

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

**DATA SHEET**  
**SE5511T: Dual Band 802.11n WLAN/BT Front End**

**Applications**

- IEEE802.11b DSSS WLAN
- IEEE802.11a,g,n OFDM WLAN
- Embedded applications with Bluetooth (Mobile)

**Features**

- All RF ports matched to 50 Ω
- Integrated 2.4,5 GHz PA, 5 GHz LNA, SP3T, SP2T switches and filtering
- Integrated Power Detector
- 19.5 dBm @ 3 % EVM, 802.11g, 54 Mbps
- 18 dBm @ 3 % EVM, 802.11a, 54 Mbps
- Lead free, Halogen Free and RoHS compliant
- Compact package, 3 x 4 x 0.6 mm, MSL 1

**Ordering Information**

Part No.	Package	Remark
SE5511T	28 pin QFN	Samples
SE5511T-R	28 pin QFN	Tape & Reel
SE5511T-EK1	N/A	Evaluation kit

**Product Description**

The SE5511T is a complete 802.11n WLAN RF front-end module providing all the functionality of the power amplifiers, LNA, power detector, Antenna switches, filtering and associated matching. The SE5511T provides a complete 2.4 GHz and 5 GHz WLAN RF solution from the output of the transceiver to the antennas in a compact form factor.

The receive path is designed to maximize performance by providing both a 5 GHz Low noise amplifier with bypass mode, for use when high power signals are being received.

Designed for ease of use, all RF ports are matched to 50 Ω to simplify PCB layout and the interface to the transceiver RFIC. The SE5511T also includes a transmitter power detector for each band with 20 dB of dynamic range.

**Pin Out Diagram**

**Figure 2: SE5511T Pin Out (Top View Through Package)**

**Pin Out Description**

Pin No.	Name	Description
1	CSP2	2.4 GHz PA bias speed-up
2	RX2	2.4 GHz Receive port
3	GND	Ground
4	RX5	5 GHz Receive port
5	VCC1	Power Supply
6	TX5	5 GHz Transmit port
7	GND	Ground
8	VCC5	Power Supply
9	VCC4	Power Supply
10	PEN2	Enable for 2.4 GHz PA and Transmit Switch
11	DET	Power Detector Output
12	LEN5	Enable for 5 GHz LNA and Receive Switch
13	GND	Ground
14	BT	Bluetooth Port
15	CBT	Control for Bluetooth port

Pin No.	Name	Description
16	ANT5	5 GHz Antenna port
17	GND	Ground
18	ANT2	2.4 GHz Antenna port
19	CRX2	Control for 2.4 GHz Receive
20	CRX5	Control for 5 GHz Receive
21	GND	Ground
22	VCC3	Power Supply
23	PEN5	Enable for 5 GHz PA and Transmit switch
24	CSP5	5 GHz PA bias speed-up
25	DNC	Do Not Connect
26	GND	Ground
27	VCC2	Power Supply
28	TX2	2.4 GHz Transmit port

**Absolute Maximum Ratings**

These are stress ratings only. Exposure to stresses beyond these maximum ratings may cause permanent damage to, or affect the reliability of the device. Avoid operating the device outside the recommended operating conditions defined below. This device is ESD sensitive. Handling and assembly of this device should be at ESD protected workstations.

Symbol	Definition	Min.	Max.	Unit
V <sub>CC</sub>	Supply Voltage	-0.3	5.5	V
V <sub>IN</sub>	Control Pin Voltages	-0.3	3.6	V
TX <sub>RFIN</sub>	TX2/TX5, with ANT2/ANT5 terminated in 50Ω	-	+10	dBm
T <sub>A</sub>	Operating Temperature Range	-40	85	°C
T <sub>STG</sub>	Storage Temperature Range	-40	150	°C
ESD <sub>HBM</sub>	JEDEC JESD22-A114 All pins		1000	V

**Recommended Operating Conditions**

Symbol	Parameter	Min.	Typ.	Max.	Unit
V <sub>CC</sub>	Supply Voltage	2.97	3.3	3.6	V
T <sub>A</sub>	Ambient Temperature	-40	25	85	°C

**Control Logic Characteristics**

Conditions: V<sub>CC</sub> = 3.3 V, T<sub>A</sub> = 25 °C, as measured on Skyworks Solutions' SE5511T-EK1 evaluation board (de-embedded to device), all unused ports terminated with 50 ohms, unless otherwise noted.

