

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SPECIFICATION

Part Number: **RI.02.01.3000W**

Product Name: 915MHz oad Marker Kit - Quad Band Cellular Antenna RI.01 with CAB.826 Cable Assembly

Features: Low Profile - Diameter 101.4mm*Height 17.6 mm
UV and Vandal resistant PP housing
RI.01: 1.5M WY-100 cable SMB(M) Jack
CAB.826: 1.5M WY-100 SMB(F) to SMA(M)ST

RoHS Compliant

Side Profile

1. Introduction

Taoglas USA has designed a range of efficient antennas inside US standard raised non reflective roadmarkers. These are designed for, and installed inside, the low profile “Bott’s dots” that can to be mounted directly on the pavement and road in the USA.

These antennas exhibit remarkably high efficiencies in such small packages and live in a very low profile enclosure. They are designed to be mounted directly on the road or pavement, just like a standard roadmarker.

These antennas have been potted with the epoxy that is traditionally used to secure the roadmarker itself to the ground. There are no air gaps whatsoever inside the new type approved roadmarker with antenna, in order to maintain the mechanical integrity. It is presumed that the standard black epoxy will also be used to install the roadmarker in its final resting place on the ground.

The CAB.826 cable assembly is included so the antenna cable can be easily disconnected if desired. This is useful if the antenna is mounted on a movable area, as the cable will split at the push-pull connectors, preventing damage to the cable.

2. Specification

ELECTRICAL	
Band	915 MHz ISM
Frequency (MHz)	902-928
Polarization	Linear
Impedance (Ohms)	50 Ohms
Peak Gain (dBi)	3.2
Efficiency (%)	26
Return Loss (dB)	-18
Radiation Properties	Omni-directional
Max Input Power (Watts)	10
MECHANICAL	
Dimensions	Height = 17.6 mm and Diameter = 101.4mm
Cable	WY100 Coaxial cable
Connector	SMB (M) Jack Straight 50 Ohms
Casing	UV Resistant PP
Sealant	Potting
ENVIRONMENTAL	
Protection	IP67
Corrosion	5% NaCl for 96hrs
Temperature Range	-40°C to +85°C
Thermal Shock	100 cycles -40°C to +85°C
Humidity	Non-condensing 65°C 95% RH
Shock (Drop Test)	1m drop on concrete 6 axes
Cable Pull	8 Kgf
