imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SOMDIMM-LPC3250

Modular LPC3250 based Microprocessor Plug-In System On Module

The SOMDIMM-LPC3250 provides a quick and easy solution for implementing an ARM926EJ-S based design by providing the basic functions necessary for a product on an easy to use SOMDIMM. The SOMDIMM uses an industry standard 200 pin SO-DIMM interface. These sockets are utilized by virtually every laptop on the market.

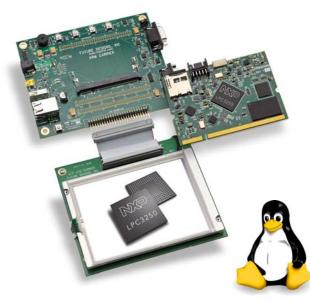

This SOMDIMM is compatible with FDI's Family of Touch Screen LCD Kits but can also be used for custom platform development or customer applications.

The SOMDIMM-LPC3250 includes an NXP LPC3250 ARM926EJ-S based microcontroller running the open source Linux software platform. The LPC3250 has 256KB of internal SRAM, a 10/100 Ethernet Media Access Controller (MAC), a USB full speed device/host/OTG controller, seven UARTs, and a collection of serial communications interfaces. The SOMDIMM-LPC3250 also includes 64MB* of external DDR SDRAM and 512MB* of external NAND FLASH.

Highlights

- SOMDIMM CPU Module
 - Based on SODIMM form factor (Dual Inline Memory Module)
 - LPC3250 266MHz ARM926EJ-S based core
 - Vector Floating Point Co-processor
 - 256KB of Internal SRAM
 - 64MB* of External DDR SDRAM * (128MB optional)
 - 512MB* of External NAND FLASH
 - 1KB of External Secure EEPROM
 - o 10/100 Ethernet PHY
 - Mini-JTAG and microSD Card connectors
 - o PCB Dimensions 2.66" x 1.89"
- Software Included
 - Linux Operating System
 - VMWare Development Virtual Machine Image
 - Linux Drivers support: LCD frame buffer, Touch Screen, NAND-Flash, SDRAM, MMC, USB, I2C, SPI, DMA, Ethernet, RS232, and RTC.
- Includes on-line application documents for all hardware and software
- Platform is based on a modular design for maximum flexibility
- Distribution stocking with volume discounts available

The DK-57VTS-LPC3250 is optimized to save development time in typical embedded control applications. The modular format uses a base Carrier Board, a core CPU SOMDIMM and an LCD Carrier Board. The base Carrier Board includes expansion connectors for added flexibility and a range of configurations. FDI offers low cost customization services for customer specific hardware, software or packaging applications at volumes of 500 units or more.

Software Included:

Linux Board Support Package

- Linux Operating System
- Bootloader (both primary boot loader and u-boot bootloader)
- VMWare Development Virtual Machine Image

Linux Drivers support:

- LCD frame buffer
- Touch Screen
- NAND-Flash, SDRAM, MMC
- USB, SPI, DMA, Ethernet, RS232, I2C, RTC.

Ordering Information

Part Number: SOMDIMM-LPC3250 NXP Part Number: OM11079

Volume Pricing Available Order Online at: <u>www.digikey.com</u>

Warranty: 30-day money back guarantee Phone 256-883-1240 Fax 256-883-1241 www.teamfdi.com

* Rev 2 Boards and later

Kit Contents:

SOMDIMM-LPC3250 Board

GPIO UART1

 Linux Software pre-loaded on units purchased individually but not on OEM units
