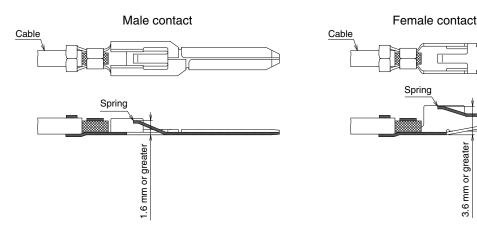

3.6 mm or greater

- (1) After wiring the cable, examine the cable end position, the insulation displacement height, and the insulation height.
- (2) In examining the insulation displacement height and the insulation height, use a measurement pin having a tip of 0.5 mm diameter.
- (3) For information about the detailed inspection method, please request the "Inspection Standards Manual" from Hirose Electric.
- (4) The inspection method of the diagrams is for cable with AWG#26 wire and an insulation outside diameter of 0.88 mm.
