![Chipsmall logo]

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

TEMPERATURE SWITCH IC (THERMOSTAT IC)

Rev.2.2_01

The S-5841 Series is a temperature switch IC (thermostat IC) which detects the temperature with a temperature accuracy of ±2.5°C. The output inverts when temperature reaches the detection temperature. The S-5841 Series restores the output voltage when the temperature drops to the level of release temperature.

The S-5841 Series operates at the lower power supply voltage of 2.2 V and its current consumption is 10 μA typ. due to CMOS configuration.

A temperature sensor with the negative temperature coefficient, a reference voltage generation circuit, a comparator and a delay circuit are integrated on one chip, and enclosed into the packages SOT-23-5 and SNT-6A.

■ Features

- Detection temperature: T_{DET} = +40°C to +100°C, +1°C step, detection accuracy: ±2.5°C
- Low voltage operation: V_{DD} = 2.2 V min.
  (Detection temperature = +55°C to +100°C, Ta = −40°C to +100°C)
- Low current consumption: I_{DD} = 10 μA typ. (Ta = +25°C)
- Hysteresis temperature can be switched in 0°C, 2°C, 4°C and 10°C.
- Selectable output logic in active "H" or "L"
- Selectable output form in CMOS or Nch open drain
- Operation temperature range: Ta = −40°C to +125°C
- Lead-free, Sn 100%, halogen-free[1]

    [1]. Refer to "■ **Product Name Structure**" for details.
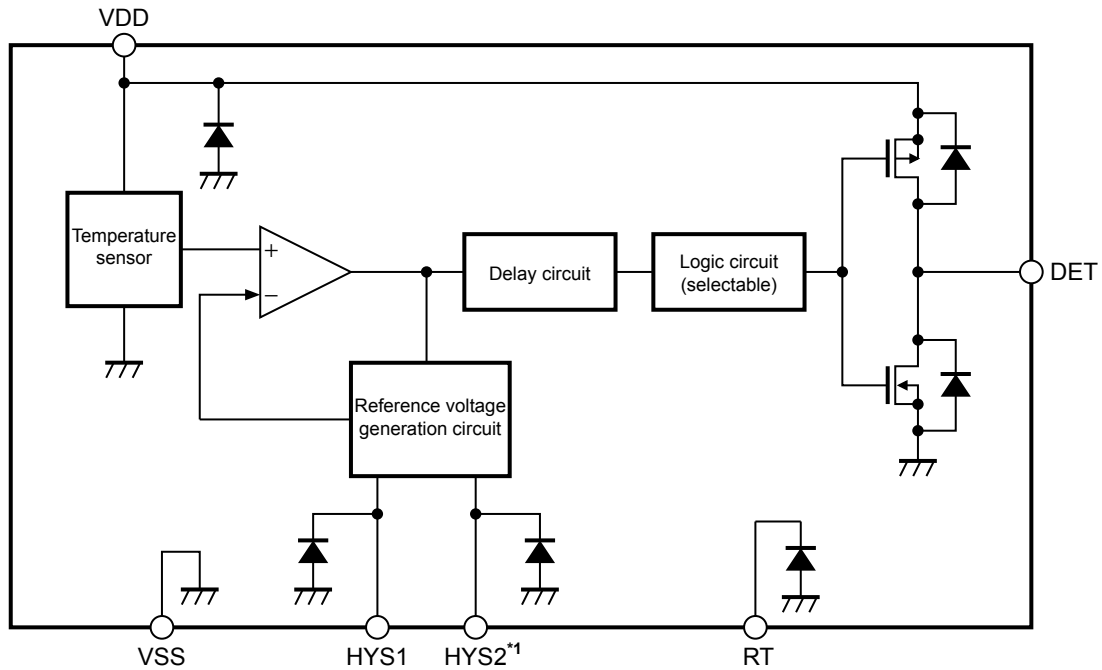

