Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

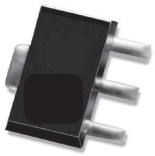
SBB-2089
SBB-2089Z

RoHS Compliant & Green Package

50 - 850 MHz, Cascadable Active Bias InGaP/GaAs HBT MMIC Amplifier

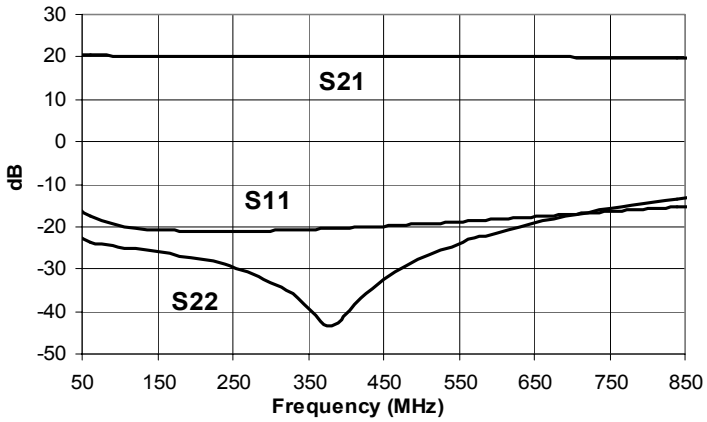


Product Description

Sirenza Microdevices' SBB-2089 is a high performance InGaP HBT MMIC amplifier utilizing a Darlington configuration with an active bias network. The active bias network provides stable current over temperature and process Beta variations. Designed to run directly from a 5V supply, the SBB-2089 does not require a dropping resistor as compared to typical Darlington amplifiers. The SBB-2089 product is designed for high linearity 5V gain block applications that require small size and minimal external components. It is internally matched to 50 ohms.

The matte tin finish on Sirenza's lead-free package utilizes a post annealing process to mitigate tin whisker formation and is RoHS compliant per EU Directive 2002/95. This package is also manufactured with green molding compounds that contain no antimony trioxide nor halogenated fire retardants.

Gain & Return Loss vs. Frequency (w/ App. Ckt.)



Product Features

- Available in Lead Free, RoHS compliant, & Green packaging
- IP3 = 42.8 dBm @ 240MHz
- P1dB = 20.8 dBm @ 500MHz
- Single Fixed 5V Supply
- Robust 1000V ESD, Class 1C
- Patented Thermal Design & Patent Pending Bias Circuit
- Low Thermal Resistance
- MSL 1 moisture rating

Applications

- Receiver IF Amplifier
- Cellular, PCS, GSM, UMTS
- Wireless Data, Satellite Terminals

Symbol	Parameters	Units	Frequency	Min.	Typ.	Max.
S_{21}	Small Signal Gain	dB	70 MHz 240 MHz 400 MHz	 18.5 18.5	20 20 20	 21.5 21.5
P_{1dB}	Output Power at 1dB Compression	dBm	70 MHz 240 MHz 400 MHz	 18.5	20 20 21	
IP_3	Third Order Intercept Point	dBm	70 MHz 240 MHz 400 MHz	 39	41 43 41	
Bandwidth	S_{11}, S_{22}: Minimum 10dB Return Loss (typ.)	MHz			50 - 850	
IRL	Input Return Loss	dB	70 -500MHz	15	20	
ORL	Output Return Loss	dB	70 -500MHz	11	14	
S_{12}	Reverse Isolation	dB	70 -500MHz		22	
NF	Noise Figure	dB	500 MHz		2.7	3.7
V_D	Device Operating Voltage	V			5	5.3
I_D	Device Operating Current	mA		82	90	98
R_{TH}, j-l	Thermal Resistance (junction - lead)	°C/W			48.8	

Test Conditions: V_D = 5V, I_D = 90mA Typ., OIP_3 Tone Spacing = 1MHz, Pout per tone = 0 dBm
T_L = 25°C, $Z_S = Z_L$ = 50 Ohms, Tested with Bias Tees

