## ▶▶▶ Remote Management, Monitoring & Control Software

Red Lion's SixView Manager™ software offers remote management of Sixnet series industrial cellular RTUs and routers to reduce operating costs and drive productivity.

With a web-based console and customized dashboard, users are able to remotely access, configure and manage critical device information for several, even thousands, of Sixnet series RAM® cellular RTUs and IndustrialPro® SN routers from a central location. Key metrics—such as signal strength, data usage, connectivity, IP addresses and alarms—are displayed in real time to help simplify troubleshooting. Administrators can remotely set user-based access control parameters, upgrade firmware, configure VPNs and update firewall settings, thereby saving time and reducing maintenance costs.

### APPLICATIONS

- > Power and Energy
- > Oil and Gas/Pipeline
- > Water/Wastewater
- > Transportation
- > Video and Security

### PRODUCT HIGHLIGHTS

- > Remote site management lowers total cost of ownership
- > Mass configuration simplifies and accelerates deployment
- > Configurable parameters enhance security
- > Manage thousands of devices from a central web-based console

### FEATURES & BENEFITS

- > Mass Configuration Saves Time & Deployment Costs
- > Auto Provisioning Prevents Unwanted Access
  - Initial unit configuration
  - Firmware updates
  - VPN configuration
  - Firewall policy enforcement
  - Mass unit migration
- > Remote Troubleshooting Saves Truck Rolls
- > Control Enables faster troubleshooting
  - Change and update firmware
  - Change or update policies
  - Remote reboot
  - Delete or modify user access rights
- > Remote Administration of Multiple Devices Simplifies Ease of Use
  - Configuration changes
  - Job scheduling (single or multi device)
  - Intent-to-edit protections
  - Customize data grid views
  - Control user permissions (control editing capabilities)
- > Remote Monitoring Provides Real-Time Status
- > Reporting of Key Metrics Enable Proactive Decision Making
  - Up-time
  - Utilization
  - Signal strength
  - Firmware version
  - ESN, MDN or IMEI
  - IP address

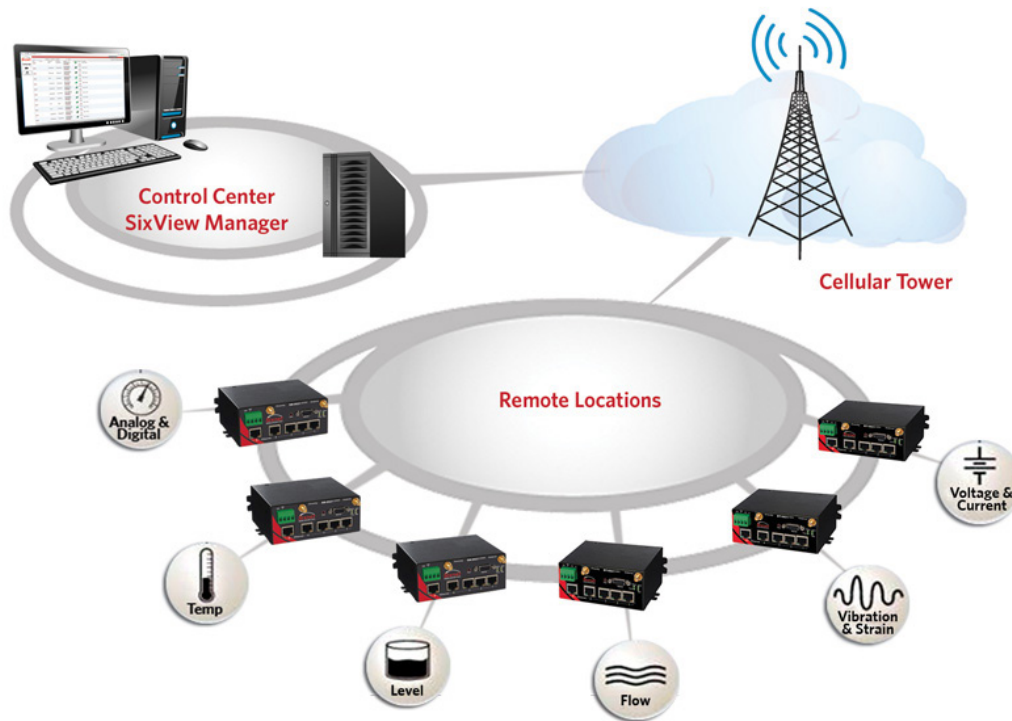

## HARDWARE & SOFTWARE REQUIREMENTS

SOFTWARE	HARDWARE
Web browser (Firefox, Chrome, Internet Explorer 10+)	Four or more core, 64-bit CPU at 2 GHz or faster
Linux server (examples: Red Hat Enterprise 6; Centos 6)	4GB RAM or higher