■ Applications

- Fan control
- Air conditioning system
- Various electronic devices

■ Packages
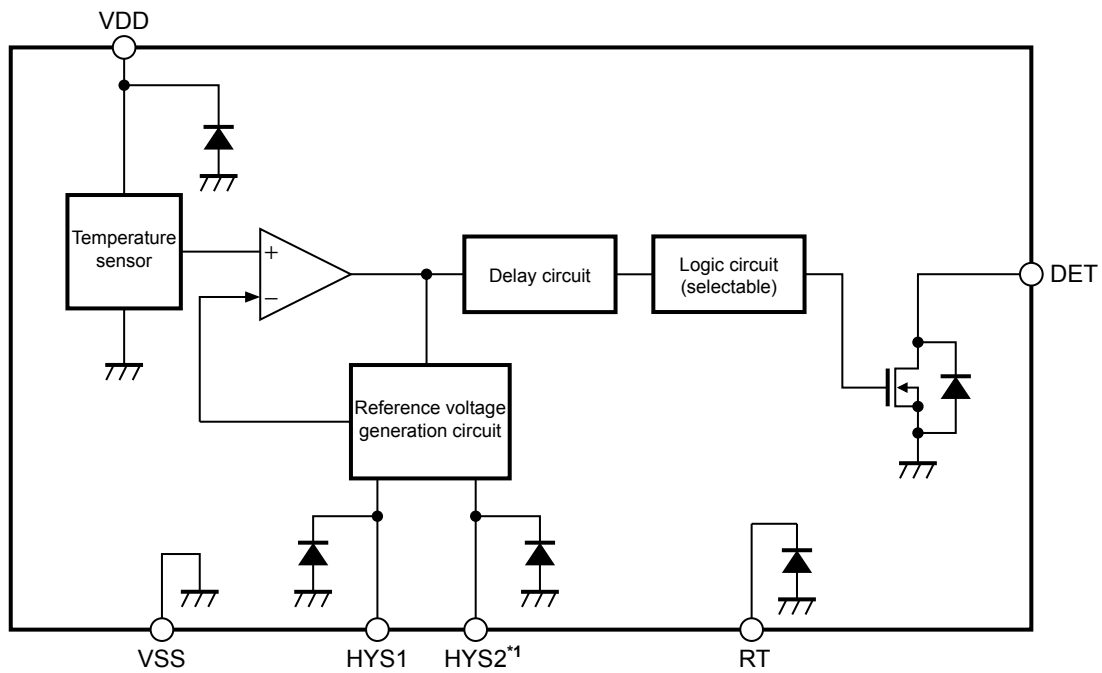

- SOT-23-5
- SNT-6A

■ Block Diagrams

1. CMOS output product

*1. The HYS2 pin is not equipped for SOT-23-5.

