

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Address: A1208, Overseas Decoration Building, #122 Zhenhua RD., Futian, Shenzhen, China

# Crash sensor (Left)

SKU:SEN0138-L

## INTRODUCTION

A miniature snap-action switch, also trademarked and frequently known as a micro switch, is an electric switch that is actuated by very little physical force. Micro switches are very widely used; among their applications are appliances, machinery, industrial controls, vehicles, and many other places for control of electrical circuits. They are usually rated to carry current in control circuits only, although some switches can be directly used to control small motors, solenoids, lamps, or other devices.

This is a small micro switch sensor designed for the Arduino. It could be directly connected to the IO Expansion shield. It integrates the pull-up resistor and the status indicator LED onboard. That makes it easier for testing. The miniature snap-action micro switch with roller lever make it suitable for more different environment application.

## APPLICATIONS

- Levelling and safety switches in elevators
- Door interlock on a microwave oven
- Vending machines
- Detect paper jams or other faults in photocopiers
- 3D Printer position feedback, etc...

## SPECIFICATION

- Working Voltage: 5v
- Pinout
  - 1 Digital output
  - 2 VCC
  - 3 GND
- Onboard status indicator LED
- Directly connected to the IO Expansion shield For Arduino
- M3 mounting hole x2
- Size: 30x20x8mm (1.18x0.79x0.31")

## SHIPPING LIST

- Crash sensor x1
