## 3 Port Isolating Signal Converter

The new SC-ISOCON6 Isolating Signal Converter can accept a wide range of inputs including 4-20mA, thermocouple, RTD and voltage signals. The units produce a high level DC output of either voltage or current.

Full 3 port isolation is standard as is an isolated transmitter supply which can be used to power any standard 2-wire 4-20mA transmitter.

The input type and range can be user selected using simple DIL switches inside the unit. All RTD and Thermocouple inputs can be fully linearised.

Non-interactive zero and span controls make adjustment of the unit quick and simple.

Other features include optional inversion of the input signal, an optional second analogue output (see SC-Dualcon data sheet) and an optional Relay alarm output.

The unit accepts a power supply of either 12-36 Vdc or 12-32Vac

For specials such as custom linearisation, frequency input and maths functions etc please contact the sales office.

### Notes

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur. Device is protected against reverse polarity connection.

Accuracy figures based on 24Vdc supply, 4-20mA output with 250Ω load and an ambient 20°C. SC-ISOCON3 does NOT provide safety isolation when the input is connected to the mains.
