- Power Switching Circuits

50A, 600V Ultrafast Rectifier

The RURG5060-F085 is an ultrafast diode with soft recovery characteristics ($t_{rr}< 90\text{ns}$). It has low forward voltage drop and is silicon nitride passivated ion-implanted epitaxial planar construction.

This device is intended for use as a freewheeling/clamping diode and rectifier in a variety of switching power supplies and other power switching applications. Its low stored charge and ultrafast recovery with soft recovery characteristic minimizes ringing and electrical noise in many power switching circuits, thus reducing power loss in the switching transistors.
