Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Data sheet

Baby SilverLine with 2.5 A

SL2.100

- Input: AC 230V / 115V
- Output: 24V / 2.5A
- High overload current, no switch-off
- Quasi-Wide-Range Input
- Robust mechanics and EMC
- NEC Class 2 Power Supply

EMC and Low Volt. Directive

UL60950 E137006
CUL/CSA-C22.2 No. 60950

UL508 LISTED
IND. CONT. EQ.
18 WM, 60°C

IEC60950

Data sheet

Input

Input voltage	AC100-120/220-240 V (switchable), 47-63 Hz (85-132 VAC / 176-264 VAC, 160-375 VDC, see also „Output: Continuous Loading“)

Quasi-Wide-Range Input: With the switch in the 230V position the power-supply unit operates at low and moderate loads at any input voltage between 95 and 264 V AC (see 'Output' at the right side).
Note: At DC input, always leave the switch in the 230V position

Input current	< 1.3 A (switch in 115V position) < 0.7 A (switch in 230V position)
DC input current at open output	typ. 5.3 mA at 110 VDC, 3.9 mA at 300 VDC (preserves battery sources)
Inrush current	typ. 25 A at 264 V AC and cold start

Unit is internally fused (fuse not accessible). For external fusing of unit and for input line protection, use circuit breaker with B-characteristic 10A or slower action, or alternatively T10A HBC fuse.

EN 61000-3-2 (harmonic current emissions) is fulfilled

Transient handling	Transient resistance acc. to VDE 0160 / W2 (750 V / 1.3 ms), for *all* load conditions.
Hold up time	> 20 ms at 196 VAC, 24 V / 2.5 A (see Diagram overleaf)

Efficiency, Reliability etc.*

Efficiency	typ. 87.5 %	(230 VAC, 24 V / 2.5 A)
Losses	typ. 8.6 W	(230 VAC, 24 V / 2.5 A)
MTBF	740,000 h acc. to Siemensnorm SN 29500 (24 V/2.5 A, 230 VAC, T_{amb} = +40 °C)	
Life cycle (electrolytics)	The unit exclusively uses longlife electrolytics, specified for +105°C (cf. 'The SilverLine', p.2).	

Output

Output voltage	24 V DC +5 % –1% *(12V on request)*
Output noise suppression	Radiated EMI values below EN 61000-6-3, even when using long, unscreened output cables.
Ambient temperature range T_{amb}	Operation: -10°C...+70°C (>60°C: Derating) Storage: -25°C...+85°C

Continuous loading (at T_{amb} = -10°C...+60°C, convection cooling), see also Diagram overleaf. For start at T_{amb}<0°C and low input voltage, please contact PULS.
* For start with DC input > 95 V DC needed

Switch	AC/DCin		Iout
230V	176-264 V	ACin	2,5 A
	95-176 V	ACin	1,5 A
	160-375 V	DCin	2,5 A
	120-160 V	DCin	2,0 A
	80*-120 V	DCin	1,5 A
115V	85-132 V	ACin	2.5 A

Output protected against short circuit, open circuit and overload

Derating	typ. 1.5 W/K (at T_{amb}=+60°C...+70°C)
Voltage regulation	better than 2% Vout overall
Ripple / Noise	< 25 mV_{PP}, (20 MHz bandw., 50 Ω measurem.)
Overvolt. protection	typ. 32 V
Parallel operation	yes; current sharing available on request
Power back immunity	26 V
Front panel indicator	Green LED, goes out at V_{out} < 18V

Start / Overload Behaviour

Startup delay	typ. 0.1 s
Rise time	ca. 5-20 ms, depending on load

Overload Behaviour
- Special PULS Overload Design (see diagram overleaf)
  - no disconnection, no hiccup if overloaded
  - high overload current (up to 1.5 I_{Nom}), Vout is gradually reduced with increasing current.

Advantages:
- High short-circuit current, giving large 'start-up window': unit starts reliably even with awkward loads (DC-DC converters, motors).
- No 'sticking' such as can occur with fold-back characteristics
- Secondary fuses operate reliably

Order information

Order number	Description
SL2.100	(Basic version*)
SLR2.100	(N+1 redundancy*)
SLZ02	(Screw mounting set, two needed per unit)

Construction / Mechanics*

Housing dimensions and Weight

- W x H x D 49 mm x 124 mm x 102 mm (+ DIN rail)
- Free space for ventilation above/below 25 mm recommended
  right 10 mm recommended (front view)
- Weight 460 g

Design advantages:

- All connection blocks are easy to reach as mounted at the front panel.
- Input and output are strictly apart from each other and so cannot be mixed up (Input below, output above).

