

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SWITCHCTAFT® RMAS8 & RMAS8PRO Dual Transformer Isolated Audio Splitters

FEATURES:

- -8 input, 24 output dual transformer isolated audio splitter.
- -8 Switchcraft® front panel XLR inputs.
- -Line level pad on each channel.
- -Two ground lift toggle switches on each channel (1 for each transformer isolated output).
- -4 DB25 connectors (TASCAM pinout) to accommodate all of the units I/O's.
- -Additional set of I/O connections utilizing Euro style terminal blocks (RMAS8PRO Only).
- -JENSEN magnetically shielded (MU Metal) dual isolated audio transformers (RMAS8PRO Only).

New from Switchcraft®...

The RMAS8 and RMAS8 PRO are 8 input, 24 output (3-way) dual transformer isolated audio splitters. Both units feature 8 Switchcraft® XLR front panel inputs, each with a line level pad and two ground lift toggle switches (1 for each transformer isolated output). On the back, 4 DB25 connectors wired to the TASCAM DTRS standard pinout can be used to accommodate all of the units I/O's. Additionally, the RMAS8PRO features JENSEN magnetically shielded (MU Metal) dual isolated audio transformers and has a third set of Euro style terminal blocks.

RMASS & RMASSPRO Dual Transformer Isolated Audio Splitters

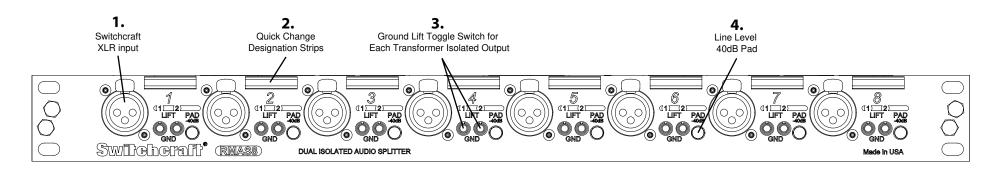

RMAS8PRO

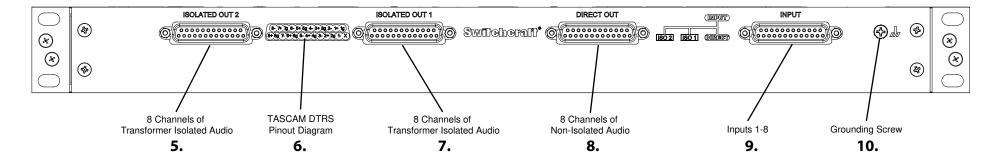

The RMAS8 is an 8 input, 24 output dual transformer isolated audio splitter. It features 8 Switchcraft® XLR inputs on the front, each with a line level pad and two ground lift toggle switches (1 for each transformer isolated output). On the back, 4 DB25 connectors wired to the TASCAM DTRS standard pinout can be used to accommodate all of the units I/O's.

- Premium grade Switchcraft® XLR inputs for front panel connection of individual audio signals.
- Quick change designation strips are used to create and modify custom channel labeling for each input.
- High quality toggle switches allow you to connect or isolate (lift) the ground connection for either of each channel's transformer isolated outputs.
- Line level (40dB) pad switch (for isolated outputs only) helps prevent transformer saturation from line level signals.
- 5. Second set of eight transformer isolated audio outputs.
- TASCAM DTRS pinout diagram for all DB25 inputs and outputs.

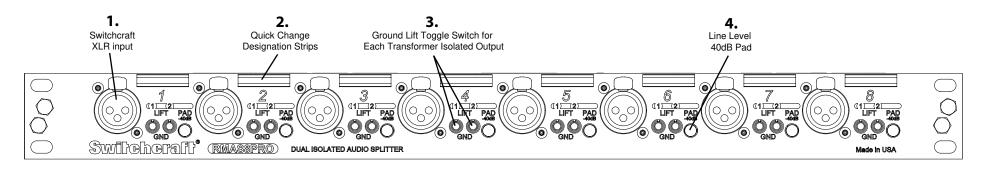

- First set of eight transformer isolated audio outputs.
- 8. Eight direct outputs with grounds permanently connected. It is necessary to use this output for powering phantom powered microphones.
- DB25 inputs 1-8. These can be used instead of, but not along with the front panel XLR inputs.

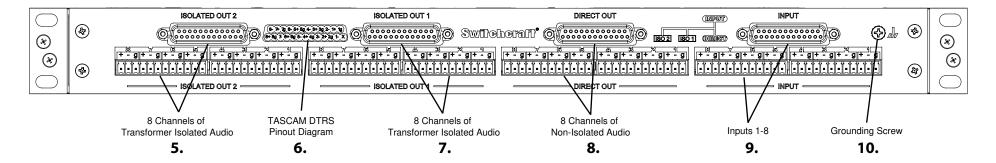

10. Chassis ground connection point.

The RMAS8*PRO* is an 8 input, 24 output dual transformer isolated audio splitter. It features 8 Switchcraft® XLR inputs on the front, each with a line level pad and two ground lift toggle switches (1 for each transformer isolated output). On the back, 4 DB25 connectors wired to the TASCAM DTRS pinout can be used to accommodate all of the units I/O's. Additionally, the RMAS8*PRO* features JENSEN magnetically shielded (MU Metal) dual isolated audio transformers and has a third set of Euro style terminal block I/O's.

- Premium grade Switchcraft® XLR inputs for front panel connection of individual audio signals.
- Quick change designation strips are used to create and modify custom channel labeling for each input.
- High quality toggle switches allow you to connect or isolate (lift) the ground connection for either of each channel's transformer isolated outputs.
- Line level (40dB) pad switch (for isolated outputs only) helps prevent transformer saturation from line level signals.
- Second set of eight transformer isolated audio outputs.
- 6. TASCAM DTRS pinout diagram for all DB25 inputs and outputs.

- First set of eight transformer isolated audio outputs.
- 8. Eight direct outputs with grounds permanently connected. It is necessary to use this output for powering phantom powered microphones.
- DB25/Euro block inputs 1-8.
 Either the DB25 or Euro block inputs can be used instead of, but not along with the front panel XLR inputs.

10. Chassis ground connection point.
