

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

18 WIM, 60°C

Data sheet

- Input: 3 AC 400–500 V
- Output: 24...28V / 120 W
- Power boost up to 144 W
- High overload current, no switch-off
- 3 phase wide range input
- Robust mechanics and EMC

Input

Input voltage	3 AC 400–500 V, $\pm 15\%$ 47-63 Hz, suitable for IT power systems
Rated tolerances	(at 24V/5A)
• Continuous operat.	340...576 V AC resp. 450...820 V DC
• Short term (1 min.)	300...620 V AC resp. 420...890 V DC
Even if one phase fails, the unit's operation with nominal current can be continued (limitations: EN 61000-3-2 (harmonic current emissions) is then not fulfilled, the unit has noise suppression level A instead of level B and the hold-up time is shorter). Continued operat. with two phases is also permissible; however, it reduces the unit's reliability and lifetime.	
Input current	3 x 0.5 A
Inrush current	typ. <25A at 575 V AC and cold-start
To be fused with a 3 x 10A, B-type 'circuit-breaker' switch based on the usual thermomagnetic overload sensing principle (used anyway to fuse the input lines; unit has no internal fuses).	
Harmonic current emissions (PFC)	acc. to EN 61000-3-2
Hold-up time	>16 ms (3 phase op. at 400 VAC, 24 V / 5 A) >10 ms (2 phase op. at 400 VAC, 24 V / 5 A)

Efficiency, Reliability etc.*

Efficiency	typ. 89% (3 AC 400V, 24 V / 5 A)
Losses	typ. 15 W (3 AC 400V, 24 V / 5 A)
MTBF	410.000 h acc. to Siemensnorm 29500 (24 V/5 A, 3 AC 400V, $T_U = 40^\circ\text{C}$)
Life cycle (electrolytics)	The unit exclusively uses longlife electrolytics, specified for +105°C (cf. 'The SilverLine', p.2).

* For further information see data sheets „The SilverLine“, „SilverLine Family Branches“ and mechanics data sheet (mechanical design equals that of the SL20.100).

Start / Overload Behaviour

Startup delay	typ. 0.1 s
Rise time	ca. 5-20 ms, depending on load

Overload Behaviour

- Special PULS Overload Design (see diagram overleaf) no disconnection, no hiccup if overloaded high overload current (up to typ. $2 \cdot I_{Nom}$), V_{out} is reduced with increasing current.
- 20% power boost 6 A short-term, at 45°C or forced cooling even continuous

Advantages:

- High short-circuit current, giving large 'start-up window': unit starts reliably even with awkward loads such as DC-DC converters.
- Secondary fuses operate more reliably

Output

Output voltage	24...28 V DC, adjustable by (covered) front panel potentiometer, preset: 24.5 V $\pm 0.5\%$ Adjusting range guaranteed			
Output noise suppression	EN 61000-6-3 (class B) is fulfilled even when using long, unscreened output cables			
Ambient temperature range T_{amb}	Operation: $-10^\circ\text{C}...+70^\circ\text{C}$ (>60°C: Derating) Storage: $-25^\circ\text{C}...+85^\circ\text{C}$			
Rated continuous loading with convection cooling	Input	T_{amb}	$I_{out @ 24V}$	$I_{out @ 28V}$
	3-phase	$-10^\circ\text{C}...+60^\circ\text{C}$ $-10^\circ\text{C}...+45^\circ\text{C}$	5 A 6 A*	4,3 A 5,1 A*
Output is protected against short-circuit, open circuit and overload	2-phase	$-10...+60$	5 A	4,3 A
	DC in	$-10...+60$ $-10^\circ\text{C}...+45^\circ\text{C}$	5 A 6 A*	4,3 A 5,1 A*
* * short-term (< 1 min) or with forced air-cooling also at 60°C admissible				
Derating	typ. 6W/K (at $T_{amb}=+60^\circ\text{C}...+70^\circ\text{C}$)			
Voltage regulation	better than 2% V_{out} overall			
Ripple / Noise	< 25 mV _{pp} , (20 MHz bandw., 50 Ω measurem.)			
Overvolt. protection	typ. 33 V			
Serial connection	not allowed			
Parallel operation	yes; current sharing available on request			
Power back immunity	34 V; inapplicable for inductive loads			
Front panel indicator	green LED off, at $V_{out}<20V$			

Construction / Mechanics

Housing dimensions and Weight

- W x H x D 73 mm x 124 mm x 117 mm (+ DIN rail)
- Free space for ventilation above/below 50 mm recommended left/right 15 mm recommended
- Weight 730 g

Design advantages:

- All connection blocks are easy to reach as mounted at the front panel.
- Input and output are strictly apart from each other and so cannot be mixed up (Input below, output above).

* For further information see data sheets "the SilverLine", "SilverLine Family Branches" and mechanics data sheet

Order information

Order number	Description
SL5.300	
SLZ01	Screw mounting set, two needed per unit

Hold-up time, 3-phase (min., at $V_{out}=24V$)

Output characteristic (min.)

Hold-up time, 2-phase (min., at $V_{out}=24V$)

Efficiency (typ., at $V_{out}=24V$)

For further information, especially about

- EMC
- Connections
- Safety, Approvals
- Mechanics und Mounting,

see page 2 of the „The SilverLine“ data sheet.

For detailed dimensions

see SilverLine mechanics data sheet SL2.5/ SL5/ SL10

Specifications valid for 3AC 400V input voltage, +25°C ambient temperature, and 5 min run-in time, unless otherwise stated. They are subject to change without prior notice.
