Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SCRs

(1 A to 70 A) RoHS

General Description

The Teccor line of thyristor SCR semi-conductors are half-wave, unidirectional, gate-controlled rectifiers which complement Teccor's line of sensitive SCRs. Teccor offers devices with ratings of 1 A to 70 A and 200 V to 1000 V, with gate sensitivities from 10 mA to 50 mA. If gate currents in the 12 µA to 500 µA ranges are required, see “Sensitive SCRs” section of this catalog.

Three packages are offered in electrically isolated construction where the case or tab is internally isolated to allow the use of low-cost assembly and convenient packaging techniques.

The Teccor line of SCRs features glass-passivated junctions to ensure long-term reliability and parameter stability. Teccor’s glass offers a rugged, reliable barrier against junction contamination.

Variations of devices covered in this data sheet are available for custom design applications. Consult the factory for more information.

Features

- **RoHS Compliant**
- **Electrically-isolated package**
- **High voltage capability — 200 V to 1000 V**
- **High surge capability — up to 950 A**
- **Glass-passivated chip**

Compak SCR

- **Surface mount package — 1 A series**
- **New small profile three-leaded Compak package**
- **Packaged in embossed carrier tape with 2,500 devices per reel**
- **Can replace SOT-223**

Specific Test Conditions

di/dt — Maximum rate-of-rise of on-state current; I_{GT} = 150 mA with ≤ 0.1 µs rise time

dv/dt — Critical rate of applied forward voltage

I^2t — RMS surge (non-repetitive) on-state current for period of 8.3 ms for fusing

I_{DRM} and **I_{RRM}** — Peak off-state forward and reverse current at V_{DRM} and V_{RRM}

I_{gt} — dc gate trigger current; V_D = 12 V dc; R_L = 60 Ω for 1 to 16 A devices and 30 Ω for 20 to 70 A devices

I_{GM} — Peak gate current

I_H — dc holding current; gate open

I_T — Maximum on-state current

I_{TSM} — Peak one-cycle forward surge current

$P_{G(AV)}$ — Average gate power dissipation

P_{GM} — Peak gate power dissipation

t_{gt} — Gate controlled turn-on time; gate pulse = 100 mA; minimum width = 15 µs with rise time ≤ 0.1 µs

t_q — Circuit commutated turn-off time

V_{DRM} and **V_{RRM}** — Repetitive peak off-state forward and reverse voltage

V_{gt} — DC gate trigger voltage; V_D = 12 V dc; R_L = 60 Ω for 1 to 16 A devices and 30 Ω for 20 to 70 A devices

V_{TM} — Peak on-state voltage at maximum rated RMS current

General Notes

- All measurements are made at 60 Hz with a resistive load at an ambient temperature of +25 °C unless otherwise specified.
- Operating temperature range (T_J) is -65 °C to +125 °C for TO-92 devices and -40 °C to +125 °C for all other packages.
- Storage temperature range (T_S) is -65 °C to +150 °C for TO-92 devices, -40 °C to +150 °C for TO-202 and TO-220 devices, and -40 °C to +125 °C for all others.
- Lead solder temperature is a maximum of 230 °C for 10 seconds maximum; ≥1/16" (1.59 mm) from case.
- The case temperature (T_C) is measured as shown on dimensional outline drawings in the “Package Dimensions” sectionof this catalog.

Electrical Specification Notes

(1) See Figure E6.5 through Figure E6.16 for current rating at specified operating case temperature.

(2) See Figure E6.1 and Figure E6.2 for free air current rating.

(3) See Figure E6.19 and Figure E6.20 for instantaneous on-state current versus on-state voltage (typical).

(4) See Figure E6.18 for I_{GT} versus T_C.

(5) See Figure E6.17 for I_H versus T_C.

(6) For more than one full cycle rating, see Figure E6.23.

(7) See Figure E6.22 for t_{gt} versus I_{GT}.

(8) See Figure E6.21 for V_{GT} versus T_C.

(9) Test conditions are as follows:

- I_T = 1 A for 1 A devices and 2 A for all other devices
- Pulse duration = 50 µs, dv/dt = 20 V/µs, di/dt = -10 A/µs for 1 A devices, and -30 A/µs for other devices
- I_{GT} = 200 mA at turn-on

(10) See Figure E6.5 through Figure E6.10 for maximum allowable case temperatures at maximum rated current.

(11) See package outlines for lead form configuration. When ordering special lead forming, add type number as suffix to part number.

(12) Pulse width ≤10 µs

(13) Initial on-state current = 200 mA dc for 1 A through 16 A devices; 400 mA dc for 20 A through 70 A devices.

(14) $T_C = T_J$ for test conditions in off state.

(15) The R, K, or M package rating is intended for high surge condition use only and not recommended for ≥50 A rms continuous current use since narrow pin lead temperature can exceed PCB solder melting temperature. Teccor's J package or W package is recommended for ≥50 A rms continuous current requirements.

(16) For various durations of an exponentially decaying current waveform, see Figure E6.3 and Figure E6.4. (t_W is defined as 5 time constants.)

(17) Minimum non-trigger V_{GT} at 125 °C is 0.2 V.

Thermal Resistance (Steady State) $R_{\theta JC}$ [$R_{\theta JA}$] °C/W (TYP.)		
Package Code	C	E
Type	 Compak	 TO-92
1 A	**35 ***	**50 [145]**

* Mounted on 1cm^2 copper foil surface; two-ounce copper foil

Electrical Isolation

Teccor's isolated SCR packages will withstand a minimum high potential test of 2500 V ac rms from leads to mounting tab over the device's operating temperature range. The following table shows standard and optional isolation ratings.

Electrical Isolation * from Leads to Mounting Tab			
V AC RMS	**TO-220 Isolated**	**TO-218X Isolated**	**TO-218 Isolated**
2500	**Standard**	**Standard**	**Standard**
4000	**Optional ****	**N/A**	**N/A**

* UL Recognized File #E71639

** For 4000 V isolation, use "V" suffix in part number.