Figure 1

2. Nch open drain output product

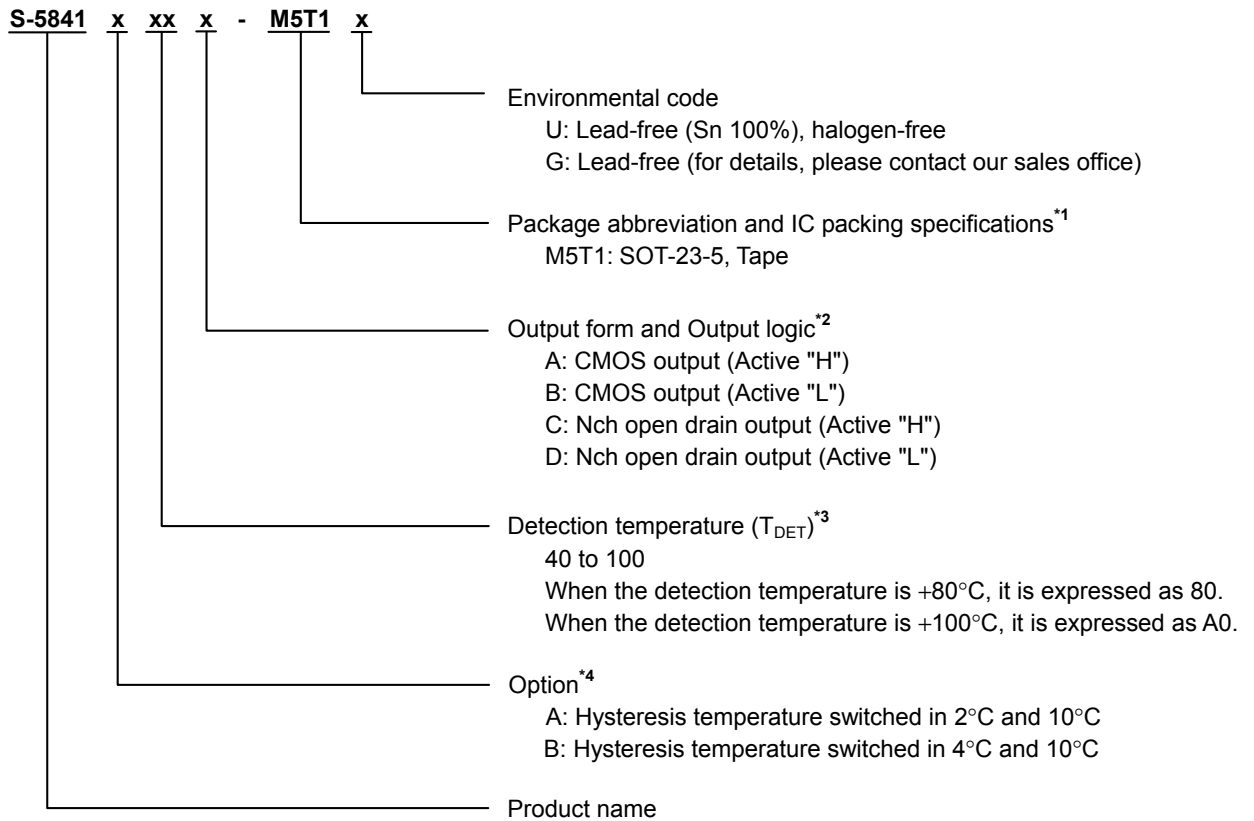

*1. The HYS2 pin is not equipped for SOT-23-5.

Figure 2

■ Product Name Structure

Users are able to select the option for hysteresis temperature, detection temperature, output form and logic, package for the S-5841 Series.
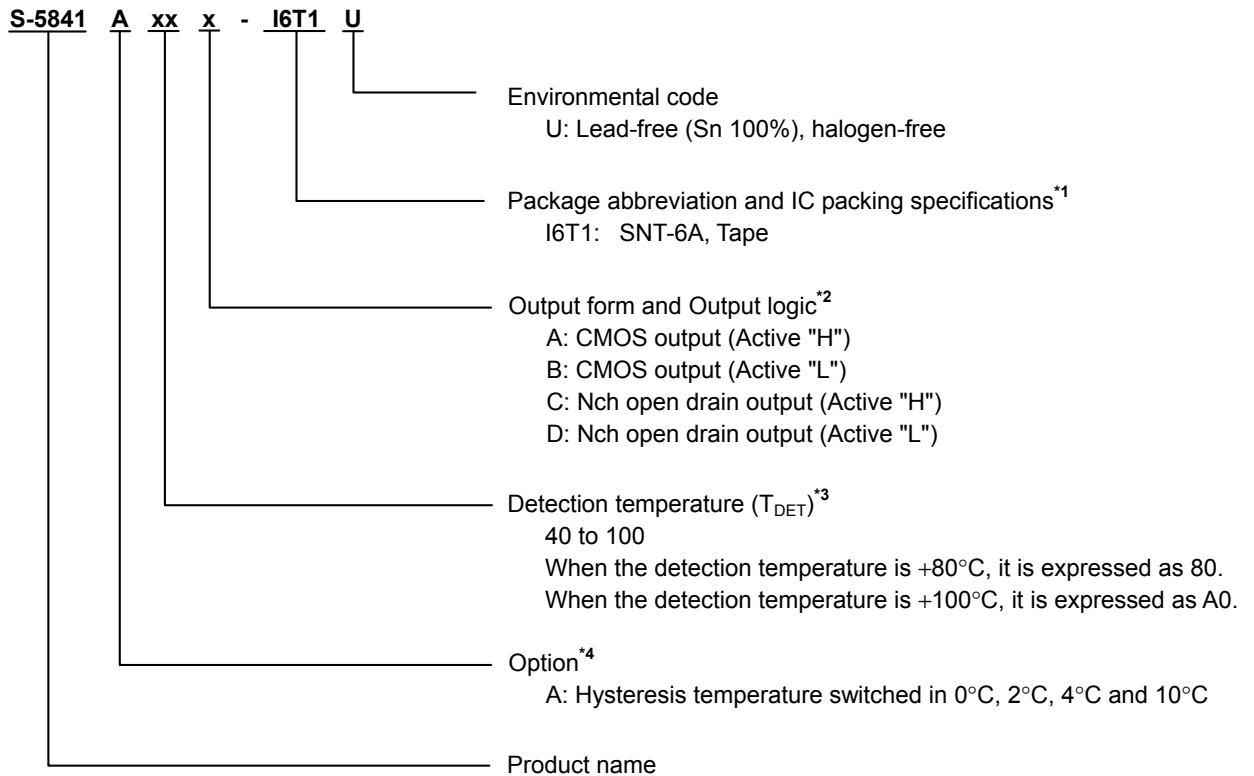

