## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Description

Primary pulsed switched mode power supply (SMPS) for rail mounting, wide range input, integral active power factor correction (PFC), high power reserve and selectable parallel mode.

## Features and Benefits

- Wide range voltage input from AC 90 to 264 V
- Efficiency up to $90 \%$
- Integral power factor compensation
- Parallel mode for performance improvement (selectable by switch)

## Typical applications

Process control, industrial switch- and controlgear, machine construction, telecommunication systems

## Order numbering code

Type No.
SMP21 Single phase switch-mode power supply for rail mounting
Connector design
L pcb mounting (preferred type)
S plug-in type
Terminal design
20 screw terminals
Output voltage
DC24V DC 24 V
Output current
20 A
SMP21-L20-DC24V-20A ordering example

## Approvals

| Approval <br> authority | Standards |
| :--- | :--- |
| UL | UL508, CSA C22.2 No. 107.1 (listed) <br> UL 60950-1, CSAC22.2 No. 60950-1 (recognized) |
| TÜV <br> Rheinland | EN 60950-1 / EN61558-1 / EN61558-2-16 |

## EMC

EN 61000-6-3, EN 61000-6-2, EN 61204-3

Technical data $\left(T_{U}=25^{\circ} \mathrm{C}, \mathrm{U}_{\mathrm{B}}=\mathrm{AC} 100 . . .240 \mathrm{~V}, \mathrm{I}_{0}=20 \mathrm{~A}\right)$

| Operating data |  |
| :---: | :---: |
| Input voltage ranges $\mathrm{U}_{\mathrm{E}}$ | AC 90... 264 V |
| Operating voltage range $U_{B}$ | AC 100... 240 V |
| Effective output | 480 W |
| Output voltage $\mathrm{U}_{0}$ | 24 V SELV |
| Output current rating $\mathrm{I}_{0}$ | 20 A |
| Efficiency | $87 \%$ min. / $90 \%$ typically |
| General data |  |
| Switching frequency | 60 kHz |
| Insulation voltage between input and output input and protective conductor output and protective conductor | AC 3000 V, DC 4242 V AC 1500 V, DC 2121 V AC $500 \mathrm{~V}, \mathrm{DC} 710 \mathrm{~V}$ |
| Insulation resistance | $100 \mathrm{M} \Omega(\mathrm{DC} 500 \mathrm{~V})$ between input and output |
| Ambient temperature | $-40^{\circ} \mathrm{C} \ldots+71^{\circ} \mathrm{C}$ |
| Derating factor (see curve) | $2.5 \% /{ }^{\circ} \mathrm{C}$ |
| Storage temperature | $-40^{\circ} \mathrm{C} \ldots+85^{\circ} \mathrm{C}$ |
| Relative humidity | 20... 90 \% RH |
| MTBF to Bellcore, ed. 6 | 469,000 hours at $40^{\circ} \mathrm{C}, \mathrm{GB}$ |
| Max. altitude in operation to IEC 60068-2-13 | 5000 m above sea level |
| Cooling | by convection |
| Mounting direction | wall-mounted (see dimensions) |
| Pollution degree | 2 |
| Input circuit |  |
| Input rated voltage | AC 100... 240 V |
| Input voltage range | AC 90... 264 V |
| Input current | 2.5 A typically at $\mathrm{U}_{\mathrm{B}}=\mathrm{AC} 230 \mathrm{~V}$ 4.9 A typically at $\mathrm{U}_{\mathrm{B}}=\mathrm{AC} 115 \mathrm{~V}$ |
| Max. input current | $\begin{aligned} & 3.5 \mathrm{~A} \text { at } \mathrm{U}_{\mathrm{B}}=\mathrm{AC} 180 \mathrm{~V} \\ & 7.0 \mathrm{~A} \text { at } \mathrm{U}_{\mathrm{B}}=\mathrm{AC} 90 \mathrm{~V} \end{aligned}$ |
| Supply frequency | $47 . . .63 \mathrm{~Hz}$ |

Technical data ( $\left.\mathrm{T}_{\mathrm{U}}=25^{\circ} \mathrm{C}, \mathrm{U}_{\mathrm{B}}=\mathrm{AC} 100 \ldots 240 \mathrm{~V}, \mathrm{I}_{0}=20 \mathrm{~A}\right)$

Technical data ( $\left.\mathrm{T}_{\mathrm{U}}=25^{\circ} \mathrm{C}, \mathrm{U}_{\mathrm{B}}=\mathrm{AC} 100 \ldots 240 \mathrm{~V}, \mathrm{I}_{0}=20 \mathrm{~A}\right)$

