

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

GENERAL DESCRIPTION

The SP6669 is a synchronous current mode PWM step down (buck) converter capable of delivering up to 600mA of current and optimized for portable battery-operated applications.

Based on a current-mode 1.5MHz constant frequency PWM control scheme, the SP6669 reduces the overall component count and solution footprint. It provides low output voltage ripple and excellent line and load regulation. It also implements a 100% duty cycle LDO mode. Output voltage is adjustable to as low as 0.6V with a better than 3% accuracy while a low quiescent current supports the most stringent battery operating conditions.

Built-in over temperature and under voltage lock-out protections insure safe operations under abnormal operating conditions.

The SP6669 is offered in a RoHS compliant, "green"/halogen free 5-pin SOT23 package.

EVALUATION BOARD MANUAL

FEATURES

- **Guaranteed 600mA Output Current**
 - Input Voltage: 2.5V to 5.5V
- **1.5MHz PWM Current Mode Control**
 - 100% Duty Cycle LDO Mode Operations
 - Achieves 95% Efficiency
- **Adjustable Output Voltage Range**
 - As Low as 0.6V with $\pm 3\%$ Accuracy
- **Over Temperature & UVLO Protection**

EVALUATION BOARD SCHEMATICS

PIN ASSIGNMENT

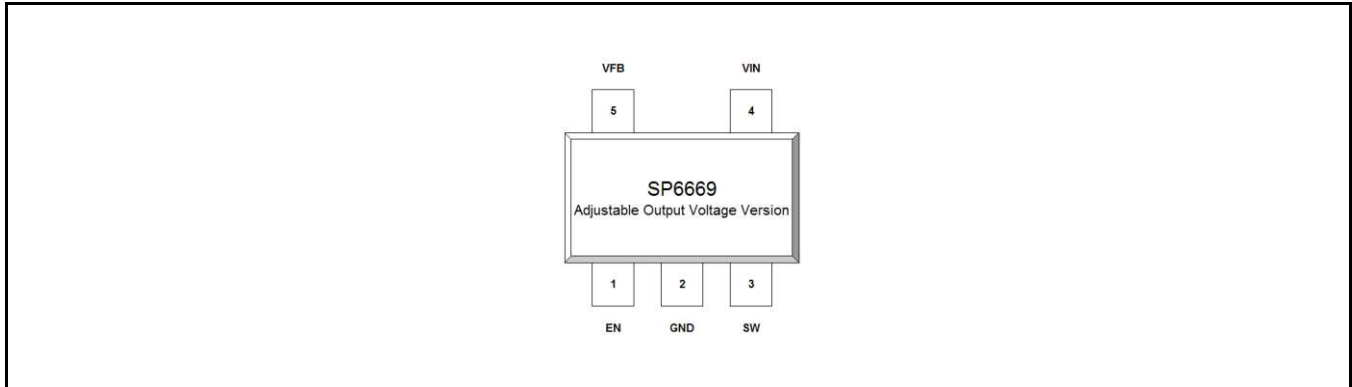

Fig. 2: SP6669 Pin Assignment

PIN DESCRIPTION

Name	Pin Number	Description
EN	1	Enable Pin. Do not leave the pin floating. $V_{EN} < 0.4V$: Shutdown mode $V_{EN} > 1.2V$: Device enabled
GND	2	Ground Signal Pin.
SW	3	Switching node.
VIN	4	Power Supply Pin. Must be decoupled to ground with a 4.7 μ F or greater ceramic capacitor.
VFB	5	Adjustable Version Feedback Input Pin. Connect VFB to the center point of the resistor divider.

ORDERING INFORMATION

Refer to SP6669's datasheet and/or www.exar.com for exact and up to date ordering information.

**USING THE EVALUATION BOARD****INITIAL SETUP**

Set the input supply to a voltage between 2.5V to 5.5V and connect it to VIN and GND connectors on the left side of the evaluation board. Connect the load to the VOUT and GND connectors on the right hand side of the board. Check to make sure that jumper J1 is set to VIN. The board will power-up and regulate to the desired output voltage VOUT set by the feedback resistors. The board will operate with a load current I_{OUT} of up to 600mA.

JUMPER J1 FUNCTION

Jumper J1 can be used to either short EN pin to VIN or to GND. The Board is supplied from EXAR with the jumper set to connect EN to VIN.

V_{OUT} PROGRAMMING

The SP6669 has a dynamically programmable output voltage using 2 feedback resistors to control the output voltage:

$$V_{OUT} = 0.6V \times \left(1 + \frac{R_1}{R_2}\right)$$
