imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Features

Unregulated

Converters

- 6V Output for GaN driver applications
- Pot-Core transformer with separated windings
- High 5.2kVDC isolation In compact Size
 - Low isolation capacitance (10pF max.)
 - UL and EN certified

Description

High slew rate GaN transistor drivers require an isolated 6V supply with high isolation voltage and low isolation capacitance.

The RP-xx06S series have been specially designed to fulfill this demanding requirement with 5200VDC isolation and <10pF isolation capacitance. The internal transformer uses a pot-core to physically separate the input and output windings, yet the converter still fits into an industry standard SIP7 case. Input voltage options of 5, 12, 15 or 24V are available and the RP-xx06S series is safety certified to the latest UL/IEC60950 standard.

Selection Guide

Part Number	nom. Input Voltage [VDC]	Output Voltage [VDC]	Output Current [mA]	Efficiency typ. ⁽¹⁾ [%]	max. Capacitive Load ⁽²⁾ [μF]
RP-0506S	5	6	167	81	1000
RP-1206S	12	6	167	77	1000
RP-1506S	15	6	167	83	1000
RP-2406S	24	6	167	82	1000

Notes:

Note1: Efficiency is tested at nominal input and full load at +25°C ambient Note2: Max. Cap. Load is tested at nominal input and full resistive load
