

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Description

Switched mode power supply (SMP) for rail mounting, three-phase supply voltage, high efficiency, integral input filter and temperature protection, high power reserve and optional parallel mode.

Features and Benefits

- Wide range voltage input from AC 340 to 575 V
- Efficiency up to 92%
- Integral input filter and temperature protection
- Parallel mode for performance improvement (selectable by switch)

Typical applications

Process control, industrial switch- and controlgear, machine construction, telecommunication systems

Order numbering code

Type No.

SMP23 Three-phase switch-mode power supply for rail mounting

Connector design

L pcb-mounted

Terminal design

20 screw terminals

Output voltage

DC24V DC 24 V

Output current

40 A

SMP23-L20-DC24V-40A ordering example

Approvals

Approval authority	Standards
UL	UL508, CSA C22.2 No. 107.1 (listed) UL 60950-1, CSAC22.2 No. 60950-1 (recognized)
TÜV Rheinland	EN 60950-1 EN 61558-1, EN 61558-2-16

EMC

EN 61000-6-3, EN 61000-6-2, EN 61204-3

SMP23-L20-DC24V-40A

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\text{...}500\text{ V}$, $I_0 = 10\text{ A}$)

Operating data

Input voltage ranges U_E	AC 340...575 V
Operating voltage range U_B	AC 400 V...AC 500 V
Effective output	960 W
Output voltage U_0	24 V SELV
Output current rating I_0	40 A
Efficiency	90 % min. / 92 % typically

General data

Switching frequency	52 kHz
Insulation voltage between input and output	AC 3000 V, DC 4242 V
Insulation voltage between input and protective conductor	AC 1500 V, DC 2121 V
Insulation voltage between output and protective conductor	AC 500 V, DC 710 V
Insulation resistance	100 M Ω (DC 500 V) between input and output
Ambient temperature	-40°C...+71°C
Derating factor (see curve)	3.5 % / °C
Storage temperature	-40°C...+85°C
Relative humidity	20...95 % RH
MTBF to Bellcore, ed. 6	352,000 hours at 40°C, GB
Max. altitude in operation to IEC 60068-2-13	5000 m above sea level
Cooling	by convection
Mounting direction	wall-mounted (see dimensions)
Pollution degree	2

Input circuit

Input rated voltage	three-phase or single phase* AC 400 V...AC 500 V
Input voltage ranges	AC 340...575 V
Input current	1.5 A typically at $U_B = \text{AC } 500\text{ V}$ 1.72 A typically at $U_B = \text{AC } 400\text{ V}$
Max. input current	2.4 A typically at $U_B = \text{AC } 340\text{ V}$
Supply frequency	47...63 Hz

* with single phase supply voltage the output current is only 75% of the rated current

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\text{...}500 \text{ V}$, $I_0 = 10 \text{ A}$)

Inrush current at AC 380 V / 480 V	30 A typically, 35 A max.
Power loss (at U_B 400 V, I_0 40A)	98 W typically
power factor compensation (passive)	typically 0.8
Output circuit	
Rated voltage U_0	DC 24 V SELV
Current rating I_0	40 A
Output voltage accuracy	0...+1 %
Min. load	0 %
Supply regulation	$\pm 0.5 \%$ at U_E min... U_E max.
Load regulation	
Single mode	$\pm 1 \%$
Parallel mode	$\pm 5 \%$
Voltage adjustment range	DC 22.5...28.5 V at $0.8 \times I_0$
Continuous load	40 A at $U_0 = \text{DC } 24 \text{ V}$, 33.5 A at $U_0 = \text{DC } 28.5 \text{ V}$
Power boost factor	typically 120% (110%...135% see output curve)
Short circuit behaviour	Hiccup mode
Exposure time	15 ms
ON delay at:	
resistive load	1 s
capacitive load of 7,000 μF	1.5 s
Rise time at:	
resistive load	150 ms
capacitive load of 7,000 μF	0.5 s
Release time	150 ms
Residual ripple	80 mV, spectrum = 20 MHz
Power back immunity	DC 35 V min.
Capacitive load	7,000 μF max.
Parallel mode	3 power supplies max. at $0.1 \times I_0\text{...}0.9 \times I_0$

