SBX200 Enclosure/Battery Kit for SIM205

Perfect for prototyping and small projects

Available as an optional accessory for the SIM205, the SBX200 kit includes an injection molded plastic enclosure, the SW001 battery/switch board, as well as a 1000mAH Lithium polymer battery. Perfect for prototypes, and even that marketing meeting when the team wants to pass the unit around, the SIM205 is protected during normal handling and can run for up to several hours on a charge.

Explore

Download and explore the [3D PDF of the SBX200 enclosure](#). Select the front or back part of the enclosure and right-click “View->Part Options->Make Transparent” to see the wireframe view, or just spin the unit around in 3D to view it from all angles.
