# RASPBERRY PI STARTER KITS

Very early on, we decided that we would offer the bare-bones Raspberry Pi board without accessories: that way, cost-conscious customers get the lowest possible price, provided they can beg or borrow USB peripherals, a power supply and an SD card. Over the years, Raspberry Pi distributors have built on this, producing some fantastic bundles for people who would rather get everything they need from a single source.

To celebrate the ten millionth Raspberry Pi, for the first time we've put together our own idea of what the perfect bundle would look like, creating the official **Raspberry Pi Starter Kit**.

Inside the minimalist white box (like the official case, another beautiful Kinner Dufort design), you'll find:

- A Raspberry Pi 3 Model B
- An 8GB NOOBS SD card
- An official case
- An official 2.5A multi-region power supply
- An official 1m HDMI cable
- An optical mouse and a keyboard with high-quality scissor-switch action
- A copy of Adventures in Raspberry Pi Foundation Edition

This is an unashamedly premium product: the latest Raspberry Pi, official accessories, the best USB peripherals we could find, and a copy of the highest-rated Raspberry Pi book.