Technical data ($T_U = 25^\circ\text{C}$, $U_B = \text{AC } 400\text{...}500 \text{ V}$, $I_0 = 10 \text{ A}$)

Control and protection circuit	
input protection	internal fuse T5A / AC 500 V per phase
Recommended back-up fuse	3-pole MCB, e.g. E-T-A type 4230
Current rating	10 A / 16 A \rightarrow max. 20 A
Characteristic curve	B / C / D
Internal overvoltage protection	varistor
available power (output RDY)	Contact closed at: DC 17.6...19.4 V
Insulation voltage	DC 500 V (to output)
Contact load at	DC 60 V / 0.3 A
Overvoltage protection	30...33 V at $0.8 \times I_0$
Temperature protection:	100 $^\circ\text{C}$...110 $^\circ\text{C}$ measured at the heat sink, disconnection of output voltage, automatic reset after temperature reduction
Degree of protection	IP20
Physical data	
Dimensions (h x w x d) version with screw terminals:	126.2 x 275.8 x 118.8 mm (4.97 x 10.86 x 4.87 inches)
Housing material:	metal
Mass	approx. 3400 g
Vibration (random vibration to IEC 60068-2-6)	mounted on symmetrical rail, 10 - 500 Hz, 2 g, on X, Y & Z axis, 60 minutes per axis
Shock (to IEC 60068-2-27,)	15 g (11 ms), 3 axes, 6 sides, 3 times per side

Dimensions

3

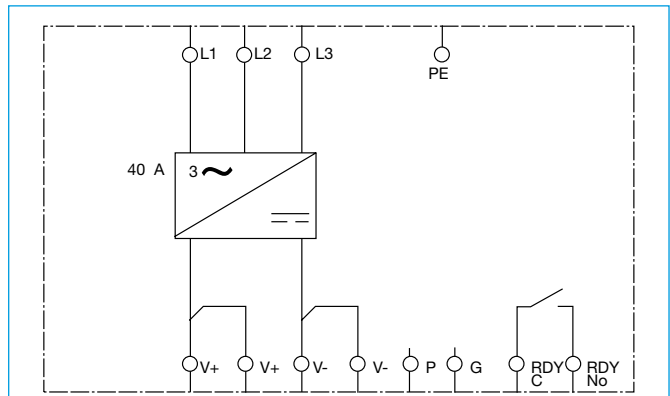

Mounting and Installation

Mounting	snap onto DIN rail (TS35/7.5 or TS35/15)
Ventilation / cooling	normal air convection, recommended distance on each side 25 mm
Mounting position	The device should be mounted horizontally with the secondary input terminals pointing downwards (see dimensions)

Version with screw terminals:

Screw terminals	input terminal	AWG24-10 (0.2 mm ² – 4 mm ²) flexible/rigid	
	RDY, P, G termina	AWG24-10 (0.2 mm ² – 4 mm ²) flexible/rigid	
Output terminal	Output terminal	AWG24-10 (0.5 mm ² – 10 mm ²) flexible/rigid	
Tightening torque	Input connector	1 Nm max.	
	Output connector	0.6 Nm max.	
Wire stripping length	8 mm		