## Control and protection circuit

| input protection | internal blade fuse T10A / AC 250 V |
| :---: | :---: |
| Recommended back-up fuse | 1-pole MCB, e.g. E-T-A type 4230 |
| Current rating | $10 \mathrm{~A} / 16 \mathrm{~A} \rightarrow$ max. 20 A |
| Characteristic curve | B / C / D |
| Internal overvoltage protection | varistor |
| available power (output RDY) | Contact closed at: DC 17.6...19.4 V |
| Insulation voltage Contact load at | DC 500 V (to output) DC 60 V / 0.3 A |
| Overvoltage protection | $30 . .33 \mathrm{~V}$ at $0.8 \times \mathrm{I}_{0}$ |
| Degree of protection | IP20 |
| Physical data |  |
| Dimensions ( $\mathrm{h} \times \mathrm{w} \times \mathrm{d}$ ) version L20 with screw terminals: Version S20 with removeable plug | $124.5 \times 175.5 \times 123.6 \mathrm{~mm}$ ( $4,9 \times 6,91 \times 4,87$ inches) $143.5 \times 175.5 \times 123.6 \mathrm{~mm}$ ( $5.65 \times 6.91 \times 4.87$ inches) |
| Housing material: | metal |
| Mass | approx. 1920 g |
| Vibration (random vibration, to IEC 60068-2-6) | mounted on symmetrical rail, $10-500 \mathrm{~Hz}$, 2 g , on $\mathrm{X}, \mathrm{Y} \& \mathrm{Z}$ axis, 60 minutes per axis |
| Shock (to IEC 60068-2-27,) | $15 \mathrm{~g}(11 \mathrm{~ms}), 3$ axes, 6 sides, 3 times per side |

## Dimensions

## Mounting and Installation

| Mounting | snap onto DIN rail (TS35/7.5 or <br> TS35/15) |
| :--- | :--- |
| Ventilation / cooling | normal air convection, recommended <br> distance on each side 25 mm |
| Mounting position | wall-mounted with the input terminals <br> pointing downwards (see dimensions) |

Version L20 with screw terminals:

Version $\mathbf{S} 20$ with removeable plug

| Screw terminals | input terminal |
| :---: | :--- |
|  | AWG24-10 $\left(0.2 \mathrm{~mm}^{2}-4 \mathrm{~mm}^{2}\right)$ flexible/rigid |
|  | output terminal |
|  | AWG24-10 $\left(0.2 \mathrm{~mm}^{2}-4 \mathrm{~mm}^{2}\right)$ flexible/rigid |
| Tightening torque | input connector $\quad 0.5 \mathrm{Nm}$ max. |
|  | Output connector |
|  | 0.8 Nm max. |

## Pin assignment - Display - Controls

| pin no. | name | Description |
| :--- | :--- | :--- |
| 1,2 | $\mathrm{~V}-$ | output voltage - |
| 3,4 | V + | output voltage + |
| 5 | RDY | limit value DC ON, relay contact <br> (make contact) |
| 6 | L | Input voltage, phase conductor <br> (not polarised with DC input voltage) |
| 7 | N | Input voltage, neutral conductor <br> (not polarised with DC input voltage) |
| 8 | PE | earth conductor <br> 9 |
|  | DC LO | VC LOW output voltage LED indication |
|  | Vout Adj | potentiometer for adjustment of output <br> voltage U |
|  | S/P | change-over switch single / parallel mode |

time $20 \mathrm{~ms} /$ Div.

Application example with protection by 4230-T and REF16-S

## Notes for installation

- The power distribution system must only be installed by qualified personnel.
- Only after expert installation must the device be supplied with power.
- The user has to ensure that the cable cross section complies with the applicable current rating.
- The national standards (e.g. for Germany DIN VDE 0100) have to be observed for installation and selection of feed and return cables.
- Recommended circuit breaker for the primary input cable protection: E-T-A type 4230 IN max. 20 A
- Recommended selective overcurrent protection for the secondary output protection: E-T-A types ESS.., ESX.., und REF...
- In addition special precautions must be taken in the system or machine (e.g. use of a safety PLC) which reliably prevent an automatic re-start of parts of the system (cf. Machinery Directive 2006/42/EU and EN 60204-1, Safety of Machinery). In the event of a failure (short circuit/overload) the load circuit will be disconnected by the circuit breaker/protector or the switched mode power supply.
