

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Address: A1208, Overseas Decoration Building, #122 Zhenhua RD., Futian, Shenzhen, China

**RG-06 : SE-VS1002K VOLTAGE SCALER FOR THE SE-325**

In some SE-325 NGR Monitor applications the required RES TRIP LEVEL (VAC) setting may be above the 20K RES set-point range. To increase the RES TRIP LEVEL (VAC) range on an SE-325 when using a 20 k Ω sensing resistor, install an SE-VS1002K Voltage Scaling Device. For new applications, Littelfuse Startco recommends the use of an SE-330 NGR Monitor.

**NOTES:**

1. WITH SE-VS1002K INSTALLED ACROSS R & G OF SE-325 NGR MONITOR AND USING 20 K Ω SENSING RESISTOR (SE-325 SETTING: RES IN 20K POSITION) THE RES TRIP LEVEL POTENTIOMETER RANGE IS TIMES FIVE (100 VAC TO 2 KVAC)

**SE-VS1002K VOLTAGE SCALER INSTALLATION**