* *For further information see data sheets „The SilverLine“, „SilverLine Family Branches“ and mechanics data sheet

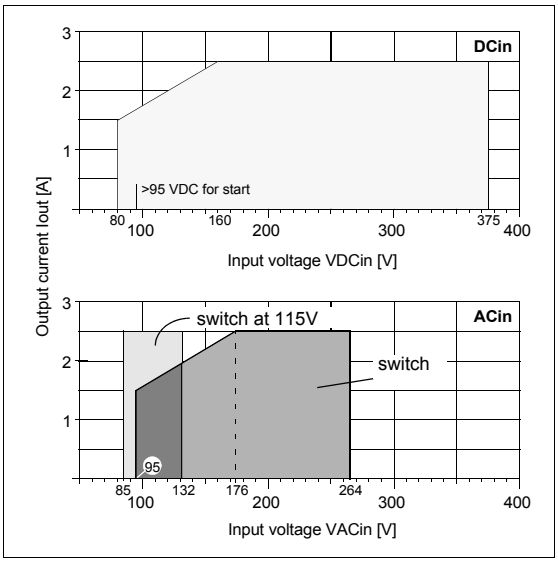
For further information, especially about

- EMC
- Connections
- Safety, Approvals
- Mechanics und Mounting,

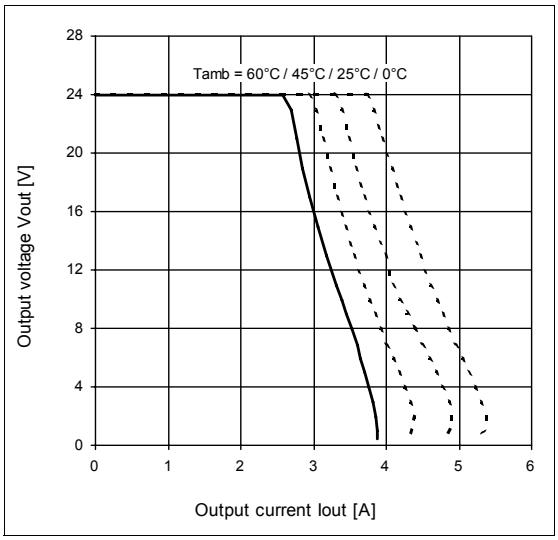
see page 2 of the „The SilverLine“ data sheet.

For detailed dimensions
see SilverLine mechanics data sheet SL2/ SL5/ SL10

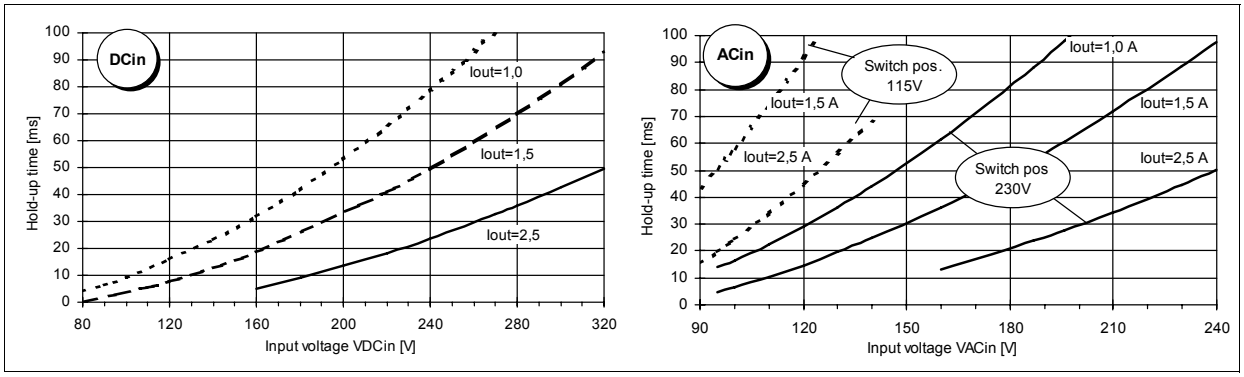
Output Current over Input Voltage (min.)



Output characteristic (min.)



Hold-up time (min.)



Unless otherwise stated, specifications are valid for AC 230V input voltage, +25°C ambient temperature, and 5 min. run-in time. They are subject to change without prior notice.