**DATA SHEET**

**Figure 5: Recommended PCB footprint**

Because of its sensitivity to moisture absorption, instructions on the shipping container label must be followed regarding exposure to moisture after the container seal is broken, otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly. The SE5511T is capable of withstanding a Pb free solder reflow. Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. If the part is manually attached, precaution should be taken to insure that the device is not subjected to temperatures above its rated peak temperature for an extended period of time. For details on both attachment techniques, precautions, and handling procedures recommended, please refer to:

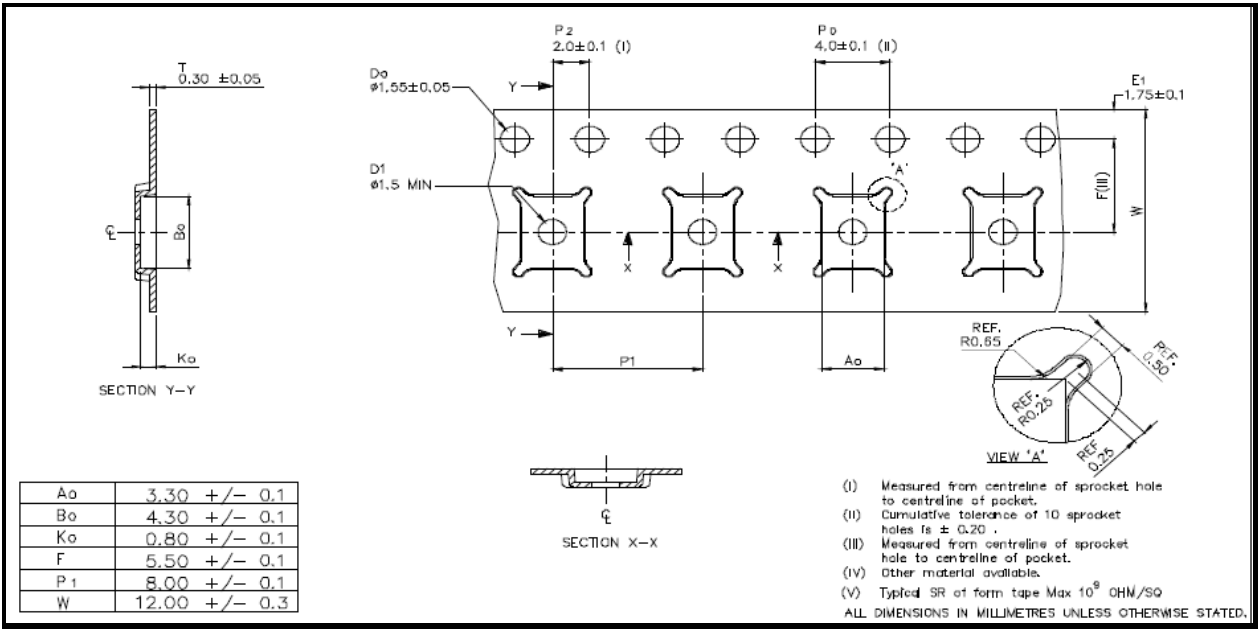

- “Quad Flat No-Lead Module Solder Reflow & Rework Information”, *Document Number QAD-00045*.
- “Handling, Packing, Shipping and Use of Moisture Sensitive QFN”, *Document Number QAD-00044*.

Revision	Date	Notes
1.0	August-04-2010	Created
1.1	April-07-2011	Updated Functional block diagram
1.2	June-09-2011	Updated specifications
1.3	July-06-2011	Updated RX2 isolation specification
1.4	November-22-2011	Updated specifications
1.5	February-03-2012	Updated temperature range, updated tape and reel info
1.6	April-11-2012	Updated with Skyworks logo and disclaimer statement
1.7	August-14-2012	Updated recommended pcb footprint
