Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SG78xxA/78xx

Positive Fixed Voltage Regulator

PRODUCT DATASHEET

DESCRIPTION

The SG78xxA/SG78xx series of positive regulators offer self contained, fixed-voltage capability with up to 1.5A of load current and input voltage up to 50V (SG78xxA series only). These units feature a unique on-chip trimming system to set the output voltages to within ±1.5% of nominal on the SG78xxA series, ±2.0% on the SG78xx series. The SG78xxA versions also offer much improved line and load regulation characteristics. Utilizing an improved bandgap reference design, problems have been eliminated that are normally associated with the Zener diode references, such as drift in output voltage and large changes in the line and load regulation.

All protective features of thermal shutdown, current limiting, and safe-area control have been designed into these units and since these regulators require only a small output capacitor for satisfactory performance, ease of application is assured. Although designed as fixed-voltage regulators, the output voltage can be increased through the use of a simple voltage divider. The low quiescent drain current of the device insures good regulation when this method is used. Product is available in hermetically sealed TO-257 (both case grounded 'G' and isolated 'IG'), TO-3, TO-39 and LCC packages.

KEY FEATURES

- Output Voltage Set Internally to ±1.5% on SG78xxA
- Input Voltage Range to 50V max. on SG78xxA
- Two Volt Input-Output Differential
- Excellent Line and Load Regulation
- Foldback Current Limiting
- Thermal Overload Protection
- Voltages Available: 5V, 12V, 15V
- Contact Factory for Other Voltage Options
- Available in Surface Mount Package

HIGH RELIABILITY FEATURES
- SG78xxA/78xx

- Available to MIL-STD – 883, ¶ 1.2.1
- MIL-M38510/10702BXA - JAN7805T
- MIL-M38510/10703BXA - JAN7812T
- MIL-M38510/10704BXA - JAN7815T
- MIL-M38510/10706BYA - JAN7805K
- MIL-M38510/10707BYA - JAN7812K
- MIL-M38510/10708BYA - JAN7815K
- Radiation Data Available
- MSC-AMSG level "S" Processing Available
- Available to DSCC
  – Standard Microcircuit Drawing (SMD)

ABSOLUTE MAXIMUM RATINGS

Device Output Voltage	Input Voltage	Input Voltage (Transient)(Note 3)	Input Voltage Differential (Output Shorted to Ground)
5V	35V	50V	35V
12V	35V	50V	35V
15V	35V	50V	35V

Operating Junction Temperature ..... 150°C
Storage Temperature Range ..... -65°C to 150°C
Lead Temperature (Soldering 10 seconds) ..... 300°C

Note: Exceeding these ratings could cause damage to the device. All voltages are with respect to Ground. Currents are positive into, negative out of specified terminal.

Note 3: Operation at high input voltages is dependent upon load current. When load current is less than 5mA, output will rise out of regulation as input-output differential increases beyond 30V. Note also from figure 1, that maximum load current is reduced at high voltages. The 50V input rating of the SG78xxA series refers to ability to withstand high line or transient conditions without damage. Since the regulator's maximum current capability is reduced, the output may fall out of regulation at high input voltages under nominal loading.
