Chipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

General Description

The SCG2500 is a mixed-signal phase lock loop generating CMOS outputs from an intrinsically low jitter voltage controlled crystal oscillator.

The SCG2500 can lock to one of two possible input reference frequencies at 8 kHz which is selectable using one input select pin.

Further features include an alarm output to indicate Loss of Reference, LOR, or Loss of Lock, LOL. If only one of the references is lost, the unit will disable its phase detector and will signal an alarm, but will not switch reference automatically. If both references are lost, the SCG2500 will enter a Free Run state which will guarantee a 20 ppm accurate output. Additionally, the Free Run mode may be entered manually by applying a high signal to the Force Free Run pin. If the unit is in Free Run mode, the Free Run status pin will be high.

All outputs, except the Oscillator Output, may be put into the tri-state high impedance condition for external testing purposes by applying a high signal to the Reset/ Tri-State pin.

The filtered 8 kHz is derived from the oscillator output. The offset between the filtered output and the reference input will change with each reference rearrangement.

The package maximum dimensions are .780" x .830" x .35" on a six layer FR4 board with surface mount pins. Parts are assembled using high temperature solder to withstand surface mount reflow process.

Features

- Phase Locked Output Frequency Control
- Intrinsically Low Jitter Crystal Oscillator
- Two Selectable References @ 8 kHz
- Alarm Output
- Tri-Statable Alarm Outputs and Reference Output
- Force Free Run Function
- Automatic Free Run Operation upon loss of both references
- Input Duty Cycle Tolerant
- 3.3 Volt Power Supply
- Small Size: 0.78" x 0.83" x 0.35" maximum
- Surface Mount, DIL Package

Input Selection / Output Response

Table 5   All SCG2500 Models

	INPUTS				OUPUTS				
Reset/ Tri-State	SEL_{AB}	REF_A	REF_B	FR	FR_{status}	Alarm	Oscillator Output	8 kHz Output	Notes
1	X	X	X	X	TS	TS	FR	TS	
0	X	X	X	1	1	1	FR	FR	
0	0	A	A	0	0	0	LRA	LRAD	
0	1	NA	A	0	0	0	LRB	LRBD	
0	0	NA	A	0	0	1	U	U	5.0
0	1	A	NA	0	0	1	U	U	5.0
0	0	A	NA	0	0	0	LRA	LRAD	
0	X	NA	NA	0	1	1	FR	FR	

TS = Tri-State   U = Unstable
FR = Free Run   LRAD = Locked to Ref A and divided down
LRA = Locked to Ref A   LRAB = Locked to ref B and divided down
LRB = Locked to Reb B   X = Don't care

NOTES:

1.0   Requires external regulation

2.0   Externally selectable via Input Select AB

3.0   From a 20 ppm offset in reference frequency

4.0   Entry into Free Run doesn't meet requirement for initial 2.33 seconds of self-timing

4.1   If the selected reference is removed, system response to the ALARM must be less than 10µs

5.0   On alarm assertion, switch references. If alarm is still active, force Free Run

Ordering Information

SCG{XXXX}-{FFF.FFF}{M}

XXXX equals a specific model (2500)
FFF.FFF equals the Oscillator Output frequency (001.544, 002.048, 019.44, 020.48, 034.368, 044.736, 051.84, 077.76)
M equals MHZ and is added to all part numbers

Example: To order an SCG2500 with an Oscillator Output of 77.76 MHz,
Order part number SCG2500-077.76M

Please contact Connor-Winfield for other frequencies that may be available.