1. Product name

1. 1 SOT-23-5

S-5841 x xx x - M5T1 x

Environmental code
    U: Lead-free (Sn 100%), halogen-free
    G: Lead-free (for details, please contact our sales office)

Package abbreviation and IC packing specifications[1]
    M5T1: SOT-23-5, Tape

Output form and Output logic[2]
    A: CMOS output (Active "H")
    B: CMOS output (Active "L")
    C: Nch open drain output (Active "H")
    D: Nch open drain output (Active "L")

Detection temperature (T_{DET})[3]
    40 to 100
    When the detection temperature is +80°C, it is expressed as 80.
    When the detection temperature is +100°C, it is expressed as A0.

Option[4]
    A: Hysteresis temperature switched in 2°C and 10°C
    B: Hysteresis temperature switched in 4°C and 10°C

Product name

[1]. Refer to the tape drawing.
[2]. The DET pin output can be selected the output logic in active "H" or "L".
The DET pin output can be selected the output form in CMOS or Nch open drain.
[3]. The detection temperature (T_{DET}) can be set in the range of +40°C to +100°C at 1°C step.
[4]. The hysteresis temperature is set by the HYS1 pin. By option, the hysteresis temperature of the product is selectable in 2°C and 10°C / 4°C and 10°C.

1. 2   SNT-6A

S-5841 A xx x - I6T1 U

Environmental code
  U: Lead-free (Sn 100%), halogen-free

Package abbreviation and IC packing specifications[*1]
  I6T1:   SNT-6A, Tape

Output form and Output logic[*2]
  A: CMOS output (Active "H")
  B: CMOS output (Active "L")
  C: Nch open drain output (Active "H")
  D: Nch open drain output (Active "L")

Detection temperature (T_{DET})[*3]
  40 to 100
  When the detection temperature is +80°C, it is expressed as 80.
  When the detection temperature is +100°C, it is expressed as A0.

Option[*4]
  A: Hysteresis temperature switched in 0°C, 2°C, 4°C and 10°C

Product name

*1.   Refer to the tape drawing.
*2.   The DET pin output can be selected the output logic in active "H" or "L".
      The DET pin output can be selected the output form in CMOS or Nch open drain.
*3.   The detection temperature (T_{DET}) can be set in the range of +40°C to +100°C at 1°C step.
*4.   The hysteresis temperature can be switched in 0°C, 2°C, 4°C, 10°C, and is set by the HYS1 pin and the HYS2 pin.

2.   Packages

Table 1   Package Drawing Codes

Package Name	Dimension	Tape	Reel	Land
SOT-23-5	MP005-A-P-SD	MP005-A-C-SD	MP005-A-R-SD	–
SNT-6A	PG006-A-P-SD	PG006-A-C-SD	PG006-A-R-SD	PG006-A-L-SD

3. Product name list

3. 1 SOT-23-5

Table 2

Product Name	Detection Temperature (T_{DET})	DET Pin Output Form	DET Pin Output Logic	Hysteresis Temperature (T_{HYS})
S-5841A55D-M5T1x	+55°C	Nch open drain	Active "L"	2°C, 10°C
S-5841A65D-M5T1x	+65°C	Nch open drain	Active "L"	2°C, 10°C
S-5841A75D-M5T1x	+75°C	Nch open drain	Active "L"	2°C, 10°C
S-5841A85D-M5T1x	+85°C	Nch open drain	Active "L"	2°C, 10°C
S-5841A95D-M5T1x	+95°C	Nch open drain	Active "L"	2°C, 10°C

Remark 1. Please contact our sales office for products other than those specified above.
    2. x: G or U
    3. Please select products of environmental code = U for Sn 100%, halogen-free products.

