

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## SPECIFICATION

Part Number:	<b>RG.02.01.3000W</b>
Product Name:	Road Marker Kit - Quad Band Cellular Antenna RG.01 with CAB.826 Cable Assembly AMPS/GSM/PCS/DCS 850/900/1800/1900
Features:	Low Profile - Diameter 101.4 mm*Height 17.6 mm UV and Vandal resistant ABS housing RG.01: 1.5M WY-100 cable SMB(M) Jack CAB.826: 1.5M WY-100 SMB(F) to SMA(M)ST <b>RoHS Compliant</b>

## 1. Introduction

Taoglas USA has designed a range of efficient antennas inside US standard raised non-reflective road markers. These are designed for, and installed inside, the low profile "Bott's dots" that can be mounted directly on the pavement and road in the USA.

These antennas exhibit remarkably high efficiencies in such small packages and live in a very low profile enclosure. They are designed to be mounted directly on the road or pavement, just like a standard road marker.

These antennas have been potted with the epoxy that is traditionally used to secure the road marker itself to the ground. There are no air gaps whatsoever inside the new type approved road marker with antenna, in order to maintain the mechanical integrity. It is presumed that the standard black epoxy will also be used to install the road marker in its final resting place on the ground.

The CAB.826 cable assembly is included so the antenna cable can be easily disconnected if desired.

## 2. Specification

ELECTRICAL				
Band	AMPS	GSM	DCS	PCS
Frequency (MHz)	824-894	880-960	1710-1880	1850-1990
Polarization	Linear			
Impedance (Ohms)	50 Ohms			
Peak Gain (dBi)	2.5	2.5	1	0.6
Efficiency (%)	30	28	18	18
Return Loss (dB)	-18	-18	-18	-16
Radiation Properties	Omni-directional			
Max Input Power (Watts)	10			
MECHANICAL				
Dimensions	Height = 17.6 mm and Diameter = 101.4 mm			
Cable	WY-100 Coaxial Cable			
Connector	Fully Customizable			
Casing	UV Resistant PP			
Sealant	Potting			
ENVIRONMENTAL				
Protection	IP67			
Corrosion	5% NaCl for 96hrs			
Temperature Range	-40°C to +85°C			
Thermal Shock	100 cycles -40°C to +85°C			
Humidity	Non-condensing 65°C 95% RH			
Shock (Drop Test)	1m drop on concrete 6 axes			
Cable Pull	8 Kgf			

### 3. Test Set Up

**Figure 1.** Impedance (left hand), peak gain, efficiency, and radiation pattern measurements (right hand).

\* The Cellular Road Marker antenna performance was measured on a piece of concrete, 90 mm thickness.

## 4. Antenna Parameters

### 4.1. Return Loss

Figure 2. Return Loss Road Marker in Free Space and on a Piece of Road (Concrete).

### 4.2. Efficiency

Figure 3. Efficiency Road Marker in Free Space and on a Piece of Road (Concrete).

### 4.3. Peak Gain

**Figure 4.** Peak Gain Road Marker in Free Space and on a Piece of Road (Concrete).

### 4.4. Radiation Pattern

**Figure 5.** Cellular Road Marker radiation pattern at 849 MHz on Piece of Road (Concrete).

**Figure 6.** Cellular Road Marker radiation pattern at 940 MHz on Piece of Road (Concrete).

**Figure 7.** Cellular Road Marker radiation pattern at 1840 MHz on Piece of Road (Concrete).

**Figure 8.** Cellular Road Marker radiation pattern at 1950 MHz on Piece of Road (Concrete).

**Figure 9.** Cellular Road Marker radiation pattern at 849 MHz in Free Space.

**Figure 10.** Cellular Road Marker radiation pattern at 940 MHz in Free Space.

**Figure 11.** Cellular Road Marker radiation pattern at 1840 MHz in Free Space.

**Figure 12.** Cellular Road Marker radiation pattern at 1940 MHz in Free Space.
