

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Sensing Heights

SF-AC

Possible to create the highest level safety system

Compatible up to control category 4

Control category 4 compatible with an SF4B series / SF4B-C series / SF4C series combination and control category 2 compatible with an SF2B series / SF2C series combination.

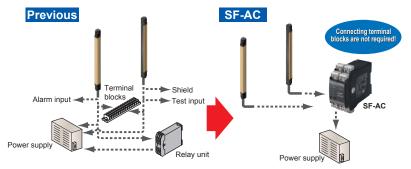

Installation time and labor can be saved due to the usage of detachable terminal blocks

As wiring can be performed with the terminal blocks removed, it is not necessary to detach the controller from the control panel when performing maintenance, thus reducing the number of installation procedures required. Also, when replacing the relay units, you simply insert new terminals without having to manipulate the wiring.

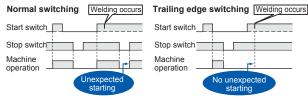

A connecting terminal blocks are not needed

As **SF-AC** incorporates a power supply terminals and synchronization lines terminals for the light curtain, so terminal blocks are not required.

Unexpected start due to start-switch welding prevented

The unit is equipped with a trailing edge switching function, which causes an ON signal to be sent when the start switch signal is falling. This prevents unexpected starting which can occur if the start switch gets welded.

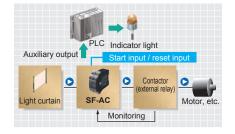

10 ms high-speed response

We have realized the highest-class response time, 10 ms, for the relay output making for even more enhanced safety.

Incorporates a 2-channel auxiliary output

SF-AC incorporates both an auxiliary output that operates together with the light curtain's control output (OSSD), and an alarm output that functions together with the light curtain's auxiliary output (non-safety output). These features allow for monitoring of light curtain activity.

ORDER GUIDE

Туре	Appearance	Model No.	Enabling path
Control category 4		SF-AC	NO contact × 3

SPECIFICATIONS

Item	Model No.	SF-AC		
	nectable light curtains	PNP output type light curtains and Safety devices (SG-B1/A1/B2 series) manufactured by Panasonic Industrial SUNX		
Applicable standards		EN 60947-5-1, EN ISO 13849-1(Category 4, PLe), EN ISO 13849-2, IEC 60947-5-1, ISO 13849-1(Category 4, PLe), ISO 13849-2, JIS B 9705-1 (Category 4), ANSI/UL 508, CAN/CSA C22.2 No.14, OSHA1910.212, OSHA 1910.217(C), ANSI B11.1 to B11.19, ANSI/RIA 15.06		
Control category		ISO 13849-1 compliance up to Category 4		
Supply voltage		24 V DC ± 10 % Ripple P-P 10 % or less		
Power consumption		1.7 W approx. (at 24 V DC) (without any connected devices)		
Power supply for light curtain		24 V DC ± 10 %		
Fuse (power supply)		Hybrid fuse, triggering current: 1.1 A or more, Reset after power down		
OSSD input		PNP transistor 2 inputs (S1, S2)		
Enabling path		NO contact × 3 (13-14, 23-24, 33-34)		
	Utilization category	AC-15, DC-13 (EN 60947-5-1)		
	Rated operational cur- rent (le)(Note 2) / Rated operational voltage	6 A / 30 V DC, 6 A / 230 V AC, resistive load		
	Contact material / contacts	AgSnO, Self cleaning, positively driven		
	Contact resistance	100 mΩ or less (initial value)		
	Fuse	6 A (slow blow)		
	Mechanical lifetime	10 million times (switching frequency 180 times/min.)		
	Electrical lifetime	100,000 times (switching frequency 20 times/min, rated load)		
310	d	At min.load:20,000,000 / At max.load :400,000 (ISO 13849-1)		
Pick-up delay		40 ms or less (Automatic reset), 50 ms or less (Manual reset)		
Drop-out delay		10 ms or less		
Auxiliary output		NC contact × 1 (41-42)		
	Switching current	1 A / 24 V DC		
	Fuse	1 A (slow blow)		
Alarr	m output (Note 3)	NC contact × 1 (51-52) (Non-safety contact, related to input "Alarm in")		
	Switching current	Max. 1 A / 24 V DC, Min. 5 mA / 24 V DC		
	Fuse	1 A (slow blow)		
Indicators	Power	Green LED (lights up when the power is supplied)		
	Internal circuit operation (Ui)	Green LED (lights up when both conditions are present: unit is powered up and hybrid fuse is at normal state)		
	Relay operation (K1 / K2)	Green LED × 2 (lights up when enabling contacts are closed)		
	Test input (Test)	Yellow LED (lights up when X11-X12 is opened)		
External relay monitor function		Incorporated		
Trailing edge function		Incorporated		
Test input polarity selection function		Incorporated (Selectable PNP or NPN test input polarity by internal switch)		
Excess voltage category		III		
Rated impulse-withstand voltage (Uimp)		4 kV		
Pollution degree		2		
Environmental resistance	Degree of protection	Enclosure : IP40, Terminal : IP20		
	Ambient temperature	-10 to +55 °C +14 to +131 °F, Storage: -10 to +55 °C +14 to +131 °F		
	Ambient humidity	35 to 85 % RH, Storage: 35 to 85 % RH		
	Vibration resistance	10 to 55 Hz frequency, 0.35 mm 0.014 in amplitude in X, Y, Z directions for three times each (in power OFF state)		
	Shock resistance	15 G (150 m/s² approx.) Effective impulse time 11ms		
Material		Enclosure: Polycarbonate		
Connection terminal		Removable European terminal		
Tightening torque		0.6 N·m		
Wiring cable		0.2 to 2.5 mm² [including single wire or ferrule (sleeve)]		
Mounting		Complies with 35 mm width DIN rail (EN 50022)		
144 1 1 4				