3. 2 SNT-6A

Table 3

Product Name	Detection Temperature (T_{DET})	DET Pin Output Form	DET Pin Output Logic	Hysteresis Temperature (T_{HYS})
S-5841A70A-I6T1U	+70°C	CMOS	Active "H"	0°C, 2°C, 4°C, 10°C
S-5841A80A-I6T1U	+80°C	CMOS	Active "H"	0°C, 2°C, 4°C, 10°C
S-5841A90A-I6T1U	+90°C	CMOS	Active "H"	0°C, 2°C, 4°C, 10°C
S-5841A50D-I6T1U	+50°C	Nch open drain	Active "L"	0°C, 2°C, 4°C, 10°C

Remark Please contact our sales office for products other than those specified above.
■ Pin Configurations

Figure 7   Test Circuit 3

■ Operation

1. Basic operation

The S-5841 Series is a temperature switch IC (thermostat IC) which detects a certain temperature and sends a signal to an external device. Various combinations of the parameters such as the detection temperature, output form and output logic can be selected.

Following is about the operation when the DET pin output logic is active "H".
After applying the power supply, the S-5841 Series starts to detect the temperature. If it is lower than the detection temperature ($+T_D$), the DET pin output keeps "L". The temperature rises and exceeds the detection temperature, the DET pin is set to "H".
After the detection, the temperature drops and reaches the release temperature ($+T_D - T_{HYS}$), the DET pin returns to "L".
Figure 8 is the timing chart.
Figure 8   Operation when DET Pin Output Logic is Active "H"

2. Hysteresis setting

2. 1   SOT-23-5

The hysteresis temperature can be set by the HYS1 pin. By option, the hysteresis temperature of the product is selectable in 2°C and 10°C / 4°C and 10°C.

Table 12   Hysteresis Option A

Setting Pin	Hysteresis Temperature
HYS1	
"H"	2°C
"L"	10°C

Table 13   Hysteresis Option B

Setting Pin	Hysteresis Temperature
HYS1	
"H"	4°C
"L"	10°C

2. 2 SNT-6A

The hysteresis temperature can be switched in 0°C, 2°C, 4°C, 10°C, and is set by the HYS1 pin and HYS2 pin.

Table 14　Hysteresis Option A

Setting Pin		Hysteresis Temperature
HYS1	HYS2	
"H"	"H"	2°C
"H"	"L"	4°C
"L"	"H"	10°C
"L"	"L"	0°C

3.　Delay circuit

The S-5841 Series sets the noise suppression time (t_{delay}) via the delay circuit. By this, the S-5841 Series prevents false detection operations of the DET pin output.
The followings are about the operation when the DET pin output logic is active "H".

3. 1　The temperature is the detection temperature or less

The output from a comparator is "H", and the DET pin is "L". Due to noise or others, the output from a comparator is inverted to "L" once; however, the DET pin keeps "L" if this status is t_{delay} or shorter.

3. 2　The temperature exceeds the detection temperature

The output from a comparator gets "L". And the DET pin gets "H" after the period has passed t_{delay} or longer.

■ Standard Circuit
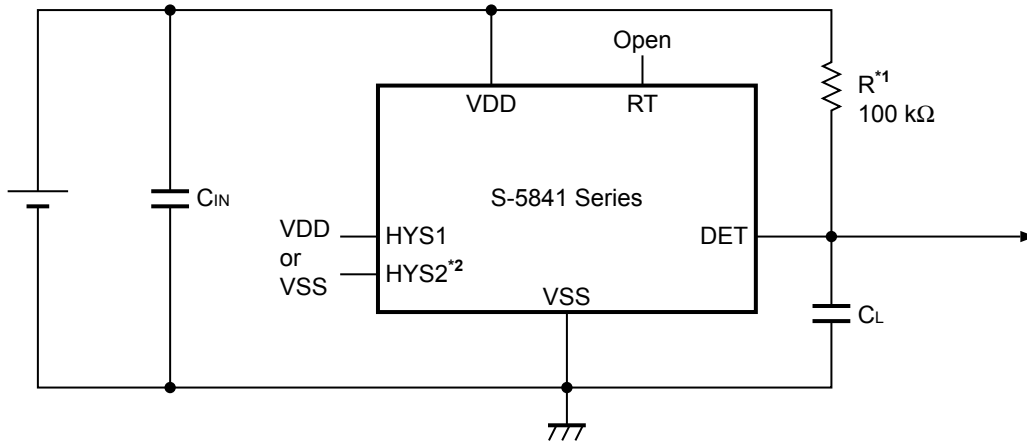

Figure 9

*1. Resistor (R) is unnecessary for the CMOS output product.
*2. The HYS2 pin is not equipped with SOT-23-5.