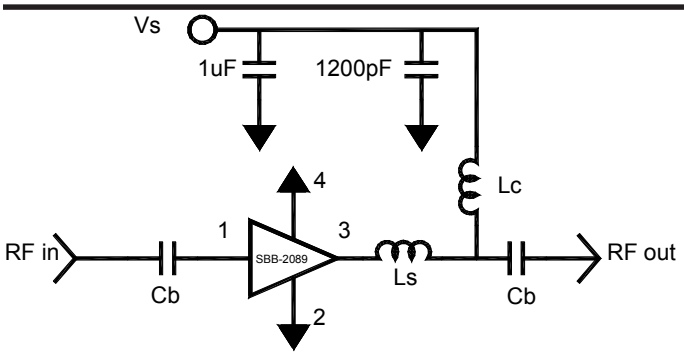
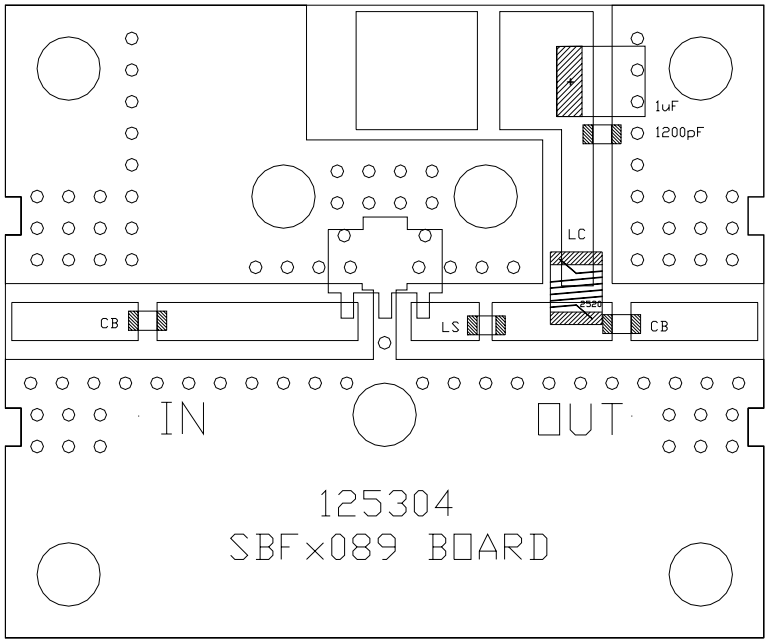
Application Schematic



Application Circuit Element Values

Reference Designator	Frequency (MHz) 50 to 850
C_B	8200pF
L_C	1200nH LS Coilcraft
L_S	2.7nH Toko

Evaluation Board Layout



Absolute Maximum Ratings

Parameter	Absolute Limit
Ma. Dvice Current (I_D)	110 mA
Max Device Voltage (V_D)	5.5 V
Max. RF Input Power	+12 dBm
Max. Operating Dissipated Power	0.61 W
Max. Junction Temp. (T_J)	+150°C
Operating Temp. Range (T_L)	-40°C to +85°C
Max. Storage Temp.	+150°C

Operation of this device beyond any one of these limits may cause permanent damage. For reliable continuous operation, the device voltage and current must not exceed the maximum operating values specified in the table on page one.
Bias Conditions should also satisfy the following expression:
$I_D V_D < (T_J - T_L) / R_{TH, j-l}$ $T_L = T_{LEAD}$

Mounting Instructions

1. Solder the copper pad on the backside of the device package to the ground plane.
2. Use a large ground pad area with many plated through-holes as shown.
3. We recommend 1 or 2 ounce copper. Measurement for this datasheet were made on a 31 mil thick FR-4 board with 1 ounce copper on both sides.

ESD Class 1C

Appropriate precautions in handling, packaging and testing devices must be observed.

MSL (Moisture Sensitivity Level) **Rating: Level 1**

Part Number Ordering Information

Part Number	Reel Size	Devices / Reel
SBB-2089	7"	1000
SBB-2089Z	7"	1000

Pin #	Function	Description
1	RF IN	RF input pin. This pin requires the use of an external DC blocking capacitor chosen for the frequency of operation.
2, 4	GND	Connection to ground. Use via holes for best performance to reduce lead inductance as close to ground leads as possible
3	RF OUT/ BIAS	RF output and bias pin. DC voltage is present on this pin, therefore a DC blocking capacitor is necessary for proper operation.