Weight Net weight: 400 g approx.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.

2) The rated operational current (le) varies depending on the ambient temperature. For details, refer to "Derating (p.726)" in "PRECAUTIONS FOR PROPER USE".

3) The alarm output is "open" when the alarm input from the light curtain is ON.

Light curtain SF4B series wiring diagram (Supports to Control category 4) Light curtain SF2B series wiring diagram (Supports to Control category 2)

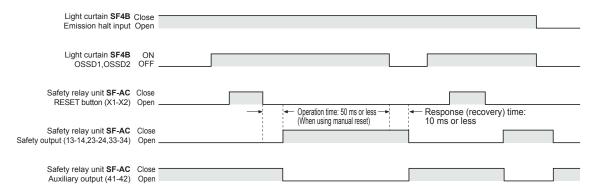

Notes: 1) If using the equipment with the manual reset, wire X1 to X2 as per the illustration above.

If using with the automatic reset, disconnect X2 wire and connect it to X3. In this case, reset button is not required.

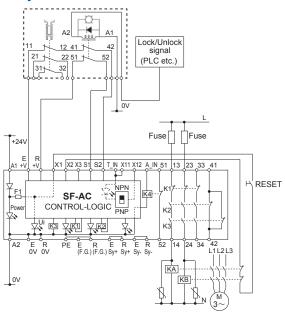

2) Use a momentary-type switch for the reset button.

PRECAUTIONS FOR PROPER USE

Note that **SF-AC** cannot be connected to the NPN output (equivalent) type light curtain.

Wiring

Please install and connect ferrule (stick) terminal when the lead wire of the connected equipment is a twisted wire. Please do not connect the twisted wire directly with the terminal

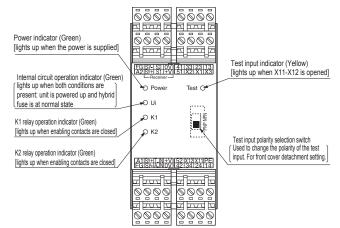

Tighten the wiring to the wiring terminal block at tightening torque of $0.6\ N$ m.

Others

The seal as shown in the drawing on the right is stuck to the engagement point of unit. When the seal is peeled off or broken, this equipment will not be certified as 'Safety equipment'.