Caution   The above connection diagram will not guarantee successful operation. Perform thorough evaluation using actual application to set the constant.

■ Precautions

- Set a capacitor (C_{IN}) of 0.1 μF or more between the VDD and VSS pin for stabilization.
- Set a capacitor (C_L) of about 1 μF for the DET pin to prevent malfunction caused by the noise when the power supply is applied.
- The S-5841 Series may oscillate by setting a capacitor to the RT pin. Set the RT pin open in use.
- If the RT pin is short-circuited to VSS, the DET pin becomes active in the S-5841 Series.
- Fix the HYS1 pin and the HYS2 pin VDD or VSS in use.
- Do not apply an electrostatic discharge to this IC that exceeds the performance ratings of the built-in electrostatic protection circuit.
- SII Semiconductor Corporation claims no responsibility for any disputes arising out of or in connection with any infringement by products, including this IC, of patents owned by a third party.

■ Characteristics (Typical Data)

1. Current consumption vs. Power supply voltage characteristics
2. DET pin current "H" vs. Power supply voltage characteristics (CMOS output product only)

$V_{DET} = V_{DD} - 0.8 \text{ V}$
3. DET pin current "L" vs. Power supply voltage characteristics

$V_{DET} = 0.4 \text{ V}$
4. Noise suppression time vs. Power supply voltage characteristics
5. Response against heat (Output voltage vs. Time)

5. 1 When packages are put into the air of +100 degrees from the air of +25 degrees at t = 0 s

V_{DD} = 3.0 V, C_L = 0 μF, Detection temperature = +70°C, Active "L"
5. 2 When packages are put into the liquid of +100 degrees from the air of +25 degrees at t = 0 s

V_{DD} = 3.0 V, C_L = 0 μF, Detection temperature = +70°C, Active "L"

6. Response against startup

6. 1 The detection temperature or lower (Ta ≤ +T_D)

C_L = 0 μF, Active "L"
6. 2 Higher than the detection temperature (Ta > +T_D)

C_L = 0 μF, Active "L"
■ Marking Specifications

1. SOT-23-5

Top view

※1. ランドパターンの幅に注意してください (0.25 mm min. / 0.30 mm typ.)。
※2. パッケージ中央にランドパターンを広げないでください (1.30 mm ~ 1.40 mm)。

注意　1.　パッケージのモールド樹脂下にシルク印刷やハンダ印刷などしないでください。
　　　2.　パッケージ下の配線上のソルダーレジストなどの厚みをランドパターン表面から**0.03 mm**
　　　　　以下にしてください。
　　　3.　マスク開口サイズと開口位置はランドパターンと合わせてください。
　　　4.　詳細は "**SNT**パッケージ活用の手引き" を参照してください。

※1. Pay attention to the land pattern width (0.25 mm min. / 0.30 mm typ.).
※2. Do not widen the land pattern to the center of the package (1.30 mm ~ 1.40 mm).

Caution　1. Do not do silkscreen printing and solder printing under the mold resin of the package.
**　　　　　2. The thickness of the solder resist on the wire pattern under the package should be 0.03 mm**
**　　　　　　 or less from the land pattern surface.**
**　　　　　3. Match the mask aperture size and aperture position with the land pattern.**
**　　　　　4. Refer to "SNT Package User's Guide" for details.**

※1. 请注意焊盘模式的宽度 (0.25 mm min. / 0.30 mm typ.)。
※2. 请勿向封装中间扩展焊盘模式 (1.30 mm ~ 1.40 mm)。

注意 1.　请勿在树脂型封装的下面印刷丝网、焊锡。
　　 2.　在封装下、布线上的阻焊膜厚度 (从焊盘模式表面起) 请控制在 0.03 mm 以下。
　　 3.　钢网的开口尺寸和开口位置请与焊盘模式对齐。
　　 4.　详细内容请参阅 "SNT 封装的应用指南"。