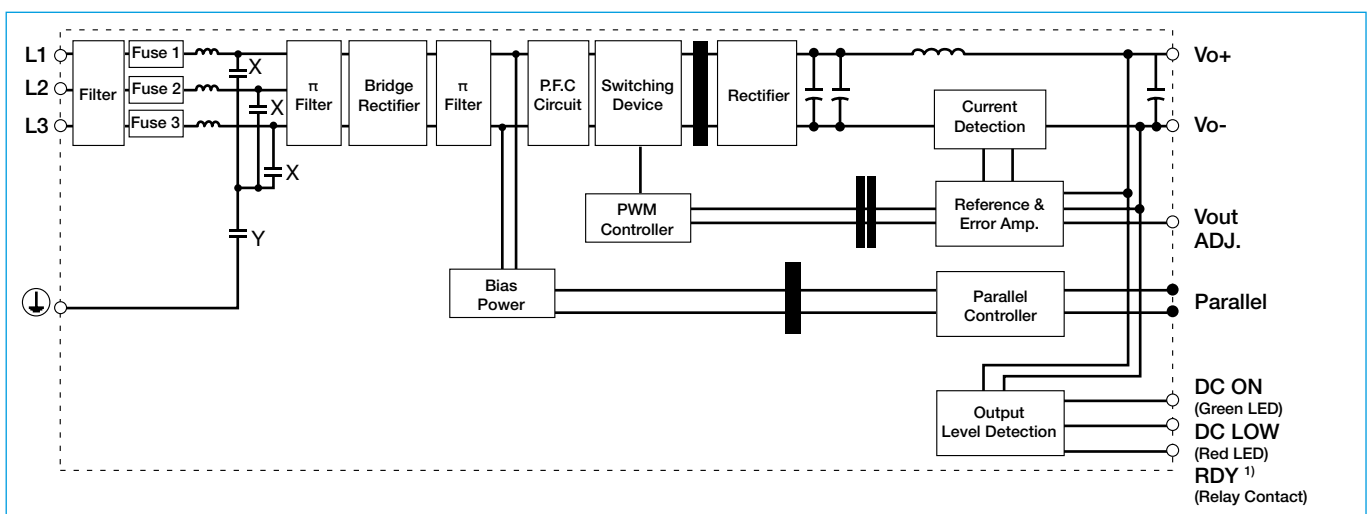

Pin assignment - Display - Controls

pin no.	name	description
1, 2	V -	output voltage -
3, 4	V +	output voltage +
5	P	joint ground for parallel connection
6	G	joint current connection with parallel connection
7		
8	RDY	limit value DC ON, relay contact (make contact)
9	L3	input voltage, phase conductor
10	L2	input voltage, phase conductor
11	L1	input voltage, phase conductor
12	PE	earth conductor
	DC ON	visual status indication with LED
	DC LO	DC LOW output voltage LED indication
	Vout Adj	potentiometer for adjustment of the output voltage U_0

Typical efficiency curve

Notes for installation

- The power distribution system must only be installed by qualified personnel.
- Only after expert installation must the device be supplied with power.
- The user has to ensure that the cable cross section complies with the applicable current rating.
- The national standards (e.g. for Germany DIN VDE 0100) have to be observed for installation and selection of feed and return cables.
- Recommended circuit breaker for the primary input cable protection: E-T-A type 4230 IN max. 20 A
- Recommended selective overcurrent protection for the secondary output protection: E-T-A types ESS., ESX., und REF...
- In addition special precautions must be taken in the system or machine (e.g. use of a safety PLC) which reliably prevent an automatic re-start of parts of the system (cf. Machinery Directive 98/37/EG and EN 60204-1, Safety of Machinery). In the event of a failure (short circuit/overload) the load circuit will be disconnected by the circuit breaker/protector or the switched mode power supply.

Current-voltage curve

current-voltage-curve → short circuit → hiccup mode

current: — 50 A / Div
voltage: - - - 10 V / Div
time 20 ms / Div.

current: — 20 A / Div
voltage: - - - 10 V / Div
time 20 ms / Div.

Application example with protection by 4230-T and REF16-S

Parallel connection of 2 switch-mode power supplies

Current-voltage curve

current-voltage-curve → short circuit → output REF16-S101-DC24V-6A (F5)

current: — 2 A / Div
voltage: - - - 10 V / Div
time 20 ms / Div.

All dimensions without tolerances are for reference only. E-T-A reserves the right change specifications at any time in the interest of improved design, performance and cost effectiveness, the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.
